Q= (50 + 40)
Q = 90
Hence,
from condition (I), P = 92
Q = 90
$\boxed{P > Q}$
Again,
Condition (II)
$\because$ A > B
A = 100, B = 50
then P = (40% of A) + (65% of B)

$$P = \left(\frac{40}{100}\times 100\right) + \left(\frac{65}{100}\times 50\right)$$

P = 40 + 32.5
$\boxed{P = 72.5}$
and Q = (50% of A + 50% of B)

$$Q = \left(\frac{50}{100}\times 100 + \frac{50}{100}\times 50\right)$$

= 50 + 25
$\boxed{Q = 75}$
Hence, from condition (II)
P = 72.5
Q = 75
$\because$ $\boxed{Q > P}$
Thus,
None of above can be concluded with certainty.

40. Consider the given statement and the two conclusions that follow :
Statement : Morning walk is good for health.
Conclusions :
1. All healthy people go for morning walk.
2. Morning walk is essential for maintaining good health.

What is/are the valid conclusion/ conclusions?
(a) 1 only
(b) 2 only
(c) Both 1 and 2
(d) Neither 1 nor 2

Ans. (d) : Since the given statement "Morning walk is good for health" does not means that all healthy people go for morning walk and morning walk is essential for maintaining good health.
Hence, Neither 1 nor 2 conclusion is valid.

41. Six boys A, B, C, D, E and F play a game of cards. Each has a pack of 10 cards. F borrows 2 cards from A and gives away 5 to C who in turn gives 3 to B while B gives 6 to D who passes 1 to E. Then the number of cards possessed by D and E is equal to the number of cards possessed by
(a) A, B and C
(b) B, C and F
(c) A, B and F
(d) A, C and F

Ans. (b) :
Boys $\Rightarrow$

A	B	C	D	E	F
10	10	10	10	10	10
−2	+3	+5	+6	+1	+2
8	−6	−3	−1	11	−5
	7	12	15		7

$\therefore$ D + E = 15 + 11 $\Rightarrow$ 26
by option (b)
B + C + f = 7 + 12 + 7
= 26

42. In a test, Randhir obtained more marks than the total marks obtained by Kunal and Debu. The total marks obtained by Kunal and Shankar are more than those of Randhir. Sonal obtained more marks than Shankar. Neha obtained more marks than Randhir. Who amongst them obtained highest marks?
(a) Randhir
(b) Neha
(c) Sonal
(d) Data are inadequate

Ans. (d) :
Randhir > Kunal + Debu……(i)
Kunal + Shankar > Randhir……..(i)
from eq^n (i) & (ii)
Randhir + Kunal + Shankar > Kunal + Debu + Randhir
$\boxed{\text{Shankar} > \text{Debu}} - (\text{iii})$
and $\boxed{\text{Sonal} > \text{Shankar}} - (\text{iv})$
from eq^n (iii) & (iv)
$\boxed{\text{Sonal} > \text{Shankar} > \text{Debu}} - (\text{v})$
and $\boxed{\text{Neha} > \text{Randhir}} - (\text{vi})$
So the data are inadequate for who obtained highest marks.

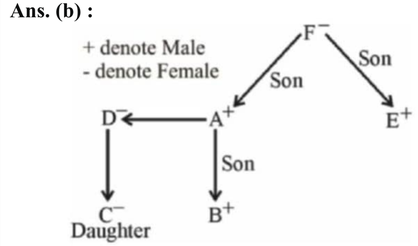

43. Examine the following statements :
1. All colours are pleasant
2. Some colours are pleasant
3. No colour is pleasant
4. Some colours are not pleasant.

Given that statement 4 is true, what can be definitely concluded?
(a) 1 and 2 are true.
(b) 3 is true.
(c) 2 is false.
(d) 1 is false.

Ans. (d) : If statement 4, "Some colours are not pleasant" is true, then statement 1, "All colours are pleasant" is definitely false.

44. Consider the following relationships among members of a family of six persons A, B, C, D, E and F :
1. The number of males equals that of females.
2. A and E are sons of F.
3. D is the mother of two, one boy and one girl.
4. B is the son of A.
5. There is only one married couple in the family at present.

Which one of the following inferences can be drawn from the above?
(a) A, B and C are all females.
(b) A is the husband of D.
(c) E and F are children of D.
(d) D is the daughter of F.

Ans. (b) :

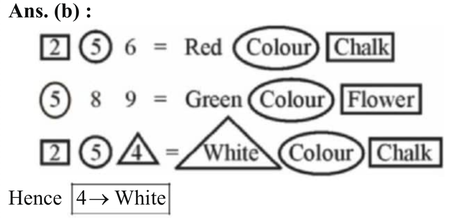

+ = Male
– = Female
$\because$ There s only one married couple in the family at present and B, A and E are males and C, D and F are females.
Hence "A is the husband of D"

45. Consider the following :
A, B, C, D, E, F, G and H are standing in a row facing North.
B is not neighbour of G.
F is to the immediate right of G and neighbour of E.
G is not at the extreme end.
A is sixth to the left of E.
H is sixth to the right of C.
Which one of the following is correct in respect of the above?
(a) C is to the immediate left of A.
(b) D is immediate neighbour of B and F.
(c) G is to the immediate right of D.
(d) A and E are at the extreme ends.

Ans. (c) :

Hence, "G is to the immediate right of D"

46. In a certain code, '256' means 'red colour chalk', '589' means 'green colour flower' and '254' means 'white colour chalk'. The digit in the code that indicates 'white' is
(a) 2 (b) 4 (c) 5 (d) 8

Ans. (b) :

Hence $\boxed{4 \rightarrow \text{White}}$

Directions for the following 3 (three) items: Consider the given information and answer the three items that follow.
A, B, C, D, E, F and G are Lecturers from different cities—Hyderabad, Delhi, Shillong, Kanpur, Chennai, Mumbai and Srinagar (not necessarily in the same order) who participated in a conference. Each one of them is specialized in a different subject, viz., Economics, Commerce, History, Sociology, Geography, Mathematics and Statistics (not necessarily in the same order). Further
1. Lecturer from Kanpur is specialized in Geography
2. Lecturer D is from Shillong
3. Lecturer C from Delhi is specialized in Sociology
4. Lecturer B is specialized in neither History nor Mathematics
5. Lecturer A who is specialized in Economics does not belong to Hyderabad
6. Lecturer F who is specialized in Commerce belongs to Srinagar
7. Lecturer G who is specialized in Statistics belongs to Chennai

47. Who is specialized in Geography?
(a) B
(b) D
(c) E
(d) Cannot be determined as data are inadequate

Ans. (a) :
A → Mumbai → Economics
B → Kanpur → Geography
C → Delhi → Sociology
D → Shillong → History
E → Hyderabad → Mathematics
F → Srinagar → Commerce
G → Chennai → Statistics
Hence,
B is specialized in Geography.

48. To which city does the Lecturer specialized in Economics belong?
(a) Hyderabad
(b) Mumbai
(c) Neither Hyderabad nor Mumbai
(d) Cannot be determined as data are inadequate

Ans. (b) :
The lecturer specialized in economics belongs to Mumbai.

49. Who of the following belongs to Hyderabad?
(a) B
(b) E
(c) Neither B nor E
(d) Cannot be determined as data are inadequate

Ans. (b) : "E" belongs to Hyderabad.

50. In a school, there are five teachers A, B, C, D and E. A and B teach Hindi and English. C and B teach English and Geography. D and A teach Mathematics and Hindi. E and B teach History and French. Who teaches maximum numb, of subjects?
(a) A (b) B
(c) D (d) E
