Biodiversity hotspots Norman Myers

THE VARIETY OF LIFE

Microbiology Louis Pasteur
The ubiquity of mycorrhizae Albert Frank
Animal ecology Charles Elton
Animal behaviour Konrad Lorenz
Using animal models to understand human behaviour Louis Leakey

ECOSYSTEMS

The food chain Richard Bradley
The ecosystem Tyler Miller and Scott Spoolman
The neutral theory of biodiversity Stephen Hubbell
Big ecology Long Term Ecological Research (LTER) Network
Biodiversity and ecosystem function Michel Loreau

ORGANISMS IN A CHANGING ENVIRONMENT

The distribution of species over space and time Alexander von Humboldt
The Verhulst equation Pierre François Verhulst
Organisms and their environment Stephen Alfred Forbes
The foundations of plant ecology David Attenborough
Ecological succession Henry David Thoreau
Climax community Frederic E. Clements
Open community theory Henry Allan Gleason
The ecological guild Richard B. Root
Citizen science Brent Mitchell
Chaotic population change Lev R. Ginzburg
Macroecology James Brown
Metapopulations Richard Levins
