35. Match List I with List II and select the correct answer using the code given below the lists:

List I (Country)	List II (President)
A. Cango	1. Levy Mwanawasa
B. Nigeria	2. Joseph Kabila
C. Uganda	3. Olusegum Obasanjo
D. Zambia	4. Yoweri Museveni

	A	B	C	D
(a)	2	3	4	1
(b)	3	2	1	4
(c)	2	3	1	4
(d)	3	2	4	1

Ans. (a) : When the question was asked the President of Congo was Joseph Kabila, President of Nigeria was Olusegum Obasanjo. Yoweri Museveni is president of Uganda since 1986 and Levy Mwanawasa was president of Zambia.

36. Consider the following ecosystems:

1. Taiga
2. Tropical evergreen
3. Tropical decidous
4. Tundra

The correct sequence in decreasing order of the albedo values of these ecosystems is

(a) 1, 4, 3, 2 (b) 4, 1, 2, 3
(c) 4, 1, 3, 2 (d) 1, 4, 2, 3

Ans.(c): Surface albedo is a property of the earth's surface that provides an important climate regulating ecosystem service through the reflection of incoming solar radiation. The correct sequence in decreasing order of the albedo values of these ecosystems are Tundra, Taiga, Tropical deciduous and Tropical evergreen.

37. Assertion (A) : 60º–65º latitudes in both the hemispheres have a low pressure belt instead of high pressure.

Reason (R) : The low pressure areas are permanent over oceans rather than on land.

(a) Both A and R are individually true and R is the correct explanation of A.
(b) Both A and R are individually true but R is NOT the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

Ans. (c) : Sub-polar low pressure is located between 60– 65º latitude in both hemisphere. Low pressure is produced in this area, because the surface air spreads outward from this zone due to rotation of earth. Salt water takes time to release the heat as compared to land. So high pressure areas are permanent on over oceans rather than on land. Hence, A is true but R is false. So option (c) is correct answer.

38. Assertion (A) : Artificial satellites are always launched from the earth in the eastward direction.

Reason (R) : The earth rotates from west to east and so the satellite attains the escape velocity.

(a) Both A and R are individually true and R is the correct explanation of A.
(b) Both A and R are individually true but R is NOT the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

Ans. (c) : Artificial satellites are always launched from the earth in the eastward direction as the earth rotates from west to east. It makes the satellite geosynchronous. But the escape velocity of 11.2 km/s is given by the booster of the rocket and has nothing to do with the direction of launching the satellite

39. Assertion (A) : The surface winds spiral inwards upon the centre of the cyclone.

Reason (R) : Air descends in the centre of the cyclone

(a) Both A and R are individually true and R is the correct explanation of A
(b) Both A and R are individually true but R is NOT the correct explanation of A
(c) A is true but R is false
(d) A is false but R is true

Ans. (a) : The surface wind spiral inwards the centre of the cyclone, because air descends at the centre of the cyclone.

40. Consider the following climatic and geographical phenomena:

1. **Condensation**
2. **High temperature and humidity**
3. **Orography**
4. **Vertical wind**

Thunder Cloud development is due to which of these phenomena?

(a) 1 and 2 (b) 2, 3 and 4
(c) 1, 3 and 4 (d) 1, 2, 3 and 4

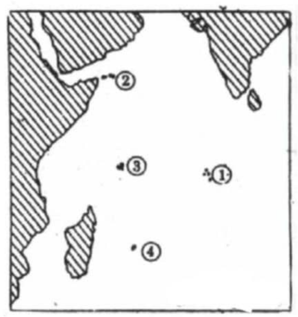

Ans. (d) : Thunder cloud can develop by all the above mentioned climatic and geographical phenomena. High temperature and humidity cause the wind to rise vertically up where the winds get condensed forming cumulonimbus clouds or thunder clouds. These clouds cause rain in the presence of orographical features such as mountains.

41. For short-term climatic predictions, which one of the following events, detected in the last decade, is associated with occasional weak monsoon rains in the Indian sub-continent?

(a) La Nina
(b) Movement of Jet Streams
(c) El Nino and Southern Oscillations
(d) Greenhouse effect on global level

Ans. (c) : For short-term climatic predictions, El Nino and southern oscillations, detected in the last decade, is associated with occasional weak monsoon rains in the Indian subcontinent. El Niño and the Southern Oscillation, also known as ENSO is a periodic fluctuation in sea surface temperature (El Niño) and the air pressure of the overlying atmosphere (Southern Oscillation) across the equatorial Pacific Ocean.

42. In the map given below, four island of Indian Ocean region i.e., (A) Seychelles, (B) Chagos, (C) Mauritius and (D) Socotra are marked as 1, 2, 3 and 4. Match them and select the correct answer from the codes given below:

	A	B	C	D
(a)	1	3	4	2
(b)	3	1	2	4
(c)	1	3	2	4
(d)	3	1	4	2

Ans. (d) : In the given figure, four islands of Indian ocean region are Chagos, Socotra, Seychelles and Mauritius which are marked as 1, 2, 3 and 4 respectively.

43. Consider the following statements:

1. **Ocean currents are the slow-surface movement of water in the ocean.**
2. **Ocean currents assist in maintaining the Earth's heat balance.**
3. **Ocean currents are set in motion primarily by prevailing winds.**
4. **Ocean current are affected by the configuration of the ocean.**

Which of these statements are correct?

(a) 1 and 2 (b) 2, 3 and 4
(c) 1, 3 and 4 (d) 1, 2, 3 and 4

Ans. (b) : Ocean currents are not slow most of the time and can be surface current also, so statement 1, is wrong, and Rest of others are correct. Hence, option (b) will be right answer.

44. Consider the following countries:

1. Brazil
2. Indonesia
3. Japan
4. Russia

What is the descending order of the size of the following countries population-wise?

(a) 1, 2, 4, 3 (b) 2, 3, 1, 4
(c) 2, 1, 4, 3 (d) 1, 2, 3, 4

Ans. (c) : According to data of 2010, population of Indonesia is 242 million, population of Brazil is 201 million, population of Japan is 126.8 million and population of Russia is 139.3 million. So the descending order of the size of the country is Indonesia Brazil Russia and Japan.

45. Match List I with List II and select the correct answer using the codes given below the lists:

List I (Ethnic Community)	List II (Country)
A. Apatani	1. China
B. Dayak	2. India
C. Dinka	3. Indonesia
D. Uighur	4. Sudan

	A	B	C	D
(a)	2	3	4	1
(b)	3	2	4	1
(c)	2	3	1	4
(d)	3	2	1	4

Ans. (a) : Human Ethnic Community – Country
1. Dinka- Sudan
2. Apatani -India
3. Dayak- Indonesia
4. Uighur- China

46. Consider the following countries:

1. **Albania**
2. **Bosnia Herzegovina**
3. **Croatia**
4. **Macedonia**

Which of these countries has/have Adriatic Sea as a boundary?

(a) 1 and 2 (b) 1, 2 and 3
(c) 4 only (d) 3 and 4

Ans. (b) : The Adriatic Sea is a body of water separating the Italian Peninsula from the Balkan Peninsula. The Adriatic is the northernmost arm of the Mediterranean Sea, extending from the Strait of Otranto (where it connects to the Ionian Sea) to the northwest and the Po Valley. The countries with coasts on the Adriatic are Albania, Bosnia and Herzegovina, Croatia, Italy, Montenegro and Slovenia.
