130. P, Q, R and S are four men. P is the oldest but not the poorest. R is the richest but not the oldest. Q is older than S but not than P or R. P is richer than Q but not than S. The four men can be ordered (Descending) in respect of age and richness, respectively, as:

(a) PQRS, RPSQ
(b) PRQS. RSPQ
(c) PRQS. RSQP
(d) PRSQ, RSPQ

Ans. (b) : The four men can be ordered (Descending) in respect of age and richness respectively. PRQS, RSPQ.

131. A man fills a basket with eggs in such a way that the number of eggs added on each successive day is the same as the number already present in the basket. This way the basket gets completely filled in 24 days. After how many days the basket was 1/4th full?

(a) 6 (b) 12
(c) 17 (d) 22

Ans. (d) : Let x be the no. of eggs already present in the basket.
Then no. of eggs on each successive days -
x + 2x + 4x + 8x + ……. up to 24 days.
Form here we can see that number of eggs are getting doubled on each successive days. on 24th day basket was filled completely.

$\therefore$ On 23rd day basket was filled = $\frac{1}{2}$

Hence on 22nd day basket was filled = $\frac{1}{2}\times\frac{1}{2}=\frac{1}{4}$

So the basket was $\frac{1}{4}^{th}$ tilled in 22 day.

132. The diameters of two circular coins are in the ratio of 1 : 3. The smaller coin is made to roll around the bigger coin till it returns to the position from where the process of rolling started. How many times coins the smaller rolled around the bigger coin?

(a) 9 (b) 6
(c) 3 (d) 1.5

Ans. (c) :
Perimeter of bigger coin : perimeter of smaller coin
2x (3) 2x (1)
= 3 : 1
Then smaller coin will roll 3 times around the bigger coin.

133. The difference between the simple interest received from two banks on Rs. 500 for two years is Rs. 2.50. What is the difference between their rates?

(a) 0.25% (b) 0.5%
(c) 1% (d) 2.5%

Ans. (a) : Formula

$$SI = \frac{P\times R\times T}{100}$$

$$SI = \frac{P\times(r_1-r_2)\times T}{100}$$

$$2.5 = \frac{500\times(r_1-r_2)\times 2}{100}$$

$$r_1 - r_2 = \frac{2.5}{10} = 0.25\%$$

134. When ten persons shake hands with one another, in how many ways is it possible?

(a) 20 (b) 25
(c) 40 (d) 45

Ans. (d) :

10 persons total way of handshake = $\frac{n(n-1)}{2}$

Then = $\frac{10\times 9}{2}$

Hence option (d) is correct = 45

135. A candidate attempted 12 questions and secured full marks in all of them. If he obtained 60% in the test and all questions carried equal marks, then what is the number of questions in the test?

(a) 36 (b) 30
(c) 25 (d) 20

Ans. (d) : Suppose questions Number of test = x
x×60% = 12
$x\times\frac{60}{100}=12$
$x=\frac{12\times 100}{60}=20$

136. In how many ways can four children be made to stand in a line such that two of them, A and B are always together?

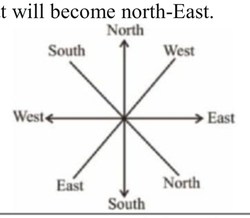

(a) 6 (b) 12
(c) 18 (d) 24

Ans. (b) : Total children = 4
condition = A & B always together (it means single entity) The now children = 4 – 2 + 1 = 3
Then according to fraction method
n!(n–1) × (n– 2) × …..
Then $\Rightarrow$ 3! × 2!
= 3 ×2 × 1 × 2 × 1 = 12
Then total of ways is = 12

137. In a meeting, the map of a village was placed in such a manner that south-east becomes north, north-east becomes west and so on what will south become?

(a) North (b) North-east
(c) North-west (d) West

Ans. (b) : According to question South becomes North - East because we move 135º in clockwise direction from south at will become north-East.

138. A person travelled a distance of 50 km in 8 hours. He covered a part of the distance on foot at the rate of 4 km per hour and a part on a bicycle at the rate of 10 km per hour. How much distance did he travel on foot?

(a) 10 km (b) 20 km
(c) 30 km (d) 40 km

Ans. (b) : According to question 50km is cover in 8 hours
by Foot speed = 4km/H
by bicycle speed = 10 km/H
Then speed = $\frac{\text{Distance}}{\text{Time}}$
Supposes x km covered on foot. Then (50 – x) km covered by bicycle.

Then = $\frac{x}{4}+\frac{(50-x)}{10}=8$

$\Rightarrow \frac{(5x+100-2x)}{2}=8$

$\Rightarrow$ 3x + 100 = 160
$\Rightarrow$ 3x = 60
x = 20
Then distance travelled on foot is 20 km.

139. How many numbers from 0 to 999 are not divisible by either 5 or 7?

(a) 313 (b) 341
(c) 686 (d) 786

Ans. (c) : The number from 0 to 999 are divisible by 5 & 7

$\frac{999}{5}=199$ $\frac{999}{7}=142$

both 5 & 7 $\Rightarrow$ 35 $\Rightarrow \frac{999}{35}=28$

Then 142 + 199 – 28 = 313
Then 0 to 999 divisible by 5 or 7 is 999 – 313 = 686.

140. In a group of five persons A, B, C, D and E, there is a professor, a doctor and lawyer. A and D are unmarried ladies, and do not work. Of the married couple in the Group, E is the husband. B is the brother of A and is neither a doctor nor a lawyer. Who is professor?

(a) B
(b) C
(c) A
(d) Cannot be determined with the available data

Ans. (a) : According to above instruction B is a professor.
A $\Rightarrow$ unmarried lady
B $\Rightarrow$ Professor
C $\Rightarrow$ Lawyer/Doctor
D $\Rightarrow$ Unmarried lady
E $\Rightarrow$ Doctor /Lawyer

141. Half of the villagers of a certain village have their own houses. One-fifth of the villagers cultivate paddy. One-third of the villagers are literate. Four-fifth of the villagers are below twenty five. Then, which one of the following is certainly true?

(a) All the villagers who have their own houses are literate
(b) Some villagers under twenty five are literate
(c) A quarter of the villagers who have their own houses cultivate paddy
(d) Half of the villagers who cultivate paddy are literate

Ans. (b) : Suppose total villagers are = 100x
The villagers who have their own houses
$=\frac{1}{2}\times 100x = 50x$

The villagers who cultivated paddy = $\frac{1}{5}\times 100x = 20x$

Literate villagers = $\frac{1}{3}\times 100x = 33.33x$

The villagers are below twenty five = $\frac{4}{5}\times 100x = 80x$

Some villagers under twenty five are literate as the number of villagers under twenty five are 80x and number of literate are 33.33x Hence statement (b) is true.

142. Each person's performance compared with all other persons is to be done to rank them subjectively. How many comparisons are needed in total, if there are 11 persons?

(a) 66 (b) 55
(c) 54 (d) 45

Ans. (b) : Total person = 11, Rank = 2

$\therefore {}^{11}C_1 \frac{11!}{(11-9)!9!}=\frac{11\times 10\times 9}{2\times 9!}$

= 55
Hence Answer will be (b) correct.

143 Six books A, B, C, D, E and F are placed side by side. B, C and E have blue cover and the other, books have red cover. Only D and F are new books and the rest are old. A, C, and D are law reports and others are Gazetteers. What book is a new law report with a red colour?

(a) A (b) B
(c) C (d) D
