Which one of the following is correct in respect of the above statements :

(a) Both Statement-I and Statement-II are correct and Statement-II is the correct explanation for Statement-I.
(b) Both Statement-I and Statement-II are correct and Statement-II is not the correct explanation for Statement-I.
(c) Statement-I is correct but Statement-II is incorrect.
(d) Statement-I is incorrect but Statement-II is correct.

Ans. (c) : The constitution day is celebrated in India on 26 November every year to commemorate the adoption of the Constitution of India and also to promote the constitutional values among the citizen of India.

66. Consider the following statements :

Statement-I : Switzerland is one of the leading exporters of gold in terms of value.

Statement II : Switzerland has the second largest gold reserves in the world.

Which one of the following is correct in respect of the above statements :

(a) Both Statement-I and Statement-II are correct and Statement-II is the correct explanation for Statement-I.
(b) Both Statement-I and Statement-II are correct and Statement-II is not the correct explanation for Statement-I.
(c) Statement-I is correct but Statement-II is incorrect.
(d) Statement-I is incorrect but Statement-II is correct.

Ans. (c) : Switzerland is the leading exporter of gold in the world.
In 2021, Switzerland became 1st largest exporter of Gold in the world. While the Switzerland has 7th largest gold deposit in the world. Hence statement-1 is right while statement-2 is wrong.

67. Consider the following statements :

Statement-I : Recently, the United States of America (USA) and the European Union (EU) have launched the 'Trade and Technology Council'.

Statement II : The USA and the EU claim that through this they are trying to bring technological progress and physical productivity under their control.

Which one of the following is correct in respect of the above statements :

(a) Both Statement-I and Statement-II are correct and Statement-II is the correct explanation for Statement-I.
(b) Both Statement-I and Statement-II are correct and Statement-II is not the correct explanation for Statement-I.
(c) Statement-I is correct but Statement-II is incorrect.
(d) Statement-I is incorrect but Statement-II is correct.

Ans. (c) : Trade and Technology Council was launched by the United States of America and Europian Union during the EU-US Summit on 15 June, 2021 in Brussels with the aim to promote pooling of digital resources such as AI models and computing power and make them available to partner countries to address challenges in area such as climate change and extreme weather, health care or smart agriculture.
Hence statement-I is correct while statement-II is incorrect.

68. Consider the following statements :

Statement-I : India accounts for 32% of global export of goods.

Statement II : Many local companies and some foreign companies operating in India have taken advantage of India's 'Production-linked Incentive' scheme.

Which one of the following is correct in respect of the above statements :

(a) Both Statement-I and Statement-II are correct and Statement-II is the correct explanation for Statement-I.
(b) Both Statement-I and Statement-II are correct and Statement-II is not the correct explanation for Statement-I.
(c) Statement-I is correct but Statement-II is incorrect.
(d) Statement-I is incorrect but Statement-II is correct.

Ans. (a) : As per latest data available (Economic Survey 2022-23) India accounts for 1.8% of Global export of goods and 4% of global exports of services. Thus statement-I is incorrect Production Linked Incentive (PLI) scheme is a form of performance linked incentive given to companies based on their incremental sales from products manufactured in domestic units. It's aimed at boosting the manufacturing sector and reduce imports of India.
PLI schemes can be availed by both domestic as well as foreign companies. Many domestic and foreign companies operating in India have taken advantage of PLI scheme. Hence statement II is correct.

69. Consider the following statements :

The 'Stability and Growth Pact' of the European Union is a treaty that

1. **limits the levels of the budgetary deficit of the countries of the European Union**
2. **makes the countries of the European Union to share their infrastructure facilities**
3. **enables the countries of the European Union to share their technologies**

How many of the above statements are correct?

(a) Only one (b) Only two (c) All three (d) None

Ans. (a) : The Stability and Growth Pact (SGP) is an agreement, among all the 27 member states of European Union. It's aim to level the budget deficits of European countries The corrective arm of the stability and Growth pact ensure that member states adopt appropriate policy responses to correct excessive deficits (and/or debts) by implementing the excessive deficit procedure (CDP). The SGP treaty does not require its members to share their infrastructure facilities nor their technologies with other countries. The purpose of SGP was to ensure that fiscal discipline would be maintained and enforced in the European Union. hence statement-1 is correct while statements 2 & 3 are incorrect.

70. Consider the following statements :

1. **Recently, all the countries of the United Nations have adopted the first-ever compact for international migration, the 'Global Compact for Safe, Orderly and Regular Migration (GCM)'.**
2. **The objectives and commitments stated in the GCM are binding on the UN member countries.**
3. **The GCM addresses internal migration or internally displaced people also in its objectives and commitments.**

How many of the above statements are correct?

