1. **Swayam Siddha is meant for those in difficult circumstances such as women survivors of natural disasters or terrorism, women prisoners released from jails, mentally changed women etc. whereas Swadhar is meant for holistic empowerment of women through Self Help Groups.**
2. **Swayam Siddha is implemented through Local Self Government bodies or reputed Voluntary Organizations whereas Swadhar is implemented through the ICDS units set up in the state.**

Which of the statements given above is/are correct?

(a) 1 only (b) 2 only
(c) Both 1 and 2 (d) Neither 1 nor 2

Ans. (d) : Swayamsiddha is an integrated programme for the empowerment of women through the network of Self-Help Groups of women. The programme shall be implemented through the State government in 650 blocks throughout the country, but the State governments will be at liberty to choose the implementing authority.
Swadhar scheme, launched in 2001, provides for holistic rehabilitation of women in difficult circumstances. Twenty-two projects for the rehabilitation of the widows, women affected by riots in Gujarat, and women and girls rescued from prostitution are in operation at present. So both the statements are wrong.

105. As a result of their annual survey, the National Geographic Society and an international polling firm Globe Scan gave India top rank in Greendex 2009 score. What it this score.

(a) It is a measure of efforts made by different countries in adopting technologies for reducing carbon footprint
(b) It is a measure of environmentally sustainable consumer behaviour in different countries
(c) It is an assessment of programmes/schemes undertaken by different countries for improving the conservation of natural resources
(d) It is an index showing the volume of carbon credits sold by different countries

Ans. (b) : In the third annual survey of National Geographic Society and Globe Scan, Indian top ranked in Greendex 2009 due to environmentally sustainable consumer behaviour.

106. In the context of space technology, what is "Bhuvan", recently in the news?

(a) A mini satellite launched by ISRO for promoting the distance education in India
(b) The name given to the next Moon Impact Prove, for Chandrayan-II
(c) A geo-portal of ISRO with 3D imaging capabilities of India
(d) A space telescope developed by India.

Ans. (c) : ISRO launched the beta version of its web-based 3-D satellite imagery tool, Bhuvan, in 2009. It offers superior imagery of Indian locations compared to other virtual Globe software. Bhuvan is a satellite mapping tool similar to Google Earth. It offers resolution upto 10 metres and is considered as a rival to Google Earth and Wikimapia. On its 5th anniversary on 12th, August, 2014, Bhuvan has rolled our platform and plug-in independent Bhuvan 3D. It is available in English, Hindi, Tamil and Telugu.

107. Which among the following do/does not belong/belongs to the GSM family of wireless technologies?

(a) EDGE
(b) LTE
(c) DSL
(d) Both EDGE and LTE

Ans. (c) : DSL does not belong to the GSM family of wireless technology.

108. With reference to the treatment of cancerous tumours, a tool called cyber knife has been making the news. In this context, which one of the following statements is not correct?

(a) It is a robotic image guided system
(b) It delivers an extremely precise dose of radiation
(c) It has the capability of achieving sub-millimetre accuracy
(d) It can map the spread of tumour in the body

Ans. (d) : Cyber knife has the capability of achieving sub-millimeter accuracy is not correct.

109. India-based Neutrino Observatory is included by the Planning commission as a mega science project under the 11th Five Year Plan. In this context, consider the following statements:

1. **Neutrinos are charge less elementary particles that travel close to the speed of light.**
2. **Neutrinos are created in nuclear reactions of beta decay.**
3. **Neutrinos have a negligible, but nonzero mass.**
4. **Trillions of Neutrinos pass through human body every second.**

Which of the statements given above are correct?

(a) 1 and 3 only (b) 1, 2 and 3 only
(c) 2, 3 and 4 (d) 1, 2, 3 and 4

Ans. (d) : Neutrinos are nearly massless, chargeless particles that travel at or near the speed of light. There are three types of neutrinos: electron neutrinos, muon neutrinos and tauon neutrinos. Electron neutrinos (or antineutrinos) are generated whenever protons change into neutrons (or neutrons into protons) the two forms of beta decay. More than 50 trillion solar neutrinos pass through the human body every second.

