**Ans. (c) :** Bisphenol A, commonly abbreviated as BPA, is an organic compound with two phenol functional groups. Bisphenol A is used primarily to make plastic which is used in making food packaging material. It is a key monomer in production of epoxy resins and used to make polycarbonateplastic.Polycarbonate plastic, which is clear and nearly shatter-proof, is used to make a variety of common products including baby and water bottles, sports equipment, medical and dental devices, dental fillings and sealants, eyeglass lenses, CDs and DVDs, and household electronics.

## ENVIRONMENT AND ECOLOGY

**81. Among the following, which one is not an ape?**

(a) Gibbon (b) Gorilla
(c) Langur (d) Orangutan

**Ans. (c) :** Gibbon, Gorilla and Orangutan are apes, but Langur is not an ape, it is prosimians.

**82. Which one of the following is an insectivorous plant?**

(a) Passion flower plant
(b) Pitcher plant
(c) Night queen
(d) Flame of the forest

**Ans. (b) :** Pitcher plant is an insectivorous plant. It feeds on living creatures including insects and small mammals. These plant attracts the prey with a smell of rotting meat. The victim is dissolved by chemical enzymes.

**83. For which one of the following snakes is the diet mainly composed of other snakes?**

(a) Krait (b) Russell's viper
(c) Rattle-snake (d) King cobra

**Ans. (d) :** Nagraj (King Cobra) is a dark brown or black snake up to 2 meters long. The food of this snake is mainly other snakes. Karait is the most venomous snake among Indian snakes, it is also called Chitkodia snake. It mostly comes out in the evening. Rasal Pridaku is found in plains and hilly areas. Its length is about 1.5 meters, its venom is toxic to the blood system.

**84. In which one of the following kinds of organisms is the phenomenon found wherein the female kills the male after copulation?**

(a) Dragonfly (b) Honeybee
(c) Spider (d) Pit viper

**Ans. (c) :** Sexual cannibalism is identified only in spiders in which female organism kills the male during or after copulation. In most species in which it occurs, sexual cannibalism is related to the larger size of female due to sexual dimorphism.

## CURRENT AFFAIRS

**85. ISRO successfully conducted a rocket test using cryogenic engines in the year 2007. Where is the test-stand used for the purpose, located?**

(a) Balasore
(b) Thiruvananthapuram
(c) Mahendragiri
(d) Karwar

**Ans. (c) :** India successfully tested the indigenous cryogenic engine on 15 November 2007 at the Liquid Propulsion System Center in Mahendragiri, Tamil Nadu. The new version of the indigenous cryogenic engine for GSLV was successfully test fired for 720 seconds. Now GSLV will no longer have to rely on Russian cryogenic engines. Till now only America, Russia and Europe had the capability of cryogenic engines.

**86. Nobel prize winning Scientist James D. Watson is known for his work in which area?**

(a) Metallurgy
(b) Meterology
(c) Environmental protection
(d) Genetics

**Ans. (d) :** Nobel Prize winning scientist James D. Watson is best known for his work in the field of genetics. He was the first to use the name genetics in 1905.

**87. In the context of the Indian defence, what is 'Dhruv'?**

(a) Aircraft-carrying warship
(b) Missile-carrying submarine
(c) Advanced light helicopter
(d) Intercontinental ballistic missile

**Ans. (c) :** Hindustan Aeronautics Limited (HAL) has developed the Dhruv advanced light helicopter (ALH), a light (5.5t class) multi-role and multi-mission helicopter for army, air force, navy, coastguard and civil operations for both utility and attack roles by day and night.

**88. With which one of the following is BRIT (Government of India) engaged?**

(a) Railway Wagons
(b) Information Technology
(c) Isotope Technology
(d) Road Transport

**Ans. (c) :** Board of Radiation and Isotope Technology in short known as "BRIT" is a unit of the Department of Atomic Energy, headquartered in Navi Mumbai. It is involved in production, development, and supply of radioisotope based products and provision of isotope applications, radiation processing, radio analytical services etc.

