**Which of the statements given above is/are correct?**

(a) 1 and 2 only (b) 2 only
(c) 3 only (d) 1, 2 and 3

**Ans. (b) :** The trade between India and Sri Lanka was valued at USD 4.5 billion during 2016-17 as compared to USD 6.05 billion during 2015-16, registering a sharp decline of 25.25%. So it is clear that statement 1 is not correct.

Textile contributed 31.3% of Indian exports to Bangladesh in 2016-17. The other prominent products of exports were engineering products (25% of exports), chemical products (9% of exports) and vegetable products (Fresh vegetables 8% of exports). All these products accounted for 73% of total export to Bangladesh. Textiles and textiles products formed the largest component of imports from Bangladesh and contributed to 60% of total imports. Hence statement 2 is correct.

As per 2016-17 data, Bangladesh is the largest trading partner in South Asia, followed by Nepal, Sri Lanka, Pakistan, Bhutan, Afghanistan and Maldives. The level of Indian Exports also follows the same order. Hence statement 3 is not correct.

**64. With reference to Foreign Direct Investment in India, which one of the following is considered its major characteristic?**

(a) It is the investment through capital instruments essentially in a listed company.
(b) It is a largely non-debt creating capital flow.
(c) It is the investment which involves debt-servicing.
(d) It is the investment made by foreign institutional investors in the Government securities.

**Ans. (b) :** Foreign Direct Investment (FDI) means when an investor establishes foreign business operations or acquires foreign business assets, including ownership or controlling interest in a foreign company. Thus, foreign direct investment (FDI), being a non-debt capital flow, is a leading source of external finance. Hence statement 2 is the correct answer.

**65. With reference to the international trade of India at present, which of the following statements is/are correct?**

1. India's merchandise exports are less than its merchandise imports.
2. India's imports of iron and steel, chemicals, fertilisers and machinery have decreased in recent years.
3. India's exports of services are more than its imports of services.
4. India suffers from an overall trade/current account deficit.

**Select the correct answer using the code given below:**

(a) 1 and 2 only (b) 2 and 4 only
(c) 3 only (d) 1, 3 and 4 only

**Ans. (*) :** At present, the following statement is true in the context of India's International Trade.

1. India's goods export are lower compared to its imports of goods.
2. India's imports of iron and steel, chemicals, fertilisers and machinery have decreased in recent years.
3. India's export of services are more than imports of services.
4. India is incurring an overall trade/current account deficit.

**Note :** This question UPSC has been dropped out because given option would be not appropriate.

**66. With reference to Trade-Related Investment Measures (TRIMS), which of the following statements is/are correct?**

1. Quantitative restrictions on imports by foreign investors are prohibited.
2. They apply to investment measures related to trade in both goods and services.
3. They are not concerned with the regulation of foreign investment.

**Select the correct answer using the code given below:**

(a) 1 and 2 only (b) 2 only
(c) 1 and 3 only (d) 1, 2 and 3

**Ans. (c) :** The agreement on trade-related investment (belongs to Uruguay round) measures (TRIMs) recognizes that certain investment measures can restrict and distort trade. It states that WTO members may not apply any measure that discriminates against foreign products or leads to quantitative restrictions, both of which violate basic WTO principles. Hence statement 1 is correct.

TRIMs applies only to measure that affect trade in goods. Hence, statement 2 is incorrect.

The agreement is not concerned with the regulation of foreign investment. Hence, statement 3 is correct.

**67. If another global financial crisis happens in the near future, which of the following actions/policies are most likely to give some immunity to India?**

1. Not depending on short-term foreign borrowings
2. Opening up to more foreign banks
3. Maintaining full capital account convertibility

**Select the correct answer using the code given below:**

(a) 1 only (b) 1 and 2 only
(c) 3 only (d) 1,2 and 3

**Ans. (a) :**Not depending on short term foreign borrowings and focusing on long term plans will give immunity to the economy. So, statement 1 is correct.

- Foreign banks will further increase India's exposure to foreign money and may, in fact, aggravate the financial crisis. So, statement 2 is incorrect.
- India's rupee is a partially convertible currency rupees can be exchanged at market rates in certain cases, but approval is required for larger amounts making the rupee a fully convertible currency would mean increased liquidity in financial markets, improved employment and business opportunities and easy access to capital. Some of the disadvantages include higher volatility and increased burden of foreign debt and an effect on the balance of trade and exports. Hence, statement 3 is incorrect.

## • Chemistry

**68. Which of the following are the reasons/factors for exposure to benzene pollution?**

1. Automobile exhaust
2. Tobacco smoke
3. Wood burning
4. Using varnished wooden furniture
5. Using products made of polyurethane

**Select the correct answer using the code given below:**

(a) 1, 2 and 3 only (b) 2 and 4 only
(c) 1, 3 and 4 only (d) 1, 2, 3, 4 and 5

**Ans. (a) :** Benzene is a colourless or pale yellow colour chemical produced from crude oil, gasoline and cigarette smoke. It evaporates and dissolves in the air. In some industries, benzene is also used to produce other chemicals, vehicular pollution, gas stations, industries and tobacco, wood burning have high exposure to benzene pollution.

Hence statement 1, 2 and 3 are correct.

**69. Consider the following statements:**

1. Genetic change can be introduced in the cells that produce eggs or sperms of a prospective parent.
2. A person's genome can be edited before birth at the early embryonic stage.
3. Human induced pluripotent stem cells can be injected into the embryo of a pig.

**Which of the statement given above is/are correct?**

(a) 1 only (b) 2 and 3 only
(c) 2 only (d) 1, 2, and 3

**Ans. (d) :** Germline gene therapy targets the reproductive cells meaning any changes made to the DNA will be passed to the next generation. Consequently, the practice has dramatically divided opinion. Germline gene therapy is when DNA is transferred into the cells that produce reproductive cells, eggs or sperm in the body. Hence statement 1 is correct.

Although germline gene therapy is illegal, embryonic genetic editing is different from that and it is possible to make genome changes to eliminate the vertical transfer (through inheritance) of certain diseases and medical conditions. Hence statement 2 is correct.

Human-animal chimaeras are animals bearing human cells and organs. They offer insight into early human development and disease onset and provide a realistic drug testing platform. Researchers have experimented by injecting several different forms of humans stem cells into pig embryos to see which cell type would survive best. The cells that survived longest and showed the most potential to continue to develop were intermediate human pluripotent stem cells. Hence statement 3 is correct.

## • Zoology

**70. Which of the following statement are correct regarding the general difference between plant and animal cells?**

1. Plant cells have cellulose cell walls whilst animal cells do not.
2. Plant cells to do not have plasma membrane unlike animal cells which do
3. Mature plant cell has one large vacuole whilst animal cell has many small vacuoles.

**Select the correct answer using the code given below:**

(a) 1 and 2 only (b) 2 and 3 only
(c) 1 and 3 only (d) 1, 2 and 3

**Ans. (c) :**

| Characteristics | Plant Cell | Animal Cell |
|---|---|---|
| Cell wall | Present | Absent |
| Shape of cell | Distinct edges shape is either rectangular or square shaped | Round and irregular shape |
| Nucleus | Present, lies on one side of the cell | Present, lies in the center of the cell |
| Lysosomes | Rarely present | Always present |
| Plastids | Present | Absent |
| Structure of vacuoles | Single or a few large vacuole that is centrally located | Presence of numerous and smaller vacuoles |

Both(Plant cell & Animal cell) also have plasma membrane. Therefore, statement 2 is not correct.