110. Recently, LASIK (Laser Assisted In Situ Keratomileusis) procedure is being made popular for vision correction. Which one of the following statements in this context is not correct?

(a) LASIK procedure is used to correct refractive errors of the eye
(b) It is a procedure that permanently changes the shapes of the cornea
(c) It reduces a person's dependence on glasses or contact lenses
(d) It is a procedure that can be done on the person of any age

Ans. (d) : In order to undergo LASIK procedure one should be at least 18 years old, as the vision of people younger than 18 usually continues to change.

111. With reference to BRIC countries, consider the following statements:

1. **At present, China's GDP is more than the combined GDP of all the three other countries.**
2. **China's population is more than the combined population of any two other countries.**

Which of the statements given above is/are correct?

(a) 1 only (b) 2 only
(c) Both 1 and 2 (d) Neither 1 and 2

Ans. (a) : With reference to BRIC countries at present, China's GDP is more than the combined GDP of all the three other countries. The GDP of China was 6.09 lakh crores USD (2010). While India has a GDP of 1.68 lakh crores USD (2010), 2.21 lakh crores USD, and Russia had a GDP of 1.52 lakh crores USD (2010). So China's GDP was more than the sum of all three other countries. Hence statement 1 is correct. According to Current Data BRICS is an acronym for the grouping of the world's leading emerging economies, namely Brazil, Russia, India, China, and South Africa.
Hence answer is (a) only 1.

112. Stiglitz Commission established by the President of the United Nations General Assembly was in the international news. The commission was supposed to deal with

(a) The challenges posed by the impending global climate change and prepare a road map
(b) The workings of the global financial systems and to explore ways and means to secure a more sustainable global order
(c) Global terrorism and prepare a global action plan for the mitigation of terrorism
(d) Expansion of the United Nations Security Council in the present global scenario

Ans. (b) : The workings of the global financial systems and to explore ways and means to secure a more sustainable global order.

113. An objective of the National Food Security Mission is to increase the production of certain crops through area expansion and productivity enhancement in a sustainable manner in the identified districts of the country. What are those crops?

(a) Rice and wheat only
(b) Rice, wheat and pulses only
(c) Rice, wheat, pulses and oil seeds only
(d) Rice, wheat, pulses, oil seeds and vegetables

Ans. (b) : The target is to increase production of rice, wheat and pulses by 10,8 and 2 million tonnes respectively by end of the Eleventh Plan.

114. Mon 863 is a variety of maize. It was in the news for the following reason:

(a) It is a genetically modified dwarf variety which is resistant to drought
(b) It is a genetically modified variety which is pest resistant
(c) It is a genetically modified variety with then times higher protein content than regular maize crop
(d) It is a genetically modified variety used exclusively for bio-fuel production

Ans. (b) : Mon 863 is genetically modified variety of maize, which is resistant of corn root worm.

115. Consider the following statement:
The satellite Oceansat-2 launched by India helps in:

1. **Estimating the water vapour content in the atmosphere**
2. **Predicting the onset of monsoons.**
3. **Monitoring the pollution of coastal waters.**

Which of the statements given above is/are correct.

(a) 1 and 2 only (b) 2 only
(c) 1 and 3 only (d) 1, 2 and 3

Ans. (d) : Oceansat-2 continues with the service of oceansat-1. The main objectives of oceansat-2 are to study surface winds and ocean surface strata, observation of chlorophyll concentration, monitoring of phytoplanktion blooms, study of atmospheric aerosol and suspended sediments in the water.

116. Genetically modified "golden rice" has been engineered to meet human nutritional requirements. Which one of the following statements best qualifies golden rice?

(a) The grains have been fortified with genes to provide three times higher grain yield per acre than other high yielding varieties
(b) Its grains contain pro-vitamin A which upon ingestion is converted to vitamin A in the human body
(c) Its modified genes cause the synthesis of all the nine essential amino acids.
