	A	B	C	D
(a)	5	3	2	1
(b)	2	3	4	1
(c)	5	3	4	2
(d)	2	4	1	3

Ans. (b) : Guenter Grass: The 71-year old German novelist, who confronted his countrymen with their guilty silence after the Holocaust, won the Novelist Prize for Literature.

Archbishop Trevor Huddleston: The Anglican monk who led the British campaign to end apartheid in South Africa.

Dicky Dolma : Youngest woman in the world to climb Mt. Everest in 1993.

Kim Campball : The first and only female Prime Minister of Canada.

119. Consider the following statements:

1. **The Charter of the United Nations Organization was adopted at Geneva, Switzerland in June, 1945.**
2. **India was admitted to the United Nations Organization in the year 1945.**
3. **The Trusteeship Council to the United Nations Organization was established to manage the affairs of territories detached from Japan and Italy after the Second World War or such territories not under the control of a country at that time.**

Which of the statements given above is/are correct?

(a) 1, 2 and 3 (b) 2 only
(c) 2 and 3 (d) 3 only

Ans. (c) : Statement (1) is not correct. The charter of UNO was adopted at San Francisco in June 1945. Rest of the statements are correct.

120. Match List I with List II and select the correct answer using the codes given below the lists:

List I (Distinguished person)	List II (Area of Work)
A. B.V. Rao	1. Automobiles Manufacture
B. C.K. Prahalad	2. Fisheries Economy
C. John Kurien	3. Information Technology and Software
D. Kiran Karnik	4. Poultry Farming
	5. Management Science

	A	B	C	D
(a)	2	5	1	3
(b)	4	3	2	5
(c)	2	3	1	5
(d)	4	5	2	3

Ans. (d) : B.V. Rao was an Indian Agriculturalist and Poultry Farmer, considered by many as the Father of Poultry Farming in India. C.K. Prahalad widely recognized as one of the world's 10 most influential Management Gurus, John Kurian is related to Fisheries Economy. Lastly, Kiran Karnik was President of NASSCOM, the premier trade body and 'Chamber of Commerce for the IT Software and Services Industry in India.

121. Who among the following invented Lasers?

(a) Theodore Maiman (b) Denis Papin
(c) William Moton (d) Francis Crick

Ans. (a) : Theodore Maiman invented Lasers.

122. Which one of the following is not an ASEAN member?

(a) Cambodia (b) China
(c) Laos (d) Philippines

Ans. (b) : The Association of Southeast Asian Nations, or ASEAN, was established on 8 August 1967 in Bangkok, Thailand, with the signing of the ASEAN Declaration (Bangkok Declaration) by the Founding Fathers of ASEAN, namely Indonesia, Malaysia, Philippines, Singapore, and Thailand. It is a regional intergovernmental organization comprising ten Southeast Asian countries - Indonesia, Cambodia, Myanmar (Burma), Thailand, Vietnam, Laos, Brunei, Malaysia, Singapore, Philippines.

123. Consider the following statements:

1. **The Parliament of Russia is called Federal Assembly.**
2. **The Council of the Federation in the Russian Parliament is the lower house.**
3. **The name of the upper house in the Russian Parliament is State Duma.**

Which of the statements given above is/are correct?

(a) 1, 2 and 3 (b) 1 and 2
(c) 2 and 3 (d) 1 only

Ans. (d) : The name of the parliament of Russian Federation is the Federal Assembly of Russia.

- The term for its lower house, State Duma (which is better known than the Federal Assembly itself, and is often mistaken for the entirety of the parliament) comes from the Russian word dumat, "to think".
- The Federation Council is the upper house of the Federal Assembly of according to the 1993 Constitution of the Russian Federation.

