in 60 minutes = 360^0

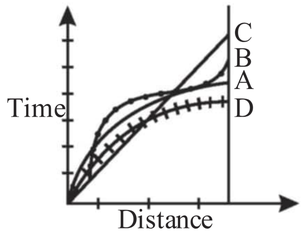

So, angle made by a minute hand

$$\text{in a minute} = \frac{360^0}{60} = 6^0$$

So, in a period of 2 hours 20 minutes the minute hand will move over

$$= 6 \times 140^0 = 840^0$$

145. Distance time graph in respect of a race among four persons is shown in the given figure. Consider the following statements in this regard:

1. 'A' stood first in the race
2. 'C' let all the way
3. 'D' ran faster than other in later part of the race of these statements

(a) 1 and 3 are false and 2 is true.
(b) 1 and 2 are false and 3 is true.
(c) 1 and 3 are true and 2 is false.
(d) 1 is true and 2 and 3 are false.

Ans. (b): 'A' never stood 1st in the race, it was 'D' who stood 1st. From the graph it can be seen that 'C' do not lead all the way. While 'D' after starting slower, ran faster than others in the later part of the race.

146. If the price of television set is increased by 25%, then by what percentage should the new price be reduced to bring the price back to the original level?

(a) 15%
(b) 25%
(c) 20%
(d) 30%

Ans. (c): Let the original price be x.

Increased price = x(1 + 25/100) = 5x/4

Reduction in price to bring it back to its original value

$$= \frac{5x}{4} - x = \frac{x}{4}$$

$$\% \text{ Reduction} = \frac{x/4}{5x/4} \times 100 = 20\%$$

147. If $A = x^2 - y^2$, B = 20 and x + y = 10, then

(a) A is grater than B
(b) B is grater than A
(c) A is equal to B
(d) It is not possible to compare A and B as the data provided is inadequate

Ans. (d): $A = x^2 - y^2 = (x + y)(x - y) = 10(x - y)$

B = 20

Now, it is not possible to compare A and B, as the value of x and y is not known.

148. When the frequency distribution is normal:

(a) median, mode and mean are all difference from one another
(b) mean, mode and median are identical
(c) mean is greater than mode
(d) mean is greater than median

Ans. (b): When frequency distribution is normal mean, median and mode are identical.

149. According to ancient Indian cosmogonic ideas the sequential order of the cycle of four acrons (yugas) is:

(a) Dwapara, Krita, Treta and Kali
(b) Krita, Dwapara, Treta and Kali
(c) Krita, Treta, Dwapara and Kali
(d) Treta, Dwapara, Kali and Krita

Ans. (c): A complete Yuga starts with the Satya Yuga (Krita), Via Treta Yuga and Dwapara Yuga into a Kali Yuga.

150. The offending substance in the liquor tragedies leading to blindness etc is-

(a) ethyl alcohol
(b) amyl alcohol
(c) benzyl alcohol
(d) methyl alcohol

Ans. (d): Methyl alcohol is very dangerous and may be fatal or cause blindness if swallowed. Harmful, if inhaled or absorbed through skin. It cannot be made non poisonous some other harmful effects are results into irritation of skin, eyes, and respiratory track.

UNION PUBLIC SERVICE COMMISSION

Civil Services (Preliminary Exam) - 1995

GENERAL STUDIES : PAPER-I

Time: 2 hours **Maximum Number: 200**

ANCIENT HISTORY

1. The word 'Hindu' as reference to the people of Hind (India) was first used by

(a) the Greeks
(b) the Romans
(c) the Chinese
(d) the Arabs

Ans. (d) : The word 'Hindu' originates from the Sanskrit word for river, Sindhu. The Indus River running through northwest India into Pakistan received its names from the sanskrit term sindhu. The Persian designated the land around the river as Hindu, a mispronunciation of the Sanskrit sindhu. Later Arab people influenced by Persian people started calling Hindu as a reference to the people of Hindi (India).

2. Who among the following was a Brahmavadini who composed some hymns of the Vedas?

(a) Lopamudra (b) Gargi
(c) Leelavati (d) Savitri

Ans. (a) : In the Rig Veda, most hymns are composed by male sages. But there are a few by women, the rishikas, some independent and others wives of sages. Lopamudra, Vishwawara, Nivavari and Sikata were important women sages.
Lopamudra is the wife of Agastya and both compose hymns. In her hymn, she expresses her sexual longing and asks him to stop his rituals and focus on her. Commentators equate Lopamudra with Rati, goddess of pleasure.

3. The concept of Anuvrata was advocated by:

(a) Mahayana Buddhism
(b) Hinayana Buddhism
(c) Jainism
(d) The Lokayata school

Ans. (c) : The anuvrata was advocated by Jainism. The anuvratas are vows to abstain from violence, falsehood, and stealing; to be content with one's own wife; and to limit one's possessions. The other vows are supplementary and meant to strengthen and protect the anuvratas.

4. The name by which Asoka is generally referred to in his inscriptions is:

(a) Chakravarti (b) Dharmadeva
(c) Dharmakirti (d) Priyadarsi

Ans. (d) : The association of "Devanampriya Priyadarsin" with Ashoka was reinforced through various inscriptions, and especially confirmed in the Minor Rock Edict inscription discovered in Maski.
The title "Priyadarsin" is often associated with the title "Devanampriya" ("Beloved of the Gods").

5. The term Yavanapriya, mentioned in ancient Sanskrit texts, denoted:

(a) A fine variety of Indian muslin
(b) Ivory
(c) Damsels sent to the Greek court for dance performance
(d) Pepper

Ans. (d) : Pepper [kali mirch] was one of the most requiradable thing imported by greek trader in ancient India tradition, so in Sanskrit literature it is denoted as Yavanpriya.

6. Zero was invented by:

(a) Aryabhata (b) Varahamihira
(c) Bhaskara I (d) an unknown Indian

Ans. (d) : Zero was invented by an unknown Indian Brahmgupta. The first modern equivalent of numeral zero comes from a Hindu astronomer and mathematician Brahmagupta in 628. His symbol to depict the numeral was a dot underneath a number.

7. Match List I with List II and select the correct answer by using the codes given below the lists.

List I (Eras)	List II (Reckoned from)
I. Vikrama era	(A) 3102 B.C.
II. Saka era	(B) 320 A.D.
III. Gupta era	(C) 78 A.D.
IV. Kali era	(D) 58 B.C.
	(E) 248 A.D.

Codes:

(a) IB, IID, IIIE, IVA
(b) IA, IIC, IIIB, IVD
(c) ID, IIE, IIIB, IVC
(d) ID, IIC, IIIB, IVA
