The places marked A, B, C and D is the map are respectively–

(a) Rift valley region, Chhattisgarh plain, Rain Shadow region and Chota nagpur plateau

(b) Chhattisgarh plain, Chota nagpur plateau, Rift valley region, and Rain shadow region

(c) Rift Valley region, Chhattisgarh plain, chota nagpur plateau and Rain shadow region

(d) Chhattisgarh plain, Rain shadow region, Chota nagpur plateau and Rift valley region

Ans. (c) : Rift valley region, Chhattisgarh plain, Chota Nagpur plateau and Rain shadow region.

- There is further spreading of crust and subsequent erosion deepens the rift. Rivers that flow thorough rift valley in India are: Narmada River, Tapti, Mahi (all flowing west), and Damodar River in Chota Nagpur plateau.
- Chhattisgarh plain: A vast undulating tract, the plain consists of rich rice fields. Cotton and oilseeds are the important commercial crops of the region. Extensive coal deposits and substantial deposits of iron ore, bauxite, manganese, and commercial clays have aided its development.
- The Chota Nagpur Plateau is a plateau in eastern India, which covers much of Jharkhand state as well as adjacent parts of Odisha, West Bengal, Bihar and Chhattisgarh. The Indo-Gangetic plain lies to the north and east of the plateau, and the basin of the Mahanadi River lies to the south.
- A rain shadow is a dry area on the leeward side of a mountainous area. The mountains block the passage of rain-producing weather systems and cast a \"shadow\" of dryness behind them. Eastern Side of Sahyadri ranges on Deccan e.g. Northern Karnataka & Sholapur, Beed, Osmanabad and Vidarbha Plateau of India.

40. Consider the map given below:

The places marked A, B, C and D is the map are respectively known for the cultivation of:

(a) Groundnut, ragi, tobacco and sugarcane

(b) Groundnut, sugarcane, ragi and tobacco

(c) Ragi, sugarcane, groundnut and tobacco

(d) Ragi, groundnut, sugarcane and tobacco

Ans. (b) : The place marked in the given map of India. 'A' refers to Gujarat where groundnut is a major crop. 'B' refers to western part of Maharashtra which is known for sugarcane. 'C' refers to southern part of Orissa and northern part of Andhra Pradesh, where 'Ragi' is cultivated abundantly. 'D' refers Andhra Pradesh and tobacco is cultivated in this area.

41. Which of the following places are known for paper manufacturing industry?

1. Yamunanager 2. Guwahati

3. Shahabad 4. Ballarpur

Choose the correct answer using the codes given below:

(a) 1, 2 and 3

(b) 1, 2 and 4

(c) 1, 3 and 4

(d) 2, 3 and 4

Ans. (c) : Yamuna Nagar, Guwahati and Ballarpur are famous for paper manufacturing industry. Yamuna Nagar is in Haryana, Guwahati is in Assam and Ballarpur is in Maharashtra.

42. The tribal population in Andaman and Nicobar Islands belongs to the:

(a) Australoid race

(b) Caucasoid race

(c) Mongoloid race

(d) Negroid race

Ans. (c) : The tribal population in Andaman and Nicobar Islands particularly the Onge and Jarawa belongs to Negroid race and Great Andaman's and sentinels and shompen and Nicobar belongs to Mongoloid race.

43. The following are the major oilseeds produced in India

1. Sesamum 2. Mustard

3. Groundnut 4. Soyabeen

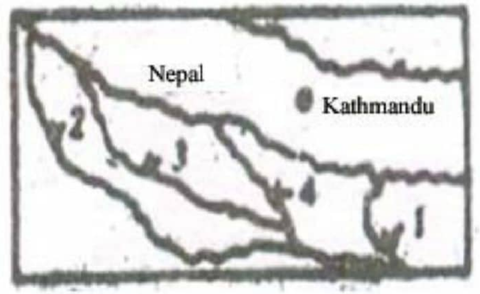

Which one of the following is the correct sequence of the descending order of the quantity of their production?

(a) 1, 2, 3, 4 (b) 3, 2, 4, 1

(c) 2, 4, 3, 1 (d) 4, 3, 2, 1

Ans. (b) : The descending order of production of the oilseed crops as per question in India will be as follows Soyabean, Groundnut, Rye and Mustard and Sesamum.

44. In the map shown in the given figure, rivers labelled as 1, 2, 3 and 4 respectively:

(a) Kosi, Gomati, Ghaghara and Gandak

(b) Kosi, Ganga, Gomati and Ghaghara

(c) Gandak, Ganga, Gomati and Ghaghara

(d) Teesta, Gomati, Ghaghara and Kosi

Ans. (a) : Kosi, Gomati, Ghaghara and Gandak.

45. Match List-I with List-II and select the correct answer:

List-I (Hazardous industries using child labour leading to the filling of a public interest petition in the Supreme Court)	List-II (Located at)
A. Glass Industry	**1. Moradabad**
B. Brassware Industry	**2. Marakpur**
C. State Industry	**3. Ferozabad**
D. Handmade carpet Industry	**4. Mirzapur**

Codes:

	A	B	C	D
(a)	3	1	2	4
(b)	1	3	4	2
(c)	3	1	4	2
(d)	1	3	2	4

Ans. (a) : The correct match for List-I and List-II is mentioned as below:

Glassy Industry	–	Ferozabad
Brassware Industry	–	Moradabad
State Industry	–	Marakpur
Hand made carpet Industry	–	Mirzapur

WORLD GEOGRAPHY

46. About 50% of the world population is concentrated between the latitudes of:

(a) 5°N and 20°N (b) 20°N and 40°N

(c) 40°N and 60°N (d) 20°S and 40°S

Ans. (b) : For the solution of the presented question, pay attention to the map of the world, where you will find that between 20 ° N and 40 ° N, the most populous countries of the world China, India, the countries of North America and Southern Europe are located. About 50% of the world's population resides in this area.

47. "_They are people of yellow complexion, oblique eyes, high check bones, sparse hair and medium height," The reference here is to:

(a) Nordic Aryans (b) Austrics

(c) Negroids (d) Mongoloids

Ans. (d) : Mongloids are inhabitants of northern, eastern and south-eastern Asia. Their eyes has a characteristic fold of skin on the upper lid, hair is lank and straight and the height is medium. The group also includes the Chinese, Japanese, Burmese, Thais, Vietnamese and Malays.

48. The tail of a comet is directed away from the sun because:

(a) As the comet rotates around the sun, the lighter mass of the comet is pushed away due to the centrifugal force alone

(b) As the comet rotates, the lighter mass of the comet is attracted by some star situated in the direction of its tail

(c) The radiation emitted by the sun exerts a radial pressure on the comet throwing its tail away from the sun

(d) The tail of the comet always exists in the same orientation

Ans. (c) : Comets are found in the outer margin made up of dust particles, gas, ice etc. They revolve around the Sun. The head of a comet is formed by the evaporation of the material in the part located towards the Sun as it approaches the Sun. The radiation emitted by the Sun exerts a pressure on the comet, so that its tail is always away from the Sun. Hellbop, Forbes, Haley, Temple-1, etc. are examples of orbiters. Halley's Comet
