(b) India is the ninth largest steel producing country in the world.

(c) India is the second largest producer of silk in the world.

(d) India ranks third in the world in coal production.

Ans. (a) : India is the second largest importer of nitrogenous fertilizers in the world not the producer. Hence first statement is not correct. Rest of the statements is correct.

76. With reference to Government of India's decisions regarding Foreign Direct Investment (FDI) during the year 2001-02, consider the following statements:

1. Out of the 100% FDI allowed by India in tea sector, the foreign firm would have to disinvest 33% of he equity in favour of an Indian partner within four years.

2. Regarding the FDI in print media in India, the single largest Indian shareholders should have a holding higher than 26%.

Which of these statements is/are correct?

(a) Only 1 (b) Only 2

(c) Both 1 and 2 (d) Neither 1 nor

Ans. (c) : Both the statements are correct.

77. In India, the first bank of limited liability managed by Indians and founded in 1881 was

(a) Hindustan Commercial Bank

(b) Oudh Commercial Bank

(c) Punjab National Bank

(d) Punjab and Sind Bank

Ans. (b) : The first bank in India was established in 1806 under the name Bank of Bengal. The first commercial bank in India was established in 1881. It was named Awadh or Oudh Commercial Bank. The Imperial Bank of India was established in 1921 and it was nationalized and renamed SBI in 1955 on the recommendation of the Gorwala Committee.

78 The Government holding in BPCL is

(a) more than 70%

(b) between 60% and 70%

(c) between 50% and 60%

(d) less than 50%

Ans. (b) : Government holds stake of 66.21% in BPCL. Last year, the government had decided to disinvest its 10% stake but this was not possible due to political deadlock.

79. During the year 2002-01, which one of the following industries recorded highest growth rate in India?

(a) Cement (b) Coal

(c) Electricity (d) Steel

Ans. (d) : The steel industry recorded highest growth rate of 7%, electricity generation growth rate was 4%, coal industry growth was 3.3%.

80. Debenture holder of a company are its

(a) Shareholders (b) Creditors

(c) Debtors (d) Directors

Ans. (b) : Shares, debentures etc. are the main sources of capital raising of any company. Share means a shareholder of a company and is a part of the company. They are directly affected by the profit and loss of the company. The company issues debentures for the requirement of capital. In a way, the company takes loans. It is issued on a fixed term and at a fixed rate of interest. The amount is refunded by the company on completion of time.

81. Consider the following statements:
In India stamp duties on financial transaction are :

1. Levied and collected by the State Government.

2. Appropriated by the Union Government.

Which of these statements is/are correct?

(a) Only 1 (b) Only 2

(c) Both 1 and 2 (d) Neither 1 nor 2

Ans. (d) : Stamp duty is a form of tax that is levied on documents. It is levied by the union or the central government and collected and appropriated by the state governments. (Entry 91 in the union list; entry 63 in the state list of Seventh Schedule of Constitution of India).

82. Which one of the following statements is correct with reference to FEMA in India?

(a) The Foreign Exchange Regulating Act (FERA) was replaced by Foreign Exchange Management Act (FEMA) in the year 2001.

(b) FERA was given a sunset clause of one year till 31st May, 2002 to enable Enforcement Directorate to complete the investigation of pending issues.

(c) Under FEMA, violation of foreign exchange rules has ceased to be a criminal offence.

(d) As per the new dispensation, Enforcement Directorate can arrest and prosecute the people for the violation of foreign exchange rules.

Ans. (b) : FERA was for two years until May 31, 2002. A fixed time (sunset) clause was given so that the Enforcement Directorate completes the investigation of undecided subjects. The remaining statements a, c and d are incorrect.

83. Consider the following statements:

1. India's import of crude and petroleum products during the year 2001-02 accounted for about 27% of India's total imports.

2. During the year 2001-02, India's exports had increased by 10% as compared to the previous year.

Which of these statements is/are correct?

(a) Only 1 (b) Only 2

(c) Both 1 and 2 (d) Neither 1 nor 2

Ans. (a) : India's import of crude and petroleum products during the year 2001-02 accounted for about 27% of India's total imports. Hence first statement is correct while during the year 2001-02, India's exports had increased nearly by 20% as compared to the previous year. Hence second statement is not correct.

84. Consider the following statements:

1. India ranks first in the world in fruit production.

2. India ranks second in the world in the export of tobacco.

Which of these statements is/are correct?

(a) Only 1 (b) Only 2

(c) Both 1 and 2 (d) Neither 1 nor 2

Ans. (d) : India ranked 2nd in the fruit production in the world and ranked 6th in export of tobacco.

PHYSICS

85. Assertion (A) : The weight of a body decreases with the increase of latitude on earth.

Reason (R) : The earth is not a perfect sphere.

(a) Both A and R are individually true and R is the correct explanation of A.

(b) Both A and R are individually true but R is NOT the correct explanation of A.

(c) A is true but R is false.

(d) A is false but R is true.

Ans. (d) : The weight of the body has nothing to do with the latitude of the earth. We experience the weight of any object with the gravitational acceleration (g) present on the earth, irrespective of the mass of the object. Without gravitational acceleration, we experience weightlessness. This is why we find a state of weightlessness in space. The value of gravitational acceleration increases when the equator moves from the equator to the poles.

86. If the radius of the earth were to shrink by one percent, its mass remaining the same, the value of 'g' on the earth's surface world.

(a) Increase by 0.5% (b) Increase by 2%

(c) Decrease by 0.5% (d) Decrease by 2%

Ans. (b) : The value of 'g' or the acceleration due to gravity is given by

$$g = \frac{GM}{R^2}$$

$$\Rightarrow g\alpha\frac{1}{R^2}$$

$$\frac{\Delta g}{g} = -2\frac{\Delta R}{R} = -2(-0.01) = 0.02$$

$$\Delta g = 0.02g$$

So, the value of g increases by 2 percent.

87. A hydrogen-inflated polythene balloon is released from the surface of the earth. As the balloon rises to an altitude up in the atmosphere, it will:

(a) Decrease in size

(b) Flatten into a disc-like shape

(c) Increase in size

(d) Maintain the same size and shape

Ans. (c) : As a weather balloon rises into high altitudes, where air pressure decreases, the helium or hydrogen pressure inside the balloon increases and expands the balloon.

88. Consider the following statements:

1. Steam at 100ºC and boiling water at 100ºC contain same amount of heat.

2. Latent heat of fusion of ice is equal to the latent heat of vaporization of water.

3. In an air-conditioner, heat is extracted from the room-air at the evaporator coils and is rejected out at the condenser coils.

Which of these statements is/are correct?

(a) 1 and 2 (b) 2 and 3

(c) Only 2 (d) Only 3

Ans. (d) : The heat required to change the state of matter at constant temperature is called latent heat. The latent heat of melting for ice is 80 calories/gram. The latent heat value of evaporation for water is 540 calories/g. Burning with steam is more painful than boiling water because the secret heat of steam is more than that of water.

89. Consider the following statements: A 4-wheel **vehicle moving a sharp circular path at high speed will**

1. Overturn about its outer wheels

2. Overturn about its inner wheels

3. Skid outward

4. Skid inwards

Which of these statements are correct?

(a) 1 and 3 (b) 2 and 4

(c) 2 and 3 (d) 1 and 4

Ans. (c) : In case of object moving along a circular path, two types of forces namely centripetal and centrifugal acts upon it. As they have opposite impact, thus the object remains in balance. When centrifugal force gets disturbed then the object will leave the balance and skid towards an outward direction.