**89. What is the purpose of the US Space Agency's Themis Mission, which was recently in the news?**

(a) To study the possibility of life on Mars
(b) To study the satellites of Saturn
(c) To study the colourful display of high latitude skies
(d) To build a space laboratory to study the stellar explosions

**Ans. (c) :** The Themis mission, comprising five identical probes, aims to gain new insights into the colourful displays in high-latitude skies. In particular, scientists want to understand what triggers a sudden brightening of the lights.

**90. In which one of the following locations is the International Thermonuclear Experimental Reactor (ITER) project to be built?**

(a) Northern Spain
(b) Southern France
(c) Eastern Germany
(d) Southern Italy

**Ans. (b) :** ITER (International Thermonuclear Experimental Reactor) is an international nuclear fusion research and engineering megaproject, which is currently building the world's largest experimental to kamak nuclear fusion reactor adjacent to the Cadarache facility in the south of France.

**91. Which one of the following is a spacecraft?**

(a) Apophis (b) Cassini
(c) Spitzer (d) TechSar

**Ans. (b) :** Cassini-Hygens commonly known as Cassini. Cassini is a probe developed by NASA, and Huygens is a landed developed by E.S.A. Cassini mission is a joint venture of 3 different space agencies- NASA, ESA, and ASI to visit planet Saturn. Cassini is an unmanned spacecraft.

**92. Selene-1, the lunar orbiter mission belongs to which one of the following?**

(a) China (b) European Union
(c) Japan (d) USA

**Ans. (c) :**Mitsubishi Heavy Industries, Ltd. and the Japan Aerospace Exploration Agency (JAXA) launched the Lunar Orbit Explorer "KAGUYA" (SELENE) on September 14, 2007, from the Tanegashima Space Center. The major objectives of the mission were to understand the Moon's origin and evolution and to observe the Moon in various ways in order to utilize the facts in the future.

**93. Which one of the following Union Ministries is implementing the Biodiesel Mission (as Nodal Ministry)?**

(a) Ministry of Agriculture
(b) Ministry of Science and Technology
(c) Ministry of New and Renewable Energy
(d) Ministry of Rural Development

**Ans. (d) :** The implementation of the Bio-Diesel Mission (as the nodal ministry) is being done by the Union Ministry of Rural Development.

**94. Rajiv Gandhi National Flying Institute is being established in which State?**

(a) Karnataka (b) Maharashtra
(c) Kerala (d) Orissa

**Ans. (b) :** Rajiv Gandhi National Flying Institute was inaugurated on 9 February 2008 by the Prime Minister Dr.Manmohan Singh at Birsi Airport, Gondia (Maharashtra).

**95. Recently, the manuscripts of which one of the following have been included in the UNESCO's Memory of World Register?**

(a) Abhidhamma Pitaka
(b) Mahabharata
(c) Ramayana
(d) Rig-Veda

**Ans. (d) :** In June 2007, UNESCO has included 30 manuscripts of Rigveda, the oldest Hindu text from 1800 to 1500 BC, and the Red Fort, built in Delhi by the Mughal emperor Shah Jahan, in its two separate heritage lists. While the Red Fort has been included in the list of World Heritage Sites, the Rigveda manuscripts have been included in the list of cultural heritage. Then, total number of sites in India in the World Heritage List stands at 27.
NOTE: Now it is 38.

**96. From which one of the following did India buy the Barak anti-missile defence systems?**

(a) Israel (b) France
(c) Russia (d) USA

**Ans. (a) :** Barak is an Israeli surface-to-air missile (SAM) designed to be used as a ship-borne point-defense missile system against aircraft, anti-ship missiles, and UAVs. India and Israel jointly developed and produced it.

**97. Who among the following scientists shared the Nobel Prize in Physics with his son?**

(a) Max Planck (b) Albert Einstein
(c) William Henry Bragg (d) Enrico Fermi

**Ans. (c) :** Sir William Henry Bragg shared the Noble Prize in physics with his son Willion Lawrence Bragg in 1915 for their services in the analysis of crystal structure by means of X-rays.
