Ans. (c) : No. of women = 1/3 (108) = 36

∴ No. of unmarried women = No of women – No of unmarried women = 36 – 9 = 27

138. The following figure represents times vs. learning curves of two students, Q and R for learning a mathematics lesson

Which one of the following inferences can be drawn from the graph?

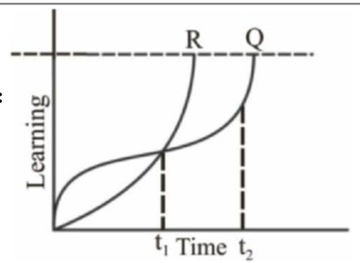

(a) R started slowly in the beginning but go ahead of Q to complete learning the lesson

(b) Q started slowly and finished learning the lesson earlier then R

(c) R was always faster than Q in learning mathematics

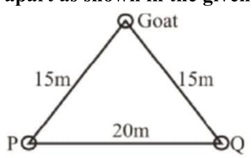

(d) Q was always faster than R in learning mathematics

Ans. (a) :

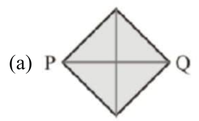

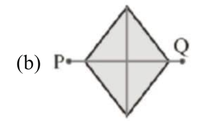

R start slowly in the beginning but go ahead of Q to compete learning the lesson.

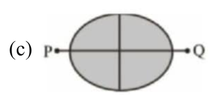

139. A goat is tied to two poles P and Q with ropes that are 15 meters long, P and Q are 20 meters apart as shown in the given diagram:

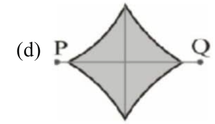

Which one of the following shaded portions indicates the total area over which the goat can graze?

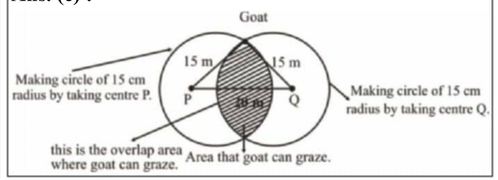

(a) 

(b) 

(c) 

(d) 

Ans. (c) :

140. A person starts from a point A and travels 3 km eastwards to B and then turns left and travels thrice that distance to reach C. He again turns left and travels five times the distance be covered between A and B and reaches his destination D. The shortest distance between the starting point and destination is

(a) 18 km (b) 16 km

(c) 15 km (d) 12 km

Ans. (c) : The movement of the person are as shown in fig.

Clearly AB = 3 km

BC = 3AB = (3×3) KM = 9KM CD = 5AB = (5×3) KM = 15KM

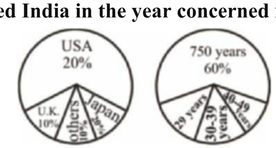

Draw AE ⊥ CD.

Then CE = AB = 3 km and AE = BC = 9 Km DE = (CD-CE) = (15-3) Km = 12 Km.

In Δ AED, AD2 = AE2+DE2 = AD = (92+(12)2) km = 15km

∴ Required distance = AD = 15 Km.

141. The distribution of 1,00,000 tourists who visited India during a particular year is shown in the given charts. Based on this, the number of Japanese tourists below the age of 39 who visited India in the year concerned is

(a) 10,000 (b) 8,000

(c) 6,000 (d) 4,000

Ans. (d) : Tourists from Japan = 20/100 (100000) =20000

% below 39 years = 10 + 10 = 20%

∴ % of Tourists from Japan below 39 years = 20/100 (20000) =4000

142. What is maximum number of pieces of 5cm · 5cm · 10cm cake that can be cut from a big cake of 5cm · 30cm · 30cm size?

(a) 10 (b) 15

(c) 18 (d) 30

Ans. (c) : Maximum number of pieces that can be cut out

= (Volume of cake) / (Volume of Each piece of cake)

= (5 × 30 × 30)/(5 × 5 × 10) = 18

143. Which one of the following statements is true according to 1991 census data?

(a) U.P. has the highest density of population in India

(b) Himachal Pradesh has the highest female to male sex ratio in India

(c) West Bengal has the highest growth rate of population in India

(d) Bihar has the lowest literacy rate in India

Ans. (d) : According to 1991 census data, Bihar has the lowest literacy rate in India i.e, 37.49% (63.82% in 2011).

Directions: The next two items are based on the following table. Study the same carefully and attempt the two items that follow it:

Indicators of development for some Asian countries

Country	Life expectancy at birth (year) 1995	Infant mortality rate (Per 1000 live births) 1996	Adult literacy rate (Percent) 1995
India	62.4	72	52
China	69.2	38	82
Indonesia	64.0	47	84
Malaysia	71.4	11	84
Thailand	69.5	31	94
Korea	71.7	6	98
Philippines	67.4	32	95

144. Which one of the following statements is false?

(a) All countries other than India have over 80% literacy

(b) Malaysia and Korea have life expectancy higher than all other countries

(c) Higher the adult literacy lower is the infant mortality

(d) The life expectancy at birth in India is almost the same as that of Indonesia

Ans. (c) : The false statement is (c), higher the adult literacy lower is the infant morality.

145. A rectangular water tank measures 15 m × 6 m at top and is 10 m deep. It is full of water. If water is drawn out lowering the level by 1 meter, how much of water has been drawn out?

(a) 90,000 litres

(b) 45,000 litres

(c) 4,500 litres

(d) 900 litres

Ans. (a) : Water drawn out = Initial volume of the tank – Final volume of the tank = [15 × 6 × 10 – 15 × 6 × (10 – 1)] = 15 × 6 × (10 – 9) = 90 m^3 = 90000 litres

146. An accurate clock shows 8 O'clock in the morning. Through how many degrees will the hour hand rotate when the clock shows 2 O'clock in the afternoon?

(a) 150º (b) 144º

(c) 168º (d) 180º

Ans. (d) : Angle traced be the hour hand in 6 hours

$= \left(\frac{360}{12} \times 6\right)^\circ$

= 180°

147. The monthly income of Komal and Asha are in the ratio of 4 : 3. Their monthly expenses are in the ratio of 3 : 2. However, both save Rs. 600/- per month. What is their total monthly income?

(a) Rs. 8,400/- (b) Rs. 5,600/-

(c) Rs. 4,200/- (d) Rs. 2,800/-

Ans. (c) : Let monthly income of Komal and Asha be 4x and 3x
