Task	Case-1	Case-2
1	Two ways (4/5)	Two ways (3/5)
2	3	4
3	Three ways	Three ways
4	Two ways	Two ways
5	One way	One way

In case I, the number of ways are = 2 × 3 × 2 × 1 = 12
In case II, the number of ways are = 2 × 3 × 2 × 1 = 12
Total number of ways = 12 + 12 = 24
Hence, there are 24 ways to do the assignments.

Directions for the following 2 (two) items :

Read the following passage and answer the 2 (two) items that follow :

A, B, C, D, E and F are cousins. No two cousins are of the same age, but all have birthdays on the same day of the same month. The youngest is 17 years old and the oldest E is 22 years old. F is somewhere between B and D is age. A is older than B. C is older than D.A. is one year older than C.

60. Which one of the following is possible?
(a) D is 20 years old (b) F is 18 years old
(c) F is 19 years old (d) F is 20 years old

Ans. (b) :

E	A	C	D	F	B
22	21	20	19	18	17

Means

E	A	C	B	F	D
22	21	20	19	18	17

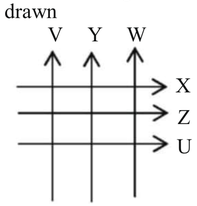

∴ The correct answer is option (b).

61. What is the number of logically possible orders of all six cousins in terms of increasing age?
(a) 1 (b) 2
(c) 3 (d) 4

Ans. (b) : Based on increasing age of all six cousins, it in logically possible to place them in 2 sequences as shown in the above explanation.

62. In a plane, line X is perpendicular to line Y and parallel to line Z; line U is perpendicular to both lines V and W; line X is perpendicular to line V. Which one of the following statements is correct?
(a) Z, U and W are parallel.
(b) X, V and Y are parallel.
(c) Z, V and U are all perpendicular to W.
(d) Y, V and W are parallel.

Ans. (d) : From the given statements, following graph can be drawn

∴ The correct answer is option (d).

63. A cow costs more than 4 goats but less than 5 goats. If a goat costs between ₹ 600 and ₹ 800, which of the following is a *most valid conclusion*?
(a) A cow costs more than ₹ 2,500
(b) A cow costs less than ₹ 3,600
(c) A cow costs between ₹ 2,600 and ₹ 3,800
(d) A cow costs between ₹ 2,400 and ₹ 4,000

Ans. (d) : Let 'g' be the cost of goats
4g < Cow < 5g
Now, given a goat price = ₹ 600
2400 < Cow < 3000 ……..(i)
Given, a goat price = ₹800
3200 < Cow < 4000……(ii)
Hence, it can be seen that from above equations that coast of cow is between
₹ 2400 and ₹ 4000.

64. If A runs less fast than B, and B runs as fast but not faster than C; then, as compared to A, C runs
(a) slower than A
(b) faster than A
(c) with same speed as A
(d) Given data is not sufficient to determine

Ans. (b) :
B is faster than A.
C has same speed as A or more than that.
∴ The correct answer is option (b).

65. Each of A, B, C and D has ₹ 100. A pays ₹ 20 to B, who pays ₹ 10 to C, who gets ₹ 30 from D. In this context, which one of the following statements is not correct?
(a) C is the richest.
(b) D is the poorest.
(c) C has more than what A and D have together.
(d) B is richer than D.

Ans. (c) :

	A	B	C	D
	100	100	100	100
(i)	80	120	100	100
(ii)	80	110	110	100
(iii)	80	110	140	70

∴ The correct answer is option (c).

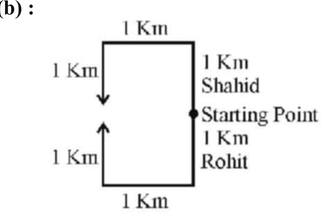

66. Examine the following statements :
1. Lady's finger is tastier than cabbage.
2. Cauliflower is tastier than lady's finger.
3. Cabbage is not tastier than peas.

The conclusion that can be drawn from these statements is that
(a) peas are as tasty as lady's finger.
(b) peas are as tasty as cauliflower and lady's finger.
(c) cabbage is the least tasty of the four vegetables.
(d) cauliflower is tastier than cabbage.

Ans. (d) :
1. Lady finger > Cabbage
2. Cauliflower > Lady finger > Cabbage
3. Cabbage ≤ Peas
∴ It is clear that cauliflower is tastier than cabbage. The correct answer is option (d).

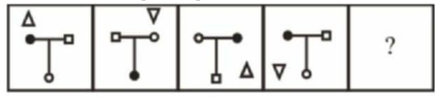

67. Shahid and Rohit start from the same point in opposite directions. After each 1 km, Shahid always turns left and Rohit always turns right. Which of the following statements is correct?
(a) After both have travelled 2 km, the distance between them is 4 km.
(b) They meet after each has travelled 3 km.
(c) They meet for the first time after each has travelled 4 km.
(d) They go on without ever meeting again.

Ans. (b) :

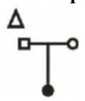

∴It is clear from the figure that option (b) is the correct answer.

68. Consider the figures given below :

To fit the question mark, the correct answer is

(a) 

(b) 

(c) 

(d) 

Ans. (a) : The triangle is rotating clockwise and reverse, while the rest of the images in the figure - •, , O are rotating anti-clockwise.

69. Consider the following matrix :

3	8	10	2	?	1
6	56	90	2	20	0

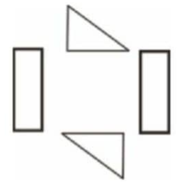

What is the missing number at `?' in the matrix?
(a) 5 (b) 0
(c) 7 (d) 3

Ans. (a) :
$3^2 - 3 = 6$
$8^2 - 8 = 56$
$10^2 - 10 = 90$
$2^2 - 2 = 2$
$5^2 - 5 = 20$
$1^2 - 1 = 0$
∴ The correct answer is option (a).

70. What is the missing number `X' of the series 7, X, 21, 31, 43?
(a) 11 (b) 12
(c) 13 (d) 14

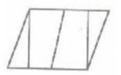

Ans. (c) : The series will be-
$7 \xrightarrow{+6} 13 \xrightarrow{+8} 21 \xrightarrow{+10} 31 \xrightarrow{+12} 43$
∴ The correct answer is option (c)

71. Four cardboard pieces of specific shapes are shown in the following figure :

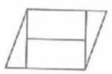

Which one of the following figures given can be formed by joining these pieces together?

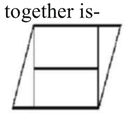

(a) 

(b) 

(c) 

(d) 

Ans. (d) : The following figure can be formed by joining these pieces together is-

72. In a test, a candidate attempted only 8 questions and secured 50% marks in each of the questions. If he obtained a total of 40% in the test and all questions in the test carried equal marks, how many questions were there in the test?
(a) 8 (b) 10
(c) 15 (d) 16
