Ans. (a) : Ticks and mites are categorized under order Arachnids of phylum Arthopoda of animal kingdom.

93. With reference to the blood in a normal person, which one of the following statements is correct?

(a) Compared to arteries, veins are less numerous and hold less of the body's blood at any given time.

(b) Blood cells constitute about 70 percent of the total volume of the blood.

(c) White Blood Cells (WBC) are made by lymph nodes only.

(d) The blood has more platelets than WBC.

Ans. (d) : Blood has more platelets than corpuscles. A microlitre of blood contains 5,000-10,000 of White blood cells (WBC) and 150,000-500,000 platelets.

94. Consider the following plants:

1. Bougainvillea 2. Carnations

3. Cocoa 4. Grapes

Which of these plants are propagated by stem cuttings?

(a) 1 and 2 (b) 2, 3 and 4

(c) 1, 3 and 4 (d) 1, 2, 3 and 4

Ans. (d) : The process of stem cutting is also known as striking or cloning. It is a vegetative mode of propagation of plants. Stems, roots or both can be used to propagate the plants. Bougainvillea, carnations, cocoa and grapes can all be propagated with stem cuttings

95. In the context of organic evolution, the loss of limbs in snakes is explained by the phenomenon of:

(a) Use and disuse of organs.

(b) Adaptation to living in burrows.

(c) Natural selection.

(d) Inheritance of acquired characters.

Ans. (a) : In organic evolution, Lamarck believed that any particular part of the body that is put into more frequent use, has tendency to develop stronger and better while that part of body which is put into less or no use has tendency to gradually disappear. So, loss of limbs in snake is an example of use and disuse of organs.

96. In a bisexual flower, if androecium and gynoecium mature at different times, the phenomenon is known as

(a) Dichogamy (b) Herkogamy

(c) Heterogamy (d) Monogamy

Ans. (a) : In bisexual flower, the production of male and female flower (androecium and gynoecium) mature at different times to avoid self-fertilization. That is called dichogamy.

97. Foot-and-Mouth disease in animals, a current epidemic in some parts of the world, is caused by:

(a) Bacterium (b) Fungus

(c) Protozoan (d) Virus

Ans. (d) : Foot and mouth disease in animals (hoof and mouth disease) is a viral infection affecting cloven hoofed domestic and wild animals. The viruses belong to the same family picornaviridae.

98. When one gene controls two or more different characters simultaneously, the phenomenon is called:

(a) Apomixis (b) Pleiotropy

(c) Polyploidy (d) Polyteny

Ans. (b) : Polyploidy occurs in cells and organisms when there are more than two paired (homologous) set of chromosome found which controls more than one characters simultaneously.

- Apomix is the process of asexual reproduction in which the embryo grows from egg cells without being fertilized.
- Pleiotropy occurs when a single gene influences multiple phenotypic traits.
- Polytene is a giant chromosome found in some two-winged flies.

99. With reference to the human body, consider the following statements:

1. The production of somatotropin goes up when a person exercises.

2. Men's testes produce progesterone.

3. Women's adrenal glands secrete testosterone.

4. Stress causes the adrenals to release very less amount of cortisol than usual.

Which of these statements are correct?

(a) 1, 2, 3 and 4 (b) 1, 2 and 3

(c) 2, 3 and 4 (d) 1 and 4

Ans. (d) : Somatotropin is a growth hormone and exercise is a potent physiological stimulus for growth hormones. Hence 1st statement is correct.

Testes secrete testosterone and female's adrenal gland secrete progesterone. Hence 2nd and 3rd statements are incorrect.

4th statement is correct as stress causes the adrenal glands to release very less amount of cortisol (a steroid) than usual.

ENVIRONMENT AND ECOLOGY

100. The sea coast of which one of the following states has become famous as a nesting place for the giant Olive Ridley turtles from South India?

(a) Goa (b) Gujarat

(c) Orissa (d) Tamil nadu

Ans. (c) : The sea coast of Orissa is famous as a nesting place for giant olive Ridley turtles from South India. Majority of Olive Ridleys turtles nest (in two or three large groups) near Gahirmatha Beach in Odisha. The beach in Odisha is the largest mass nesting place for the Olive Ridley turtles followed by the coasts of Mexico and Costa Rica. In 1991, over 600,000 turtles nested along the coast of Odisha in one week.

101. Among living organisms, which one of the following is the most responsible factor for bringing about the origin of a new species?

(a) Isolation

(b) Mutation

(c) Natural Selection

(d) Sexual Reproduction

Ans. (a) : Origin of new species depends on isolation of gene flow between new species and develop significant genetic divergence.

102. Match List I with List II and select the correct answer using the codes given below the lists:

List I (Mangrove)		List II (State)
A.	Achra Ratnagiri	1. Karnataka
B.	Coondapur	2. Kerala
C.	Pichavaram	3. Andhra Pradesh
D.	Vembanad	4. Maharashtra
		5. Tamil Nadu

	A	B	C	D
(a)	2	1	5	4
(b)	4	5	3	2
(c)	2	5	3	4
(d)	4	1	5	2

Ans. (d) : The correct mangroves match is :

A. Achra Ratnagiri – Maharashtra

B. Coondapur – Karnataka

C. Pichavaram – Tamil Nadu

D. Vembanad – Kerala

103. Which one of the following is monogamous?

(a) Wolf (b) Walrus

(c) Deer (d) Seal

Ans. (a) : The Grey wolf is generally monogamous, with mated pairs usually remaining together for life.

Source :"National Geographic"

CURRENT AFFAIRS

104. Consider the following countries:

1. Angola 2. Colombia

3. Congo 4. Sudan

Which of these countries has/have been suffering from civil war?

(a) 1 only (b) 2 and 3

(c) 4 only (d) 1, 2, 3 and 4

Ans. (d) : All the four countries Angola, Columbia, Congo and Sudan are suffering from civil war.

105. With reference to Indian satellites and their launchers, consider the following statements:

1. All the INSAT-series of satellite were launched abroad.

2. PSLVs were used to launch IRS-series of satellites.

3. India used the indigenously built cryogenic engines for the first time for powering the third stage of GSLV.

4. GSAT, launched in the year 2001, has payloads to demonstrate digital broadcasts and internet services.

Which of these statements are correct?

(a) 1, 2, 3 and 4 (b) 2, 3 and 4

(c) 1, 2 and 4 (d) 1 and 3

Ans. (b) : Statement I is incorrect, Rest statements 2, 3 and 4 are correct about the Indian satellites and their launches.

106. In the year 2001, NASA launched a spacecraft to Mars named:

(a) Mars Climate Orbiter

(b) Mars Global Surveyor

(c) Mars Odyssey

(d) Mars Polar Lander

Ans. (c) : In the year 2001, NASA launched a spacecraft named Mars Odyssey which costed Rs. 40 crore Dollars on 7th April.

107. A World Summit with representation from all the countries will be held in Johannesburg in September 2002 on the subject of:

(a) AIDS control

(b) Global terrorism

(c) Human rights

(d) Sustainable development

Ans. (d) : In September 2002 in Johannesburg "World Conference on Sustainable Development" was held in which nearly 200 countries participated.

108. Berber speaking community, frequently in the news, live in

(a) Afghanistan (b) Algeria

(c) Argentina (d) Australia
