Ans. (b) : Let the 6 person A, B, C, D, E, F and another person X

Possible combinations $\Rightarrow \{XA, XC, XE\}$

$\{XA, XC, XF\}$

$\{XA, XD, XF\}$

$\{XB, XD, XF\}$

Hence, the no. of possible combinations = 4

26. An amount of money was distributed among A, B and C in the ratio p : q : r.
Consider the following statements :
1. A gets the maximum share if p is greater than (q + r).
2. C gets the minimum share if r is less than (p + q).

Which of the above statements is/are correct?
(a) 1 only
(b) 2 only
(c) Both 1 and 2
(d) Neither 1 nor 2

Ans. (a) : ∵ The amount of money was distributed among A, B and C in the ratio = p : q : r.
from statement (I),

$$P > (q+r) \Rightarrow \begin{matrix} P > q \\ P > r \end{matrix}$$

then,
A gets the maximum share.
This statement is correct.
From statement (2),

$$(P+q) > R \Rightarrow \begin{matrix} P \gtrless r \\ q \gtrless r \end{matrix}$$

then, To say "C gets the minimum share" is not definitely true.
Hence, only (I) statement is correct

27. In the series_b_a_ba_b_abab_aab; fill in the six blanks (_) using one of the following given four choices such that the series follows a specific order.
(a) b a b a b a (b) b a a b b a
(c) b b a a b b (d) a b a b a b

Ans. (d) : _b_a_ba_b_abab_aab
a b **b** a **a** b/a **b** b **a** a b/a b **b** a a b
Hence, Option (d) "ababab" is correct.

28. In a code language 'MATHEMATICS' is written as 'LBSIDNZUHDR'. How is 'CHEMISTRY' written in that code language?
(a) DIDLHRSSX (b) BIDNHTSSX
(c) BIDLHTSSX (d) DGFLIRUQZ

Ans. (b) : Just as,

13	1	20	8	5	13	1	20	9	3	19
M	A	T	H	E	M	A	T	I	C	S
−1	+1	−1	+1	−1	+1	−1	+1	−1	+1	−1
12	2	19	9	4	14	26	21	8	4	18
L	B	S	I	D	N	Z	U	H	D	R

Similarly

3	8	5	13	9	19	20	18	25
C	H	E	M	I	S	T	R	Y
−1	+1	−1	+1	−1	+1	−1	+1	−1
2	9	4	14	8	20	19	19	24
B	I	D	N	H	T	S	S	X

Hence, "CHEMISTRY" is written as BIDNHTSSX

29. At which one of the following times, do the hour hand and the minute hand of the clock make an angle of 180° with each other?
(a) At 7:00 hours
(b) Between 7:00 hours and 7:05 hours
(c) At 7:05 hours
(d) Between 7:05 hours and 7:10 hours

Ans. (d) : The hour hand and the minute hand of the clock make an angle of 180° with each other between 7.05 hours and 7:10 hours.

30. Jay and Vijay spent an equal amount of money to buy some pens and special pencils of the same quality from the same store. If Jay bought 3 pens an d5 pencils, and Vijay bought 2 pens an d7 pencils, then which one of the following is correct?
(a) A pencil costs more than a pen
(b) The price of a pencil is equal to that of a pen
(c) The price of a pen is two times the price of a pencil.
(d) The price of a pen is three times the price of a pencil.

Ans. (c) : According to question,
3 Pens + 5 Pencils = 2 Pens + 7 Pencils
3 Pens – 2 Pens = 7 Pencils – 5 Pencils
1 Pen = 2 Pencils

$$\frac{\text{Pen}}{\text{Pencil}} = \frac{2}{1}$$

Pen : Pencil = 2 : 1
Hence, the price of a pen is two times the price of a pencil.

31. Consider two statements and a Question:
Statement-I : The last day of the month is a Wednesday.
Statement-2 : The third Saturday of the month was the seventeenth day.
Question : What day is the fourteenth of the given month?

Which of the following is correct in respect of the Statements and the Question?

