In 1920, as a sign of protest, Gandhi returned the Kaiser-e-Hind medal which was awarded to him by the British Empire. One of the reasons for this act was the massacre of unarmed and non-violent protesters at Jallianwala Bagh in Amritsar, India, on 13th April 1919.

26. Which one of the following statements does correctly defines the term 'drain theory' as propounded by Dadabhai Naoroji?

(a) That the resources of the country were being utilised in the interest of Britain.
(b) That a part of India's national wealth or total annual product was being exported to Britain for which India got no material returns.
(c) That the British Industrialists were being given an opportunity to invest in India under the protection of the imperial power.
(d) That the British goods were being imported to the country making it poorer day by day.

Ans. (b) : Dadabhai Naoroji was the first man to say that internal factors were not the reasons of poverty in India but poverty was caused by the colonial rule that was draining the wealth and prosperity of India. In 1867, Dadabhai Naoroji put forward the 'drain of wealth' theory in which he stated that the Britain was completely draining India. He mentioned this theory in his book Poverty and Un-British Rule in India, published in 1901. Further in his book, he stated the loss of 200-300 million pounds of revenue to Britain. Dadabhai Naoroji considered it as a major evil of British in India.

Dadabhai Naoroji gave six factors that caused external drain. These are:

1. External rule and administration in India.
2. Funds and labour needed for economic development was brought in by immigrants but India did not draw immigrants.
3. All the civil administration and army expenses of Britain were paid by India.
4. India was bearing the burden of territory building both inside and outside India.
5. India was further exploited by opening the country to free trade.
6. Major earners in India during British rule were foreigners. The money they earned was never invested in India to buy anything. Moreover they left India with that money.

The drain of wealth was the portion of India's wealth and economy that was not available to Indians for consumption, it was exported to Britain.

27. What is the correct chronological sequence of the following stages in the political life of Mahatma Gandhi?

I. Champaran
II. Ahmedabad Mill Strike
III. Kheda
IV. Non-cooperation Movement.

Choose the answer from the codes given below:

Codes:

(a) II, IV, III, I (b) I, II, III, IV
(c) IV, III, II, I (d) III, IV, II, I

Ans. (b) : Champaran Movement (1917)

The Champaran Movement in 1917 was the first Satyagraha movement inspired by Gandhi and a major revolt in the Indian Independence Movement. Farmers of Bihar were protesting against the farming of indigo with barely any payment for it. The farmers approached to Mahatma Gandhi when he returned to India from South Africa in 1915. They wanted Mahatma Gandhi to use the same methods that he had used in South Africa to organize mass uprisings by people to protest against injustice.

Ahmedabad Mill Strike (Feb -March, 1918)

In Ahmedabad there were many textile mills. Prices had gone up and the mill workers were demanding higher wages. The mill owners did not agree. Gandhi sympathized with the workers and took up their cause. He launched a struggle and resorted to peaceful resistance. The workers proudly followed Gandhi and pledged their full support to him. They paraded the streets with large banners, and said they would not go back to work until a settlement had been reached.

Kheda Movement (March - June, 1918)

The Kheda Movement of 1918 was a major revolt in the Indian independence movement. The movement was started in the Kheda district of Gujarat by the Mahatma Gandhi during the period of the British Raj. People of Kheda were unable to pay the high taxes levied by the British due to crop failure and a plague epidemic.

Therefore, Mahatma Gandhi organised this movement to support the peasants of Kheda district.

Non-cooperation Movement (1920)

The Non-cooperation movement was launched on 1st August, 1920 by Mahatma Gandhi. Following the Rowlatt Act of 17th March, 1919, and the Jallian Wala Bagh massacre of 13th April, 1919, Indian National Congress withdrew its support for British reforms. Mahatma Gandhi launches the Non-cooperation movement with the aim of self-governance and obtaining full independence. His main motive was to establish non-cooperation, non-violence and made this non-violent movement as his weapons against Britishers.

