147. In a town 25% families own a phone and 15% own a car. 65% families own neither a phone nor a car. 2000 families own both a car and a phone. Consider the following statements in this regard:

1. 10% families own both a car and a phone

2. 35% families own either a car or a phone

3. 40,000 families live in the town.

Which of the above statements are correct?

(a) 1 and 2
(b) 1 and 3
(c) 2 and 3
(d) 1, 2 and 3

Ans. (c) : ATQ

25% family have phone

15% family have care

and 65% don't have a car or a phone

$\therefore$ percent of family having either phone or care

= 100 – 65 = 35% .....(i)

$\therefore$ percentage of family having both phone and care

(25 + 15) – 35 = 5%

Hence 1st statement is incorrect.

and second statement is correct [from equ^{n}. (i)]

ATQ

5% = 2000 family

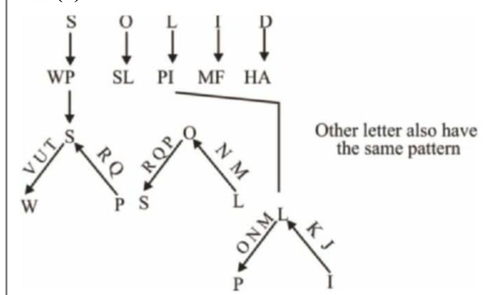

$$\therefore\ 100\% = \frac{2000\times 100}{5} = 40{,}000$$

Hence 3rd statement is also correct.

ANCIENT HISTORY

1. Many of the Greeks, Kushanas and Sakas embraced Buddhism rather than Hinduism because:

(a) Buddhism was in the ascendant at that time
(b) They had renounced the policy of war and violence
(c) Caste-ridden Hinduism did not attract them
(d) Buddhism provided easier access to Indian society

Ans. (c) : Greek, Kushanas and Sakas entered India through North Western Frontier and established their rule or kingdom. They needed legitimacy for their rule for people to accept them as their king. Accepting religion of local area was the best way to achieve legitimacy. Buddhism provided easiest entry in comparison to Hinduism which had strict birth related caste structure. So these rulers embraced Buddhism in order to strengthen their dominance over the local people.