(a) Statement-1 alone is sufficient to answer the Question
(b) Statement-2 alone is sufficient to answer the Question
(c) Both Statement-1 and Statements -2 are required to answer the Question
(d) Neither Statements-1 alone nor Statements-2 alone is sufficient to answer the Question

Ans. (b) : Consider statement (2) & Question

14th	15th	16th	17th
Wednesday	Thursday	Friday	Saturday

'Date of 14th will be wednesday.
Hence,
Statement-2 alone is the sufficient to answer the question.

32. Which day is 10th October, 2027?
(a) Sunday (b) Monday
(c) Tuesday (d) Saturday

Ans. (a) : ∵ 10th of October 2021, is Sunday,
{The paper held on sunday in 10th of October 2021}
For day of 10th of October 2027,
total odd days = (2027 – 2021) + leap year 2024
= 6 + 1
= 7

$$\text{Again odd days} = \frac{7}{7} \xrightarrow{\text{Remainder}} 0$$

Hence,
10th of October 2027 will be sunday.
OR
For day of 10th of October 2027
2026 + Jan + Feb + Mar + Apr + May + June + July + Aug + Sep + 10 October
2000 + 26 + 6* + Jan + Feb + Mar + Apr + May + June + July + Aug + Sep + 10 Oct

$$\because \text{No. of leap years} = \frac{26}{4} \xrightarrow{\text{Quotient}} 6.5 \rightarrow 6(\text{leap year})$$

$$\frac{26+6+31+28+31+30+31+30+31+31+30+10}{7}$$

$$\frac{5+6+3+0+3+2+3+2+3+3+2+3}{7}$$

$$\text{Odd days} = \frac{35}{7} \rightarrow \text{Remainder} = 0$$

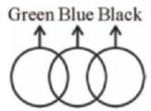

Hence,
10th of October 2021 will be Sunday
{The number of odd days = Any number is divided by 7 then obtained remainder is odd days}

33. Consider two Statements and four Conclusions given below. You have to take the Statements to be true even if they seem to be at variance from the commonly known facts. Read all Conclusions and then decide which of the given Conclusion (s) logically follows/follow from the Statements, disregarding the commonly known facts.

Statement-I : Some greens are blues.
Statement-2 : Some blues are blacks.
Conclusion-1 : Some greens are blacks.
Conclusion-2 : No green is black.
Conclusion-3 : All greens are blacks.
Conclusion-4 : All blacks are greens.

Which one of the following is correct?
(a) Conclusion-1 and Conclusion-2 only
(b) Conclusion-2 and Conclusion-2 only
(c) Conclusion-3 and Conclusion-4 only
(d) Neither Conclusion 1 nor 2 nor 3 nor 4

Ans. (d) :

Neither conclusion 1 nor 2 nor 3 nor 4.

34. Consider the following Table :

Player	Runs scored in the First Innings	Balls faced in the First Innings	Runs scored in the Second Innings	Balls faced in the Second Innings
A	61	99	14	76
B	05	12	50	85
C	15	75	20	50
D	13	55	12	50

Who is the fastest run scorer in the Test Match?
(a) A (b) B
(c) C (d) D

Ans. (b) :

$$\because \text{Run scored per ball} = \frac{\text{Scored total runs}}{\text{Total ball faced}}$$

$$\text{Player (A)} = \frac{61+14}{99+76} = \frac{75}{175} \Rightarrow \frac{3}{7} = 0.4285$$

$$\text{Player (B)} = \frac{5+50}{12+85} = \frac{55}{97} \Rightarrow 0.5670$$

$$\text{Player (C)} = \frac{15+20}{75+50} = \frac{35}{125} \Rightarrow \frac{7}{25} = 0.28$$

$$\text{Player (D)} = \frac{13+12}{55+50} = \frac{25}{105} \Rightarrow \frac{5}{21} = 0.2380$$

Player (B) is the fastest run scorer in the test match.

35. In the English alphabet, the first 4 letters are written in opposite order; and the next 4 letters are written in opposite order and so on; and at the end Y and Z are interchanged. Which will be the forth letter to the rights of the 13th letter?
(a) N (b) T
(c) H (d) I