28. Mahatma Gandhi was referred to as the 'Father of the nation' first by:

(a) Jawaharlal Nehru
(b) Vallabhbhai Patel
(c) C. Rajagopalachari
(d) Subhash Chandra Bose

Ans. (d) : The title of Father of the Nation was given to the Mahatma by Netaji Subhash Chandra Bose, who in his address on Singapore Radio on 6th July, 1944 had addressed Mahatma Gandhi as Father of the Nation.

GEOGRAPHY

29. Which among the following pairs of places had most marked difference in total rainfall per annum even though located approximately along the same latitude?

(a) Bangalore and Madras
(b) Bombay and Visakhapatnam
(c) Ajmer and Shillong
(d) Nagpur and Calcutta

Ans. (c) : Ajmer and Shillong have most marked difference in total rainfall per annum even though located approximately along the same latitude. There is not much rainfall in Ajmer all year long. The average annual temperature is 24.7° C in Ajmer. The average annual rainfall is 557 mm. The average annual temperature in Shillong is 17.1° C. Precipitation here averages 3385 mm.

30. In Mizoram, the settlement pattern is mostly of 'linear type' along the ridges, because

(a) The valleys are cooler than the ridges
(b) Accessibility is easier on the ridge tops
(c) The ridges are cooler than the valleys
(d) The valleys are densely forested

Ans. (a) : A valley is an elongated depression in the landscape that is formed by the action of water (V-shaped) or carved out by glaciers (U-shaped). A ridge is a landform feature characterized by a continuous elevational crest with sloping sides.

In Mizoram, the settlement pattern is mostly of 'linear type' along the ridges, because the valleys are cooler than the ridge.

31. According to the ancient Indian geographical concept, 'Bharatvarsha' was a part of:

(a) Pushkaradweepa (b) Jambudweepa
(c) Krauncha dweepa (d) Kushdweepa

Ans. (b) : The geographical area and ancient name of Greater India in Ancient Indian History. The term Jambudweepa is used by Ashoka perhaps to represent his realm in 3rd century BC, same terminology is then repeated in subsequent inscriptions for instance in Mysorean inscription from the tenth century AD which also describes the region, presumably Ancient India, as Jambudweepa .

Its name is said to derive from a Jambu tree (another name for the Indian Blackberry). The river so formed is called Jambunadi (Jambu river) and flows through Jambudweepa , whose inhabitants drink its water. Insular continent Jambudweepa is said to comprise nine varshas (zones) and eight significant parvatas (mountains).

32. Consider the map given below

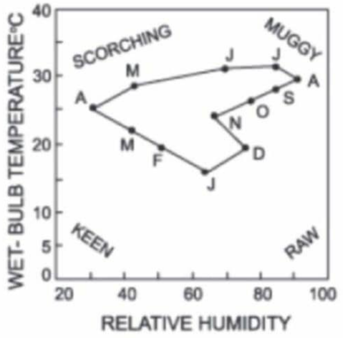

The mean annual rainfall in the shaded parts of India varies from

(a) 100 to 150 cm (b) 150 to 200 cm
(c) 200 to 250 cm (d) 250 to 300 cm

Ans. (a) : From given Map it is clear that the range of rainfall of shaded region is around 100-150 cm.

33. Consider the Climograph given below:

The above climograph relates to

(a) Northwestern region of India
(b) Southern region of India
(c) Mid-central region of India
(d) Northeastern region of India

Ans. (d) : The above mentioned climography refers to North -Eastern region of India.

34. A rainy day, as defined by the Indian Meteorological department, is a day when the rainfall at a point received is:

(a) 0.5 mm to 1 mm in 24 hours
(b) 1.1 mm to 1.5 mm in 24 hours
(c) 1.6 mm to 2 mm in 24 hours
(d) Above 2.5 mm in 24 hours

Ans.(d) : According to Indian Meteorological Department (IMD), a rainy day has been defined as a day with rainfall of 2.5 mm or more rainfall. IMD further defines that rainfall for a station is called heavy if it is greater than 650 mm and very heavy if it is greater than 1300 mm.
