Dark skies are now blotted out • Light pollution

I am fighting for humanity • Deforestation

The hole in the ozone layer is a kind of skywriting • Ozone depletion

We needed a mandate for change • Depletion of natural resources

Bigger and bigger boats chasing smaller and fewer fish • Overfishing

The introduction of a few rabbits could do little harm • Invasive species

As temperatures increase, the delicately balanced system falls into disarray • Spring creep

One of the main threats to biodiversity is infectious diseases • Amphibian viruses

Imagine trying to build a house while someone keeps stealing your bricks • Ocean acidification

The environmental damage of urban sprawl cannot be ignored • Urban sprawl

Our oceans are turning into a plastic soup • A plastic wasteland

Water is a public trust and a human right • The water crisis

ENVIRONMENTALISM AND CONSERVATION

The dominion of man over nature rests only on knowledge • Humankind's dominance over nature

Nature is a great economist • The peaceful coexistence of humankind and nature

A cumulative body of knowledge • Indigenous peoples and local communities

In wildness is the preservation of the world • Romanticism, conservation, and ecology

Man everywhere is a disturbing agent • Human devastation of Earth

Solar energy is both without limit and without cost • Renewable energy

The time has come for science to busy itself with the Earth itself • Environmental ethics

Think globally, act locally • The Green Movement

The consequences of today's actions on tomorrow's world • Man and the Biosphere Programme
