Codes:

	A	B	C	D
(a)	4	3	2	1
(b)	4	2	3	1
(c)	3	4	2	1
(d)	3	4	1	2

Ans. (a) : Malaria is a mosquito-borne infectious disease of humans and other animals caused by parasitic protozoans belonging to the genus Plasmodium.
Poliomyelitis is a disease caused by infection with the poliovirus. It is a highly infectious viral disease, which mainly affects young children.
Tuberculosis, or TB, is an infectious bacterial disease is caused by Mycobacterium tuberculosis, which most commonly affects the lungs.
Ringworm is a common fungal infection that can cause a red or silvery ring-like rash on the skin. Ringworm commonly affects arms and legs.
So, the correct answer is option A.

91. Hemophilia is a genetic disorder which leads to:

(a) Decrease in hemoglobin level
(b) Rheumatic heart disease
(c) Decrease in W.Bc.
(d) Non-clotting of blood

Ans. (d) : Haemophilia is a bleeding disorder that slows the blood clotting process. People with this condition experience prolonged bleeding or oozing following an injury, surgery, or having a tooth pulled. In severe cases of haemophilia, continuous bleeding occurs after minor trauma or even in the absence of injury (spontaneous bleeding). Serious complications can result from bleeding into the joints, muscles, brain, or other internal organs. Milder forms of haemophilia do not necessarily involve spontaneous bleeding, and the condition may not become apparent until abnormal bleeding occurs following surgery or a serious injury.

ENVIRONMENT AND ECOLOGY

92. A tree species in Mauritius failed to reproduce because of the extinction a fruit-eating bird. Which one of the following was that bird?

(a) Dove (b) Dodo
(c) Condor (d) Skuas

Ans. (b) : The dodo (Raphus cucullatus) is an extinct flightless bird that was endemic to the island of Mauritius, east of Madagascar in the Indian ocean. It became extinct in 14th century from Mauritius because of large-scale hunting. Dodo was helpful in pollinating and propagating seed of this tree species. Subfossil remains show the dodo was about 1 metre (3 ft 3 in) tall and may have weighed 10.6–21.1 kg (23-47 lb) in the wild.

93. Forest areas have been labelled as 1, 2, 3 and 4 in the rough outline map given:
Among these, those which were threatened in 1997 by a serious epidemic include:

(a) Teak forests of 3 and 4
(b) Oaks forests of 1 and sal forest of 2
(c) sal forests of 3
(d) Sandalwood forest

Ans. (c) : Sal forest of Madhya Pradesh indicates '3' in the given India map. In 1997 Sal forest were badly affected by the insects which cause destruction of Sal forest by turning the trees dry.

94. The discovery of Oak flora in 1966 added a new chapter to the history of Indian Sericulture. Which one of the following states is the leading producer of Oak tasar silk?

(a) Assam (b) Bihar
(c) Manipur (d) Orissa

Ans. (a) : The Oak Tasar silk is produced in Assam. The Oak trees were discovered in Assam in 1966 which is used in Sericulture.

95. The water pollution in river is measured by the dissolved amount of

(a) Chlorine (b) Ozone
(c) Nitrogen (d) Oxygen

Ans. (d) : Water pollution in river or any other water body is measured by amount of dissolved oxygen.

96. Estuaries possess district blooms of excessive growth of a pigmented dinofagellates. These blooms are called

(a) Red tides (b) Sea tides
(c) Black tides (d) Sea flowers

Ans. (a) : Red tides occurs when the population of certain kinds of algae known as dinoflagellates explodes, creating what's called an "algal bloom." Scientists sometimes refer to red tides as harmful algal blooms.

97. Consider the following climatic conditions (northen hemisphere):

Months	Temp. °C	Rainfall Cm.
J	3.9	4.7
F	4.4	5.7
M	8.3	8.2
A	14.3	9.2
M	20.0	9.2
J	23.3	17.7
J	27.8	14.5
A	27.8	14.0
S	22.3	12.7
O	18.3	7.0
N	12.2	5.0
D	6.7	3.5

These are most likely to be found in the natural regions of:

(a) China type (b) Equatorial type
(c) Hot desert type (d) Monsoon type

Ans. (a) : This is most likely to be found in the natural region of China type, which is chartacterised by a warm, moist summer and a cool, dry winter. Temperatures strongly modified by maritime influence.

CURRENT AFFAIRS

98. The satellites of which one of the following countries have helped in the preparation of a detailed and complete map of Antarctica?

(a) Canada (b) France
(c) Russia (d) U.S.A.

Ans. (a) : Antarctica is the seventh continent in the world, devoid of population. It is called 'White Continent' due to being covered with snow all around. The continent of Antarctica was discovered in 1820 AD. The 'Queen Maud Range' divides this continent into two parts. Antarctica at the South Pole is the center of many scientific researches and studies. That is why this continent is also called a continent dedicated to science. 'Dakshin Gangotri' and 'Maitri' are research centers in India located in Antarctica. A detailed map of the continent of Antarctica has been created through images transmitted by a Canadian satellite.

99. Nobel Prize in Economics for the year 1997 was awarded for contribution in the area of:

(a) International Economics
(b) Financial Economics
(c) Public Economics
(d) Development Economics

Ans. (b) : The Bank of Sweden Prize in Economic Sciences in Memory of Alfred Nobel 1997 was awarded jointly to Robert C. Merton and Myron S. Scholes "for a new method to determine the value of derivatives". Besides their valuation method, they have made significant contributions to finance economics.

100. World Environment Conference to discuss global warming was held in 1997 in:

(a) Stockholm (b) Rio de Janeiro
(c) Paris (d) Kyoto

Ans. (d) : World Environment Conference 1997 conference was held in Kyoto, Japan. The conference is also known as "Rio+5" conferences on sustainable development". It was a landmark conference sustainable development for on mankind.

101. What is the correct sequence of the following Indian states in descending order of their length of surface roads per 100 km^2 of their area?

1. Haryana 2. Maharashtra
3. Punjab 4. Tamil Nadu

Select the correct answer using the codes given below:

Codes:

(a) 4, 3, 2, 1 (b) 4, 3, 1, 2
(c) 3, 4, 1, 2 (d) 3, 4, 2, 1

Ans. (a) : Arrangement of descending order of the surface roads per 100 sq. km of their area: Tamil Nadu has 158.78 km, Punjab has 127.78 km, Maharashtra has 117.61 km, and Haryana has 63.70 km.

102. The damage to the Spektr Module of the Russian Space Station Mir was due to:

(a) Collision with a soyuz cargo ship
(b) Faulty material design of the Spektr Module
(c) Explosion inside the space station
(d) Collision with an asteroid

Ans. (a) : Due to collision with soyuz cargo ship, the Spektr Module of the Russian space station Mir was damaged.

103. The meeting of G-15 countries held in Malayasia in 1997 was attended by:

(a) 14 member countries
(b) 15 member countries
(c) 16 member countries
(d) 17 member countries

Ans. (c) : The G-15 meet of 1997 was held 3-5th November, 1997 at Qualalmpur in Malaysia. Kenya was admitted as its 16th member but the organisation name will remain G-15.

104. Olympics 2004 is to be held in:

(a) Johannesburg (b) Capetown
(c) Rome (d) Sydney

Ans. (*) : The 2004 Olympic was held in Athens in Greece which is ancient Rome. (Hence none of the given option is correct).
