Select the correct answer using the code given below.

(a) 1 only
(b) 2 only
(c) Both 1 and 2
(d) Neither 1 nor 2

Ans. (c) : The most rational and logical inference that can be drawn from the given passage is that redefining and rethinking the economic role of the state running in the blind pursuit of development has become desirable not acceptable. Similarly, to say that India has not effectively implemented its policies in the social sectors and has not invested enough in social progress is also not well established from the basic content of the passage. Hence, option (c) is correct answer.

25. With reference to the above passage, the following assumptions have been made :

1. India's economy needs to be greatly integrated with global economy so as to create large number of jobs and to sustain its growth momentum.

2. Economic liberalization would cause large economic growth which would reduce poverty and create sufficient employment in the long run.

Why of the above assumptions is/are valid?

(a) 1 only
(b) 2 only
(c) Both 1 and 2
(d) Neither 1 nor 2

Ans. (d) : In the context of the given passage, the preconceived notion is that India's economy needs to be integrated with the global economy, So that its growth rate can be sustained, resulting in a reduction in poverty and employment over a period of time. The increase does not match with the complete concept of the paragraph. Thus, both the assumptions (1) and (2) are not valid.

LOGICAL AND ANALITICAL ABILITY

26. Two statements are given followed by two conclusions:

Statements

All numbers are divisible by 2.
All numbers are divisible by 3.

Conclusion-I

All numbers are divisible by 6.

Conclusion-II

All numbers are divisible by 4.

Which of the above conclusions logically follow/follow from the two given statements?

(a) Only Conclusion-I
(b) Only Conclusion-II
(c) Neither Conclusion-I nor Conclusion-II
(d) Both Conclusion-I and Conclusion-II

Ans. (a) : By taking LCM of 2 & 3.
$\therefore$ LCM = 2 × 3 = 6
So, the numbers which are divisible by 2 & 3 will also be divisible by 6.

27. Consider the following arrangement that has some missing letters.

abab_b_bcd_dcdcded_d

The missing letters which complete the arrangement are

(a) a, b, c, d (b) a, b, d, e
(c) a, c, c, e (d) b, c, d, e

Ans. (c) : abababcbcdcdcdcdeded
So, [a, c, c, e] option (c) would be most appropriate.

28. Let A3BC and DE2F be four-digit number where each letter represents a different digit greater than 3. If the sum of the numbers is 15902, then what is the difference between the values of A and D?

(a) 1 (b) 2
(c) 3 (d) 4

Ans. (c) :

$$\begin{array}{cccccc} & A & 3 & B & C \\ + & D & E & 2 & F \\ \hline & 15 & 9 & 0 & 2 \end{array}$$

As per question,
each letter is greater & different than 32.

Then,

6 = A	3	7 = B	8 = C
+ 9 = D	5 = E	2	4 = F
15	9	0	2

Hence, difference between A & D = D – A
= 9 – 6 = 3

29. If in a particular year 12th January is a Sunday, then which one of the following is correct?

(a) 15th July is a Sunday if the year is a leap year.
(b) 15th July is a Sunday if the year is not a leap year.
(c) 12th July is a Sunday if the year is a leap year.
(d) 12th July is not a Sunday if the year is a leap year.

Ans. (c) : To determine 12th July day. Assuming that the year is not a leap year.

= 19 + 28 + 31 + 30 + 31 + 30 + 12 = 181
↓ ↓ ↓ ↓ ↓ ↓ ↓ ↓
Jan Feb Mar Apr May Jun July Total days

$\because$ There is 7 days in a week,
Total number of days remaining-

$\frac{181}{7}$ in remaining days $\Rightarrow$ 6 (remaining days)

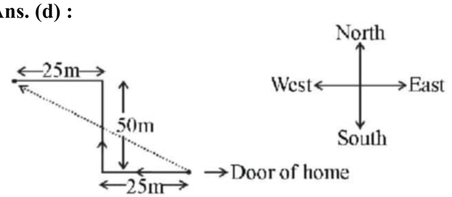

If 12th January is Sunday the 12th July will be Saturday (Where there is no leap year). If there is a leap year then, 12th July will be a Sunday.

GENERAL MENATAL ABILITY

30. A man walks down the backside of his house straight 25 meters, then turns to the right and walks 50 meters again; then he turns towards left and again walks 25 meters. If his house faces to the East, what is his direction from the starting point?

(a) South-East (b) South-West
(c) North-East (d) North-West

Ans. (d) :

Hence, he is in "North-West direction from his starting point.

31. Two statements are given followed by two conclusions:

Statements:

All cats are dogs.
All cats are black.

Conclusion–I

All dogs are black.

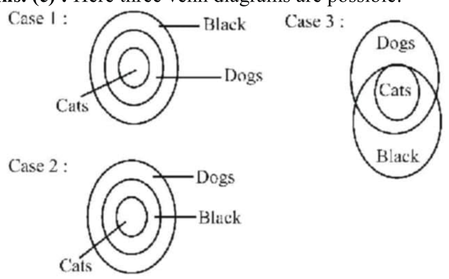

Conclusion-II

Some dogs are not black.

Which of the above conclusions logically follow/follow from the two given statements? disregarding commonly known facts

(a) Only Conclusion-I
(b) Only Conclusion-II
(c) Neither Conclusion-I nor Conclusion-II
(d) Both Conclusion-I and Conclusion-II

Ans. (c) : Here three venn diagrams are possible:

Conclusion I : All dogs are black (True in case 1 but false in case 2 and 3)
Conclusion II : Some dogs are not black (true in case 2 and 3 but false in case -1)
Hence Neither conclusion -1 nor conclusion II follows the statement.

32. Consider the following sequence of numbers:

5 1 4 7 3 9 8 5 7 2 6 3 1 5
8 6 3 8 5 2 2 4 3 4 9 6

How many odd numbers are followed by the odd number in the above sequence?

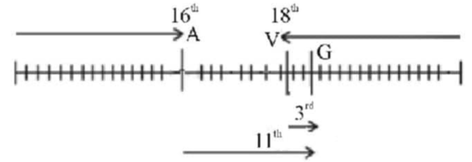

(a) 5 (b) 6
(c) 7 (d) 8

Ans. (b) : Arrange in one line
5 1 4 7 3 9 8 5 7 2 6 3 1 5 8 6 3 8 5 2 2 4 3 4 9 6
(5,1) (7,3) (3,9) (5,7) (3,1) (1,5)
Required numbers = 6

33. A is 16th from the left end in a row of boys and V is 18th from the right end. G is 11th from A towards the right and 3rd from V towards the right end. How many boys are there in the row?

(a) 40
(b) 41
(c) 42
(d) Cannot be determined due to insufficient data

Ans. (b) :

Required Numbers = (16 + 18 + 11 – 4)
= [45 – 4]
= 41

34. Three statements S_1, S_2 and S_3 are given below followed by a question:

S_1 : C is younger than D, but older than A and B.
S_2 : D is the oldest.
S_3 : A is older than B

Question:

Who among A, B, C and D is the youngest?
Which one of the following is correct in respect of the above statements and the question?

(a) S_1 alone is sufficient to answer the question
(b) S_1 and S_2 together are sufficient to answer the question
(c) S_2 and S_3 together are sufficient to answer the question
(d) S_1 and S_3 together are sufficient to answer the question
