(a) B
(b) A
(c) B and A
(d) Impossible to tell

Ans. (b)

I. $\overline{A}$ $\overline{B}$ $\overline{C}$ $\overline{D}$

or × ×

II. $\overline{D}$ $\overline{C}$ $\overline{A}$ $\overline{B}$

× ×

$\therefore$ $\overline{D}$ $\overline{A}$ $\overline{B}$ $\overline{C}$

A is occupying seat adjacent D.

46. Six books are labelled A,B,C,D, E and F and are placed side by side. Books B,C,E and F have green covers while others have yellow covers, Books A, B and D are new while the restare old volumes. Books A, B and C are law reports while the rest are medical extracts. Which two books are old medical extracts and he green covers ?

(a) B and C (b) E and F
(c) C and E (d) C and F

Ans. (b)

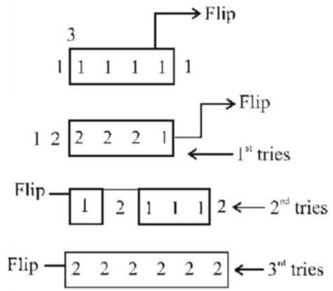

Book	Green	Yellow	New	Old	Law reports	Medical extracts
A		√	√		√	
B	√		√		√	
C	√			√	√	
D		√	√			√
E	√			√		√
F	√			√		√

Hence, the required books E and F.

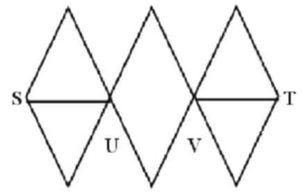

47. Six identical cards are placed on a table. Each card has number '1' marked on one side and number '2' marked on its other side. All the six cards are placed in such a manner that the number '1' is on the upper side. In one try, exactly four (neither more nor less) cards are turned upside down. In how many least number of tries can the cards be turned upside down such that all the six cards show number '2' on the upper side ?

(a) 3
(b) 5
(c) 7
(d) This cannot be achieved

Ans. (a) The right option is (a) 3 tries

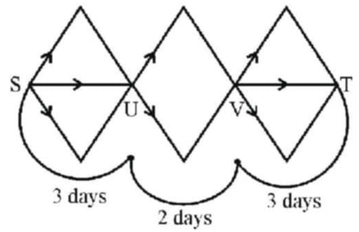

48. With reference to the figure given below number of different routes from S without retracing from U and or V, is .

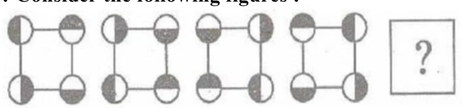

(a) 3 (b) 6 (c) 9 (d) 18

Ans. (d)

The number of different routes = 3 × 2 × 3 = 18

49. Consider the following figures :

Change in positions of beads in the four figures avove follows a sequences. Following the same sequence, Which of the figures below should appear as the fifth figure above ?

(a) 
(b) 
(c) 
(d) 

Ans. (b) The position of the beads in each figure are rotating by 180º and 90º respectively.

50. ''Price is not the same thing as value, Suppose that on a day the price of everything viz ., coal , bread, postage stamps, a day's labour, the rent of houses, etc. Were to double. Prices then would certainly rise, but-values of all things except one would not.''

The writer wants to say that if prices of all things were doubled

(a) the values of al things would remain constant.
(b) the values of the things sold would be doubled.
(c) the values of things bought would be halved.
(d) the value of money only would be halved.

Ans. (d) Option (a) and (b) can be eliminated because it can be understood from the statement that value would not remain constant and value would not get doubled. Option (c) can be eliminated because value of things does not depend on its price.
Option (d) is correct because when prices and doubled, the value of money becomes half. One can buy half the thing with same amount of money.
Hence, option (d) is the correct answer.

51. The letters L, M, N, O, P, Q, R, S and T in their order the substituted by nine integers 1 to 9 but not in that order 4 is assigned to P. The difference between P and T is 5. The difference between N and T is 3.

What is the integer assigned to N ?

(a) 7 (b) 5
(c) 4 (d) 6

Ans. (d)

L	M	N	O	P	Q	R	S	T
		6		4				9

The integer assigned to N is 6.

52. Four persons, Alok, Bhupesh, Chander and Dinesh have a total of Rs. 100 among themselves. Alok and Bhupesh between them have as much money as Chander and Dinesh between them, but Alok has more money than Bhupesh; and Chander has only half the money that Dinesh has. Alok has in fact Rs. 5 more than Dinesh has. Who has the maximum amount of money ?

(a) Alok
(b) Bhupesh
(c) Chander
(d) Dinesh

Ans. (a)

Chander → x
Dinesh → $2x$
Bhupesh < Alok
Alok → $2x + 5$

Alok has the maximum amount of money.

53. In a row 'A' is in the 11th Position from the left and 'B' is in the 10th position from the right. If 'A' and 'B' interchange, then 'A' becomes 18th from the left. How many persons are there in the row other than 'A' and 'B' ?

(a) 27 (b) 26
(c) 25 (d) 24

Ans. (c) According to question total number of persons
= 18 + 10 – 1 = 27
Hence, 25 persons are there in the row other than 'A' and 'B'.

54. If the 3rd day of a month is Monday, which one of the following will be the fifth day from 21st of this month ?

(a) Monday (b) Tuesday
(c) Wednesday (d) Friday

Ans. (c) ∵ The 3rd day of a month is Monday and the date of the fifth day from 21st = 26th day of month
∴ 3 + 7 + 7 + 7 = 24th day of month
∴ 24th of day is Monday
then 26th of day will be Wednesday.

BASIC NUMERICAL ABILITY

55. Five persons fire bullets at the target at an interval of 6,7, 8, 9 and 12 seconds respectively . The number of times they would fire the bullets together at the target in an hour is/

(a) 6 (b) 7
(c) 8 (d) 9

Ans. (b) The L.C.M. of 6, 7, 8, 9 and 12 = 504

for required number = $\frac{60 \times 60}{504}$

= 7.14 times

Hence, the bullets together at the target in an hour = 7 times.

Note :- According to UPSC both option (b/c) are correct.

56. Assume that

1. the hour and minute hands of a clock move without jerking.
2. the clock hows a time between 8 'o'clock and 9 'o'clock.
3. the two hands of th clock are one above the other.