Directions:

(For the next FOUR items): Based on the information given below, answer the four items which follow it:

Gopal, Harsh, Inder, Jai and Krishnan have Ahmedabad, Bhopal, Cuttack, Delhi and Ernakulam as their hometowns (Not necessarily in that order). They are studying in Engineering, Medical, Commerce, Economics and History Colleges (Not necessarily in that order). None of the five boys is studying in his hometown, but each of them studies Further, it is given that:

(i) **Gopal's hometown is Ernakulam.**
(ii) **Harsh is not studying in Ahmedabad or Bhopal.**
(iii) **Economics College is in Bhopal.**
(iv) **Inder's hometown in Cuttack**
(v) **Krishnan is studying in Delhi.**
(vi) **Jai is studying in Ernakulam and the History College is in his hometown Ahmedabad.**
(vii) **Engineering College is situated in Ernakulam.**

Based on the information given above answer the next FOUR items:

The given information can be tabulated as–

Student	Home Town	College in Home Town	Studying	Subject
Gopal	Ernakulum	Engineering	Bhopal/ Ahmedabad	
Harsh	Delhi	Commerce/ Medical	Cuttuck	
Inder	Cuttuk	Commerce/ Medical	Bhopal/ Ahmedabad	
Jai	Ahmedabad		Ernakulum	Engineering
Krishnan	Bhopal		Delhi	

124. Which is Krishnan's hometown?

(a) Ahmedabad
(b) Cuttack
(c) Bhopal
(d) Cannot be determined

Ans. (c) : Bhopal

125. Which College is situated in Inder's hometown?

(a) Commerce
(b) Medical
(c) Economics
(d) Commerce or Medical

Ans. (d) : Commerce or Medical

126. Who studies in Bhopal?

(a) Gopal (b) Harsh
(c) Gopal or Inder (d) Inder or Harsh

Ans. (c) : Gopal or Inder

127. If Inder studies in Ahmedabad, then which one of the following is the correct combination of Person–Hometown–Place of Study?

(a) Gopal–Ernakulam–Delhi
(b) Jai–Ahmedabad–Ernakulam
(c) Krishanan–Delhi–Ernakulam
(d) Harsh–Bhopal–Delhi

Ans. (b) : Jai–Ahmedabad–Ernakulam

128. Left pan of a faulty balance weighs 100 gram more than its right pan. A Shopkeeper Keep the weight measure in the left pan while buying goods but keeps it in the right pan while selling his goods. He uses only 1 kg weight measure. If he sells his goods at the listed cost price, what is his gain?

(a) 200/11% (b) 100/11%
(c) 100/9% (d) 200/9%

Ans. (d) : Let the cost price of 1 kg goods be Re 1
Then he buys 1100gm of goods for Re 1 and sells 900 gm of goods for Re 1
$\therefore$ Cost price of 1100 gm of goods = Re 1

$$\Rightarrow \text{Cost price of 900 gm of goods} = \frac{1}{1100} \times 900 = \frac{9}{11}$$

Selling price of 900 gm of goods = Re 1

$$\text{Gain} = 1 - \frac{9}{11} = \frac{2}{11}$$

$$\text{Gain\%} = \frac{2}{11} \times \frac{11}{9} \times 100 = \frac{200}{9}\%$$

129. On a railway route between two places A and b, there are 10 stations on the way. If 4 new stations are to be added how many types of new tickets will be required if each ticket is issued for a one-way journey?

(a) 14 (b) 48
(c) 96 (d) 108

Ans. (d) : There are 10 + 2 - stops along the line before the 4 new stops.
$\therefore$ Each of the 4 new stations that can go back and forth between these 12 stops = 4 × 12 × 2 = 96 new one way ticket would be needed.
Again
For each 4 stations that can go back and forth between each other there are 4!/2! = 12 ways to select
$\therefore$ Total one way ticket required = 96 + 12 = 108

130. Aryan runs at a speed of 40 metre/minute. Rahul follows him after an interval of 5 minutes and runs at a speed of 50 metre/minute. Rahul's dog runs at a speed of 60 metre/minute and starts along with Rahul. The dog reaches Aryan and then comes back to Rahul and continues to do so till Rahul reaches Aryan. What is the total distance covered by the dog?

(a) 600 metres (b) 750 metres
(c) 980 metres (d) 1200 metres

Ans. (d) : Distance covered by Aryan in 5 min = 40 × 5 = 200 m.
Relative speed of Rahul with reference to Aryan
50 – 40 = 10 metres/minute
$\therefore$ Time taken by Rahul to cover 200m at relative

$$\text{Speed} = \frac{200}{10} = 20 \text{ minutes}$$

$\therefore$ Distance covered by the dog = 60 × 20
= 1200 metres
