Ans. (b) : English alphabet

ABCD EFGH IJKL MNOP QRST UVWX YZ

On changing according to question-

DCBA HGFE LKJI PONM TSRQ XWVU ZY

13th 4th

T

Hence, the Letter is T.

36. Seven books P, Q, R, S, T, U and V are placed side by side. R, Q and T have blue covers and other books have red covers. Only S and U are new books and the rest are old. P, R and S are law reports; the rest are Gazetteers. Books of old Gazetteers with blue covers are

(a) Q and R (b) Q and U

(c) Q and T (d) T and U

Ans. (c) :

Book	Colour	Condition	Relation
P	Red	Old	Law Reports
Q	Blue	Old	Gazetteers
R	Blue	Old	Law Reports
S	Red	New	Law Reports
T	Blue	Old	Gazetteers
U	Red	New	Gazetteers
V	Red	Old	Gazetteers

Hence, Books of old Gazetters with blue covers are Q and T.

37. Replace the incorrect term by the correct term in the given sequence

3, 2, 7, 4, 13, 10, 21, 18, 31, 28, 43, 40

Where odd terms and even terms follow the same pattern.

(a) 0 (b) 1

(c) 3 (d) 6

Ans. (a) : Sequence:- 3,2,7,4,13,10,21,18,31,28,43,40

Odd terms:-

3, 7, 13, 21, 31, 43

+4 +6 +8 +10 +12

Even terms:-

2 4 10 18 28 40

0 +6 +8 +10 +12

+2 +4

Hence, Replace the '2' by the '0' in the given seuqnce.

38. Following is a matrix of certain entries. The entries follow a certain trend row-wide. Choose the missing entry (?) accordingly.

7B	10A	3C
3C	9B	6A
10A	13C	?

(a) 9B (b) 3A

(c) 3B (d) 3C

Ans. (c) :

7B	10A	3C	$\Rightarrow$ 7 + 3 = 10 & BAC
3C	9B	6A	$\Rightarrow$ 6 + 3 = 9 & CBA
10A	13C	?	$\Rightarrow$ 10 + ? = 13 & AC[B]
			$\Rightarrow$? = 3

Hence, ? = 3B

39. You are given two identical sequences in two rows :

Sequence –I :	8	4	6	15	52.5	236.5
Sequence-II :	5	A	B	C	D	E

What is the entry in the place of C for the Sequence-II?

(a) 2.5 (b) 5

(c) 9.375 (d) 32.8125

Ans. (c) :

×0.5 ×1.5 ×2.5 ×3.5 ×4.5

Sequence-I	8	4	6	15	52.5	236.25
Sequence-II	5	A	B	C	D	E

×0.5 ×1.5 ×2.5 ×3.5 ×4.5

$5 \times 0.5 = A$

[2.5 = A]

$A \times 1.5 = B$

$2.5 \times 1.5 = B$

[3.75 = B]

$B \times 2.5 = C$

$3.75 \times 2.5 = C$

$9.375 = C$

Hence, [C = 9.375]

40. A person X from a place A and another person Y from a place B set out at the same time to walk towards each other. The places are separated by a distance of 15 km. X walks with a uniform speed of 1.5 km/hr and Y walks with a uniform speed of 1 km/hr in the first hour, with a uniform speed of 1.25 km/hr in the second hour and with a uniform speed of 1.5 km/hr in the third hour and so on.

Which of the following is/are correct?

1. They take 5 hours to meet.
2. The meet midway between A and B.

Select the correct answer using the code given below.

(a) 1 only (b) 2 only

(c) Both 1 and 2 (d) Neither 1 nor 2

Ans. (c) :

Person(X) → ← Person(Y)

Place (A) ——— Place (B)

	Distance covered by person 'X'	Distance covered by person 'Y'	Distance covered by the both person
Distance covered by I^{st} hour	1.5 km	1 km	2.5 km
Distance covered by IInd hour	1.5 km	1.25 km	2.75 km
Distance covered by IIIrd hour	1.5 km	1.50 km	3.00 km
Distance covered by IVth hour	1.5 km	1.75	3.25 km
Distance covered by V^{th} hour	1.5 km	2.00 km	3.50 km
Total distance	7.5 km	7.5 km	15 km

Both 1 and 2 are correct.

41. A woman runs 12 km towards her North, then 6 km towards her South and then 8 km towards her East. In which direction is she from her starting point?

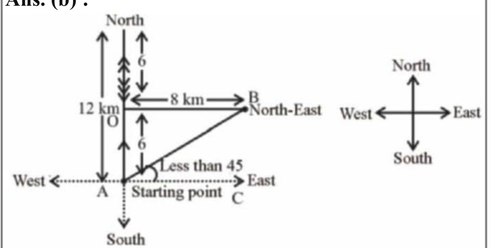

(a) An angle less than 45° South of East

(b) An angle less than 45° North of East

(c) An angle more than 45° South of East

(d) An angle more than 45° North of East

Ans. (b) :

Right angle Δ AOB

$\angle OBA + \angle OAB + \angle AOB = 180$

$\angle OBA + \angle OAB + 90 = 180$

$\Rightarrow \angle OBA + \angle OAB = 90^\circ$

$\because OB > AO$

$\therefore \angle OAB > \angle OBA$

$\because \angle OBA + \angle OAB = 90$

$45^- + 45^+ = 90$

$\because \angle OAC = 90$

and $\angle OAB = 45^+$

$\therefore \angle CAB = 45^-$

$\angle CAB < 45$

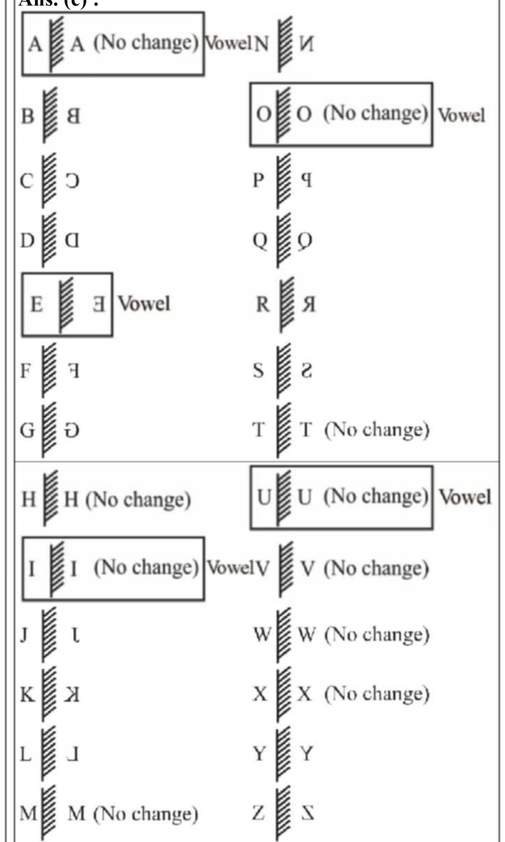

Hence, the woman from his starting point is an angle less than 45° North of East.

42. Images of consonants of the English alphabet (Capitals) are observed in a mirror. What is the number of images of these which do not look like their original shapes?

(a) 13 (b) 14

(c) 15 (d) 16

Ans. (c) :

∵ Total letters = 26

Total Vowels = 5

Total Cosonants = 25 – 5

= 21

No. of consonants which are not charge.

= 6 {H, M, T, V, W, X}

Hence, the number of images which are charge

= 21 – 6 = 15
