(a) 

(b) 

(c) 

(d) 

Ans. (a) : As all species comes under the male category, so B and C comes under A. Some guitarists are beared, so B and C have some common elements between them.

134. Which of the following pairs is NOT correctly matched?

(a) India's first technicolor film : Jhansi Ki Rani

(b) India's first -3D film : My Dear Kuttichethan

(c) India's first insured film : Tall

(d) India's first actress to win the Bharat Ratna : Meena Kumari

Ans. (d) : Meena Kumari is not the recipient of Bharat Ratna. Indira Gandhi was the first woman recipient of this award. No actress have been awarded Bharat Ratna so far.

135. Match List I with List II and select the correct answer using the code given below the lists:

List I (Dancer)	List II (Dance)
A. Kalamandalam Kshemavathy	1. Kathakali
B. Kottakkal Sivaraman	2. Manipuri
C. Lakshmi Viswanathan	3. Mohiniattam
D. N. Madhabi Devi	4. Bharatnatyam

	A	B	C	D
(a)	1	3	2	4
(b)	3	1	4	2
(c)	1	3	4	2
(d)	3	1	2	4

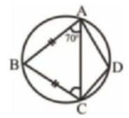

Ans. (b) : The correct match is as follows:
Kalamandalam Kshemavaty – Mohiniattam Kottakkal Sivaraman – kathakali
Lakshmi Vishwanathan – Bharatanatyam
N. Madhabi Devi – Manipuri

136. In the above figure, ABCD is a cyclic quadrilateral, AB = BC and ∠BAC = 70º, then ∠ADC is

(a) 40º (b) 80º

(c) 110º (d) 140º

Ans. (d) :

In ΔABC, AB = BC (Isosceles triangle)

$\therefore \angle BAC = \angle BCA = 70°$

Now, $\angle BAC + \angle ABC + \angle BCA = 180°$

$70° + \angle ABC + 70° = 180°$

$\angle ABC = 180° - 140°$

$= 40°$

As ABCD is a cyclic quadrilateral and sum of opposite angle pair is equal to 180°

$\therefore \angle ADC + \angle ABC = 180°$

$\angle ADC = 180° - 40°$

$= 140°$

137. Match List I with List II and select the correct answer using the codes given below the lists:

List I (Person)	List II (Achievements)
A. Deep Sen Gupta	1. India's youngest International Master in the Sangli International Chess
B. P. Harikrishna	2. The first Indian ever to win a gold in discus in the World Junior Athletic Championship in santiago, 2000
C. Seema Antil	3. Won the title in the Asian Junior Chess Tournament in Mumbai, 2000
D. Tejas Bakre	4. Won the under-12 title in the World Youth Chess Festival in Oropesa, 2000

	A	B	C	D
(a)	4	3	2	1
(b)	2	4	1	3
(c)	4	1	2	3
(d)	2	1	3	4

Ans. (c) : Deep Sen Gupta won the under 12 title in the World Youth Chess Festival in Oropesa, 2000. P. Harikrishna is India's youngest international master in the Sangli International Chess, Tejas Bakre won the title in the Asian chess Tournament in Mumbai 2000.
Seema Punia-Antil was first Indian ever to win a gold in discus throw in the World Junior Athletics championship is Santiago 2000.

138. Match List I with List II select the correct answer using the codes given below the lists:

List I (Person)	List II (Distinguished as)
A. Santosh Yadav	1. T.V. host
B. Oprah Winfrey	2. Journalist
C. Oscar Wilde	3. Mountaineer
D. P. Sainath	4. Dramatist and Author

	A	B	C	D
(a)	3	1	4	2
(b)	1	3	2	4
(c)	3	1	2	4
(d)	1	3	4	2

Ans. (a) :

List I (Person)		List II (Distinguished as)
1. Santosh Yadav	-	Mountaineer
2. Oprah Winfrey	-	T.V. host
3. Oscar Wilde	-	Dramatist and Author
4. P. Sainath	-	Journalist

139. The following table shows the percentage change in the consumption of electricity by five towns? P, Q, R, S, T from 1986 to 1988:

Town	From 1986 to 1987	From 1987 to 1988
P	+ 8	– 18
Q	– 15	+ II
R	+ 6	+ 9
S	– 7	– 5
T	+ 13	– 6

If town T consumed 500,000 units in 1986, how much did it consume in 1988?

(a) 371,00 units (b) 531,100 units

(c) 551,100 units (d) 571,100 units

Ans. (b) : If there are two percentage changes of x% and y%.

then net % change $= x + y + \frac{xy}{100}$

Net % change for T from 1986 to 1988

$13 - 6 - \frac{(13)(6)}{100} = 6.22$

$\therefore$ Consumption of electricity by T in 1988

$= 50,00,00\left(1 + \frac{6.22}{100}\right) = 531100$

140. A person travels from X to Y at a speed of 40 kmph and returns by increasing his speed by 50%. What is his average speed for both the trips?

(a) 36 kmph (b) 45 kmph

(c) 48 kmph (d) 50 kmph

Ans. (c) : Let the distance from x to y = x km

Speed towards y from x = 40 km/hr

time taken $= \frac{x}{40}$

Returning speed from y to x = 40 + (50% of 40)

= 40 + 20 = 60 km/hr

time taken $= \frac{x}{60}$

average speed for complete journey $= \frac{\text{Total distance}}{\text{Total time}}$

$= \frac{2x}{\frac{x}{40} + \frac{x}{60}} = \frac{4800}{100} = 48$ km/hr.

141. Match List I with List II and select the correct answer using the code given below the lists:

List-I (Sports women)	List-II (Sports)
A. Anjali Vedpthak	1. Athletics
B. Mouma Das	2. Gymnastics
C. Neelam Singh	3. Table Tennis
D. Tumpa Debnath	4. Chess

	A	B	C	D
(a)	3	4	2	5
(b)	4	3	1	2
(c)	4	3	2	5
(d)	3	4	1	2

Ans. (c) : Anjali Vedpathak is related to Rifle Shooting, Mouma Das is related to Table Tennis, Neelam Singh is related to Atheletics and Tumpa Debnath is related to Atheletics.

142. The earlier name of WTO was:

(a) UNCTAD (b) GATT

(c) UNIDO (d) OECD

Ans. (b) : GATT – General Agreement on Tariff and Trade. GATT came into force on 1 January 1948 with HQ at Geneva. WTO was set up as a result of aid from 8th round of GATT talks (Uruguay round, 1986-93). WTO was formed on 1 Jan 1995 at Marrakesh, Morocco.

143. Solve the given equations:

$x^2 + y^2 = 34$ $x^4 - y^4 = 544$

The values of x and y are

(a) ± 4, ± 3 (b) ± 5, ± 3

(c) ± 3, ± 5 (d) ± 3, ± 4

Ans. (b) : According to question

$x^2 + y^2 = 34$ .....(1)

and $x^4 - y^4 = 544$

or $(x^2)^2 - (y^2)^2 = 544$

or $(x^2 + y^2)(x^2 - y^2) = 544$ .....(2)

Putting value of $(x^2 + y^2)$ from equation 1 to equation 2

$34 (x^2 - y^2) = 544$

$x^2 - y^2 = \frac{544}{34} = 16$

$x^2 - y^2 = 16$

Now checking it with the given options, only

x = 5 and y = 3 satisfy it.

144. Consider the decadal Census data given below:

Decadal population (in millions)

Year	Population
1961	10.7
1971	14.3
1981	16.2
1991	18.9