(a) Only one (b) Only two (c) All three (d) None

Ans. (a) : The Global compact for safe, orderly and regular migration is an intergovernmental agreement prepared under the overall aegis of United Nations. It is first intergovernmental agreement covering international migration in a holistic and comprehensive manner. Till now only 163 countries have adopted the Global Compact for safe, orderly and regular migration, United States, Hungary, Israel, Czech Republic and Poland are some of the countries that voted against the compact.
It is a non-legally binding agreement, that comprises 23 objectives for better managing migration at local, national, regional and global levels. Hence statements 1 & 2 are incorrect while statement 3 is correct.

71. Consider the following countries :

1. Bulgaria 2. Czech Republic 3. Hungary
4. Latvia 5. Lithuania 6. Ramania

How many of the above-mentioned countries share a land border with Ukraine?

(a) Only one (b) Only three (c) All four (d) Only five

Ans. (a) : Ukraine is bordered by Belarus, Russia Moldova, Romania, Hungary, Slovakia and Poland.

72. With reference to the Earth's atmosphere, which one of the following statements is correct?

(a) The total amount of insolation received at the equator is roughly about 10 times of that received at the poles.
(b) Infrared rays constitute roughly two-thirds of insolation.
(c) Infrared waves are largely absorbed by water vapour that is concentrated in the lower atmosphere.
(d) Infrared waves are a part of visible spectrum of electromagnetic waves of solar radiation.

Ans. (c) : Equator receives more direct sunlight compared to the poles, the actual difference in insolation is not as large as ten times. Hence option (a) is incorrect.
Insolation refers to the total solar radiation received at Earth's surface, which includes a broad spectrum of electromagnetic radiation. While infrared radiation is a significant component of solar radiation it does not accounts for two thirds of insolation. Insolation includes visible light, ultraviolet (UV) radiation and other wavelengths as well. Hence option (b) is also incorrect.
Water vapour is a potent absorber of infrared radiation particularly in certain wavelength bands.
In the lower atmosphere where the concentration of water vapour is relatively higher, it absorbs a significant amount of infrared radiation emitted by the Earth's surface. This absorption contributes to the greenhouse effect and plays a crucial role in regulating the earth's temperature. Hence option (c) is correct.
Infrared waves and visible light waves are distinct parts of electromagnetic spectrum.
The visible spectrum ranges from approximately 400 to 700 Nano meters and includes the colours are perceive, such as red, orange yellow green blue. Hence option (d) is incorrect.

73. Consider the following statements :

Statement-I : The soil in tropical rain forests is rich in nutrients.

Statement II : The high temperature and moisture of tropical rain forests cause dead organic matter in the soil to decompose quickly.

Which one of the following is correct in respect of the above statements :

(a) Both Statement-I and Statement-II are correct and Statement-II is the correct explanation for Statement-I.
(b) Both Statement-I and Statement-II are correct and Statement-II is not the correct explanation for Statement-I.
(c) Statement-I is correct but Statement-II is incorrect.
(d) Statement-I is incorrect but Statement-II is correct.

Ans. (d) : Tropical rain forest soil is very poor in nutrient which are required by plants to grow. This is due to acidic nature of soil and incessant rains. Potassium, Calcium, Magnesium and Phosphorous are lest away due to leaching, thus regeneration is very slow. Hence statement-1 is incorrect.
Tropical rainforests typically experience warm and consistent temperatures throughout the year. These elevated temperatures enhance the activity of soil micro-organism rate which is responsible for faster decompositions of organic matters. Hence statement-2 is correct.

74. Consider the following statements :

Statement-I : The temperature contrast between continents and oceans is greater during summer than in winter.

Statement II : The specific heat of water is more than that of land surface.

Which one of the following is correct in respect of the above statements :

(a) Both Statement-I and Statement-II are correct and Statement-II is the correct explanation for Statement-I.
(b) Both Statement-I and Statement-II are correct and Statement-II is not the correct explanation for Statement-I.
(c) Statement-I is correct but Statement-II is incorrect.
(d) Statement-I is incorrect but Statement-II is correct.

Ans. (d) : The temperature contrast between the continents and oceans is more during winter rather than summer. Hence statement-1 is incorrect.
The specific heat is the amount of heat energy required to raise the temperature of a substance by a certain amount. Water has a relatively high specific heat compare to land surfaces. Hence statement 2 is correct.

75. Consider the following statements :

1. **In a seismograph, P waves are recorded earlier than S waves.**
2. **In P waves, the individual, particles vibrate to and fro in the direction of wave propagation whereas in S waves, the particles vibrate up and down at right angles to the direction of wave propagation.**

Which of the statements given above is/are correct?

(a) 1 Only (b) 2 Only (c) Both 1 and 2 (d) Neither 1 nor 2

Ans. (c) : P-waves, also known as primary waves are the first waves to arrive at seismograph, P. waves are the fastest seismic waves and can move through solid, liquid and gas. P-waves are longitudinal waves, which means that the particle motion occur parallel to the direction of wave propagation which means the particles oscillates back and forth in the same direction that the wave is travelling. Hence both statements are correct.
