environmental adversity. This failure to survive, in modern terms can be attributed to the genomes which are unable to withstand geological. vagaries or biological mishaps (infections, diseases and so on). In biological evolution on the earth, extinction of species has been a major feature. The earth may presently have up to ten million species, yet more than 90% of species that have ever lived on the earth are now extinct. Once again, the creationist doctrines fail to satisfactorily address why a divine creator will firstly bother to create millions of species and then allow them to perish. The Darwinian explanation for extinct life is once again simple, elegant and at once convincing-organisms go extinct as a function of environmental of biological assaults for which their inheritance deems them ill-equipped. Therefore , the so-called Darwinian theory of evolution is not a theory at all. Evolution happens-this is a fact.

The mechanism of evolution (Darwin proposed natural selection) is amply supported by scientific data. Indeed, to date no single zoological, botanical, geological, paleontological, genetic or physical evidence has refuted either of the central two main Darwinian ideas. If religion is not taken into consideration, Darwinian laws are acceptable just like the laws proposed by Copernicus, Galileo, Newton and Einstein-sets of natural laws that explain natural phenomena in the universe.

31. According to the passage natural selection cannot anticipate future environment of the earth as

1. Species not fully prepared to face the environment changes await them will face extinction

2. All the existing species would get extinct as their genomes will not withstands biological mishaps

3. Inability of the genome to withstands environment changes would result in extinction

4. Extinction of species is a common feature

Select the correct answer using the code given below:

(a) 1, 2 and 3 (b) 2, 3 and 4

(c) 1, 3 and 4 (d) 1, 2 and 4

Ans. (c) : According to the passage, natural section cannot anticipate future environment of the earth as–

1. Species not fully prepared to face the environment changes await them will face extinction.

2. Inability of the genome to withstand environment changes would result in extinction.

3. Extinction of species is a common feature.

32. The passage suggests that Darwinian theory of evolution is not a theory at all because.

(a) It does not satisfy the creationist doctrine

(b) Extinction is a faction of environment and biological assaults

(c) There are no evidences to refute it

(d) Existence of organisms is attributed to a creator

Ans. (c) : The passage suggests that Darwinian theory of evolution is not a theory at all because there are no evidences to refute it.

33. With reference to the passage, the following assumptions have been made :

1. Only species that have the ability to overcome environment catastrophes will survive and perpetuate

2. More than 90% of the species in the earth are in the danger of getting extinct due to drastic changes in the environment

3. Darwin's theory explains all the natural phenomena.

Which of the above assumptions is/are valid?

(a) 1 only (b) 1 and 2 only

(c) 3 only (d) 1, 2 and 3

Ans. (a) : With the reference to the above passage only one assumption is valid, which is only species that have the ability to overcome environment catastrophes and will survive and perpetuate.

Passage–2

With steady economic growth, higher literacy and increasing skill levels, the number of India middle-class families has gone up exponentially. Direct results of the affluence have been changes in dietary patterns and energy consumption levels. People have moved to a higher protein-based diet like milk products, fish and meat, all of which need significantly more water to produce than cereal based diets. Increasing use of electronic and electric machines/gadgets and motor vehicles needs more and more energy and generation of energy needs water.

34. Which one of the following statements best reflects the crux of the passage?

(a) People should be persuaded to continue with the mainly Indian traditional cereal-based diets.

(b) India needs to focus on developing agricultural productivity and capacity for more energy generation in the coming years.

(c) Modern technological developments result in the change of cultural and social behavior of the people.

(d) Water management practices in India need to change dramatically in the coming years.

Ans. (d) : The statement water management practices in India need to change dramatically in the coming years reflects the best curse of the passage.

35. How many seconds in total are there in x weeks, x days, x hours, x minutes and x seconds?

(a) 11580x (b) 11581x

(c) 694860x (d) 694861x

Ans. (d) : From question,

x week, x day, x hours, x minute and x second

= x×7×24×60×60 + x×24×60×60 + x×60×60 + x×60 + x

= x×24×60×60×8 + 3661x

= 691200x + 3661x

= 694861x

36. P, Q,R, S, T and U are six members of a family. R is the spouse of Q. U is the mother of T and S is the daughter of U.P's daughter is T and R's son Is P. There are two couples in the family. Which one of the following is correct?

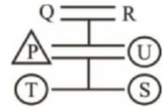

(a) Q is the grandfather of T

(b) Q is the grandmother of T

(c) R is the mother of P

(d) T is the granddaughter of Q

Ans. (d) : According to the question,

'T' is the granddaughter of 'Q'.

37. Consider the Question and two Statements given below in respect of three cities P, Q and R in a State:

Question: How far is city P from city Q?

Statement-1: City Q is 18 km from city R.

Statement-2: City P is 43 km from city R.

Which one of the following is correct in respect of the Question and the Statements?

(a) Statement-1 alone is sufficient to answer the Question

(b) Statement-2 alone is sufficient to answer the Question

(c) Both Statement-1 and Statements-2 are sufficient to answer the Question

(d) Both Statement-1 and Statement-2 are not sufficient to answer the Question

Ans. (d) : Both statement 1 and statement 2 are not sufficient to answer the question.

38. Two Statements following by four conclusions are given below. You have to take the Statements to be true even if they seem to be at variance from the commonly known facts. Read all the Conclusions and then decide which of the given Conclusions logically follows/follow from the statements, disregarding the commonly known facts

Statement-1: All pens are books.

Statement : No chair is a pen.

Conclusion-I: All chairs are books.

Conclusion-II: Some chairs are pens.

Conclusion-III: All books are chairs.

Conclusion-IV: No chair is a book.

Which one of the following is correct?

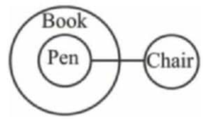

(a) Only Conclusion-I

(b) Only Conclusion-II

(c) Both Conclusion-III and conclusion-IV

(d) None of the Conclusions follows

Ans. (d) : From question,

None of the conclusion follows.

39. Three Statements following by three Conclusions are given below. You have to take the Statements to be true even if they seem to be at variance from the commonly known facts. Read all the conclusions and then decide which of the given Conclusions logically follows/follow from the Statements, disregarding the commonly known facts:

Statement-1: Some doctors are teachers.

Statement-2: All teachers are engineers.

Statement-3: All engineers are scientists.

Conclusion -I: Some scientists are doctors.

Conclusion-II: All engineers are doctors.

Conclusion-III : Some engineers are doctors.

Which one of the following is correct?

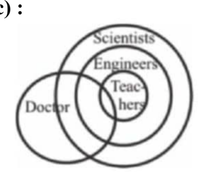

(a) Only Conclusion-I

(b) Only Conclusion-II

(c) Both Conclusion-I and Conclusion-III

(d) Both Conclusion-I and Conclusion-II

Ans. (c) :

Both conclusion I and conclusion II follows.
