Ans : (c)
Total participants= 100

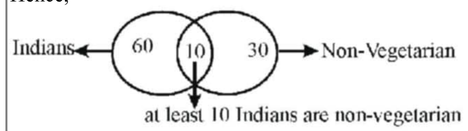

Again,

Total participants= 100

Hence,

Hence, statements I and II are true.

51. All members of a club went to Mumbai and stayed in a hotel. On the first day, 80% went for shopping and 50% went for sightseeing, whereas 10% took rest in the hotel. Which of the following conclusion (s) can be drawn from the above data ?

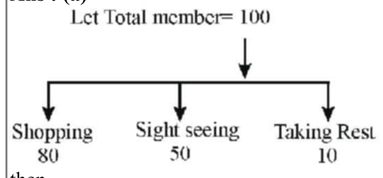

1. 40% members went for shopping as well as sightseeing.
2. 20% members went for only shopping.

Select the correct answer using the code given below

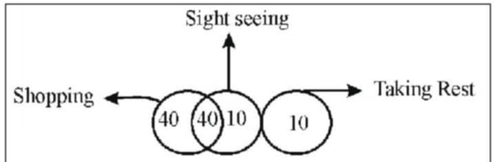

(a) 1 only
(b) 2 only
(c) Both 1 and 2
(d) Neither 1 nor 2

Ans : (a)

Let Total member= 100

then,

Hence, 40% members went for shopping as well as sight seeing
therefore, conclusion (I) is correct

52. Consider two statements S1 and S2 followed by a question :
S1 : p and q both are prime numbers.
S2 : p + q is an odd integer
Question : is pq an odd integer ?
Which one of the following is correct ?

(a) S1 alone is sufficient to answer the question
(b) S2 alone is sufficient to answer the question
(c) Both S1 and S2 taken together are not sufficient to answer the question
(d) Both S1 and S2 are necessary to answer the question

Ans : (b)
The answer of the question "is PQ an add integer",
P + Q = odd integer
∵ 2 + 3 = 5 (odd integer)
then 2 × 3 = 6 (even integer)
Hence p.q is not an odd integer

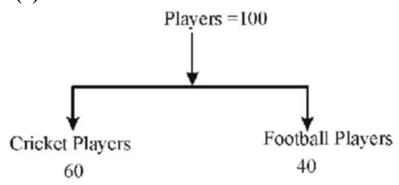

53. In a school, 60% students play cricket. A student who does not play cricket, plays football. Every football player has got a two-wheeler. Which or the following conclusions *cannot* be drawn for the above data ?

1. 60% of the students do not have two-wheelers.
2. No cricketer has a two-wheeler.
3. Cricket players do not play football.

Select the correct answer using the code given below :

(a) 1 and 2 only
(b) 2 and 3 only
(c) 1 and 3 only
(d) 1, 2 and 3 only

Ans : (a) then

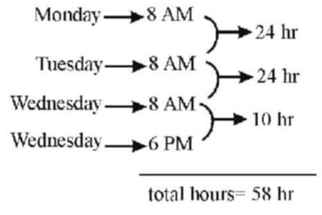

∵ Every football player has got a two wheeler,
then
It does not mean that cricket players has not got a two wheeler and can not say, 60% of students do not have two wheelers. It is clear that cricket players do not play football.
Hence Conclusions I and II can not be drawn for the given data.

54. A wall clock moves 10 minutes fast in every 24 hours. The clock was set right to show the correct time at 8 : 00 a.m. on Monday. When the clock shows the time 6:00 p.m. on Wednesday, what is the correct time ?

(a) 5: 36 p.m
(b) 5: 30 p.m
(c) 5: 24 p.m
(d) 5: 18 p.m

Ans : (a) According to question,
from, at 8 : 00 AM on Monday to at 6 : 00 PM

∵ Every 24 hr clock moves fast 10 minutes
∴ total 58 hr clock moves fast

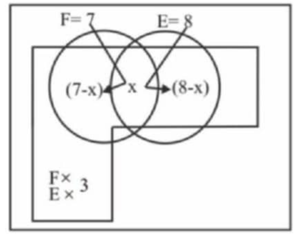

$$= \frac{10}{24} \times 58 \text{min}$$

= 24.16 (Fast) 24.16 min
∴ the correct time is as 6 pm on wednesday= 6: 00– 0.24 =5 : 36 PM

55. In a group of 15 people, 7 can read French, 8 can read English while 3 of them can read neither of these two languages. The number of people who can read exactly one language is ?

(a) 10 (b) 9
(c) 5 (d) 4

Ans : (b)

3 + (7 – x) + x + (8 – x) = 15
18 – x = 15
x = 3

Then, the number of people who can read exactly one language
= (7 – x) + 8 – x
= (7 – 3) + (8 – 3)
= 4 + 5
= 9

General Mathematics/Numerical Ability

56. The number of times the digit 5 will appear while writing the integers from 1 to 1000 is

(a) 269 (b) 271
(c) 300 (d) 302

Ans : (c) writing the integers from 1 to 1000 the number of 5 which place in unit digit = 100
The number of 5 which place in tenth digit =100
the number of 5 which place in hundred digit =100
∴ Total number of 5 = 300

57. A and B are two heavy steel blocks. If B is placed on the top of A, the weight increases by 60% . How much weight will reduce with respect to the total weight of A and B, if B is removed from the top of A ?

(a) 60% (b) 45.5%
(c) 40 % (d) 37.5%

Ans : (d) Let the weight of A = 100kg
∴ A + B = 160
∴ B = 160 –100
B = 60
∵ B is removed from A,
∴ Required decrease % =

$$= \frac{60}{160} \times 100\%$$

$$= \frac{3}{8} \times 100\% = \frac{3}{2} \times 25\%$$

$$= \frac{75}{2}\% \Rightarrow 37\frac{1}{2}\%$$

58. The number of parallelograms that can be formed from a set of four parallel lines intersecting another set of four parallel lines, is

(a) 18 (b) 24
(c) 32 (d) 36

Ans : (d)
