22. With reference to colonial period of Indian history, Match List I with List II and select the correct answer using the codes given below the lists-

	List I (Person)		List II (Event)
A.	Macdonald	1.	Doctrine of Lapse
B.	Linlithgow	2.	Communal Award
C.	Dalhousie	3.	August Offer
D.	Chelmsford	4.	Diarchy

	A	B	C	D
(a)	3	2	1	4
(b)	3	2	4	1
(c)	2	3	1	4
(d)	1	4	3	2

Ans. (c) : The Communal Award was announced by British PM, Ramsay McDonald in August 1932. August Offer (1940)- Linlithgow ; Under Doctrine of Lapse, Dalhousie annexed Satara, Jaitpur, Sambalpur, Udaipur, Jhansi, Nagpur and Awadh. Government of India Act 1919, introduced diarchy during the viceroyality of Chelmsford.

INDIAN GEOGRAPHY

23. With reference to India, which one of the following statements is not correct?

(a) About one-third of the area of the country records more than 750 millimeters of annual rainfall.

(b) The dominant source of irrigation in the Country is wells.

(c) Alluvial soil is the predominant type of soil in the northern plains of the country.

(d) The mountain areas account for about thirty percent of the surface area of the country.

Ans. (b) : Due to the network of rivers in the northern parts of the country, the soil here is alluvial soil. About 35% of the total irrigated agricultural area in the whole country is irrigated by canals, which is the maximum. Rest of the statements is correct.

24. Open stunted forests with bushes and small trees having long roots and sharp thorns or spines are commonly found in

(a) Eastern Orissa

(b) North-Eastern Tamil Nadu

(c) Siwaliks and Terai region

(d) Western Andhra Pradesh

Ans. (d) : Open stunted forests with bushes and having long roots and sharp thorns or spines are commonly found in Western Andhra Pradesh. Open stunted forests with bushes and small trees having long roots and sharp thorns or spines are commonly found in the area where the rainfall is less than 80 cm. Such areas are found in Rajasthan, Gujarat, Haryana and western Andhra Pradesh.

25. Which one of the following is not a lagoon?

(a) Ashtamudi lake (b) Chilka lake

(c) Periyar lake (d) Pulicat lake

Ans. (a) : Chilka, Periyar and Pulicat lake are lagoons. They are formed due to separation of sea water by deposition and clay, but Ashtamudi lake is not a lagoon.

26. With reference to Indian agriculture, which one of the following statements is correct?

(a) About 90 percent of the area under pulses in India is rainfed.

(b) The share of pulses in the gross cropped area at the national level has doubled in the last two decades.

(c) India accounts for about 15 percent of the total area under rice in the world.

(d) Rice occupies about 34 percent of the gross cropped area of India.

Ans. (a) : In Indian agriculture about 90% of the area under pulse is rainfed but pulses need less water for cultivation so the production of pulse hampers.

27. HINDALCO, an aluminium factory located at Renukut owes its site basically to:

(a) Proximity of raw materials.

(b) Abundant supply of power.

(c) Efficient transport network.

(d) Proximity to the market.

Ans. (b) : HINDALCO, an aluminium factory is located at Renukut due to abundant supply of power from National Thermal Power Station, Rihand and a captive thermal power plant at Renu Sagar. It has a cogeneration unit at the plant itself.

28. The correct sequence of the eastward flowing rivers of the peninsular India from north to south is

(a) Subarnarekha, Mahanadi, Godavari, Krishna, Pennar, Cauvery and Vaigai.

(b) Subarnarekha, Mahanadi, Krishna, Godavari, Cauvery, Vaigai and Pennar.

(c) Mahanadi, Subarnarekha, Godavari, Krishna, Cauvery, Pennar and Yaigai.

(d) Mahanadi, Subarnarekha, Krishna, Godavari, Cauveri, Vaigai and Pennar.

Ans. (a) : The correct sequence of the eastward flowing rivers of the peninsular India from north to south is Subarnarekha, Mahanadi, Godavari, Krishna, Pennar, Cauvery and Vagai.

29. The average annual temperature of a meteorological station is 26ºC, its average annual rainfall is 63cm and the annual range of temperature is 9ºC. The station in question is

(a) Allahabad (b) Chennai

(c) Cherrapunji (d) Kolkata

Ans. (b) : The climatic condition of Chennai is tropical savanna type where the average annual temperature of meterological station is 26ºC and average rainfall is 63 cm and annual range temperature is 9ºC.

30. Chapchar Kut is a festival celebrated in the state of

(a) Arunachal Pradesh (b) Assam

(c) Mizoram (d) Sikkim

Ans. (c) : The Chapchar **Kut is a festival** of **Mizoram**. It is **celebrated** during March after completion of their most arduous task of jhum cultivation i.e., jungle-clearing (clearing of the remnants of burning). It is a spring **festival celebrated** with great favour and gaiety.

31. Match List I with List II and select the correct answer using the code given below the lists:

	List I (Indian Wildlife names)		List II (Scientific Species)
A.	Asiatic Wild Ass	1.	Boselaphus tragocamelus
B.	Barasingha	2.	Rucervus duvauceli
C.	Chinkara	3.	Equus hemionus
D.	Nilgai	4.	Gazella bennetti

	A	B	C	D
(a)	2	3	1	4
(b)	3	2	4	1
(c)	2	3	4	1
(d)	3	2	1	4

Ans. (b) : List-I (Animal) – List-II (Scientific name)

A. Asiatic wild Ass – Equus hemionus

B. Barasingha – Rucervus duvaucelii

C. Chinkara – Gazella bennetti

D. Nilgai – Boselaphus tragocamelus

32. Consider the following high yielding varieties of crops in India:

1. Arjun 2. Jaya
3. Padma 4. Sonalika

Which of these are wheat?

(a) 1 and 2 (b) 2 and 3

(c) 1 and 4 (d) 3 and 4

Ans. (c) : Arjun and Sonalika are hybrid variety of wheat produced by Indian Council of Agricultural Research.

WORLD GEOGRAPHY

33. Which one of the following statements is correct with reference to our solar system?

(a) The Earth is the densest of all the planets in our solar system.

(b) The predominant element in the composition of Earth is silicon.

(c) The Sun contains 75 percent of the mass of the solar system.

(d) The diameter of the Sun is 190 times that of the Earth.

Ans. (a) : With an average density of 5.52, the Earth is the densest of all the planets of our solar system. The predominant element of the Earth's composition is iron (35%) while that of the earth's crust is oxygen (46%). The Sun contains more than 99% of the mass of the solar systems. The diameter of the sun is about 109 times that of the Earth.

34. Consider the following statements:

1. In equatorial regions, the year is divided into four main seasons.

2. In Mediterranean region, summer receives more rain.

3. In China type climate, rainfall occurs throughout the year.

4. Tropical highlands exhibit vertical zonation of different climates.

Which of these statements are correct:

(a) 1, 2, 3 and 4 (b) 1, 2 and 3

(c) 1, 2 and 4 (d) 3 and 4

Ans. (d) : Equatorial regions are found near equator which includes Central America, South America, Central Africa and South East Asia. Rainforest are located in the equatorial climate region. They are hot and wet throughout the year which creates humid climate. Hence statement 1 is not correct. Mediterranean region has dry climate. There is no rainfall during summer while this region gets rain during winters. Hence statement 2 is also incorrect. Rest of the two given statements is correct.
