(c) Both Statement-1 and Statement-2 are sufficient to answer the Question

(d) Both Statement-1 and Statement-2 are not sufficient to answer the Question

Ans. (d) : According to the question,

It is not clear from the above that who will be to the left of A, either D or E.

Option (d) will be right.

49. Consider the Question and two Statements given below:

Question: What is the age of Manisha?

Statement-1 : Manisha is 24 years younger than her mother.

Statement-2 : 5 years later, the ages of Manisha and her mother will be the ration 3 : 5

Which one of the following is correct in respect of the Question and the Statement?

(a) Statement-1 alone is sufficient to answer the Question

(b) Statement-2 alone is sufficient to answer the Question

(c) Both Statement-1 and Statement-2 are sufficient to answer the Question

(d) Both Statement-1 and Statement-2 are not sufficient to answered the Question

Ans. (c) : From statement-1

Let the Manisha's mother age = x year

Age of Manisha = (x – 24) year

From statement-2

$$\frac{x-24+5}{x+5}=\frac{3}{5}$$

$$\frac{x-19}{x+5}=\frac{3}{5}$$

$$5x-95=3x+15$$

$$2x=110$$

$$x=55$$

Both statement 1 and statement 2 are sufficient to answer the question.

50. Six lectures A, B, C, D, E and F, each of one hour duration, are scheduled between 8:00 a.m. and 2:00 p.m.

Consider the Question and two Statement given below:

Question: Which lecture is in the third period?

Statement-1 : Lecture F is preceded by A and following by C.

Statement-1: There is no lecture after lecture B.

Which one of the following is correct in respect of the Question and the Statement?

(a) Statement-1 alone is sufficient to answer the Question

(b) Statement-2 alone is sufficient to answer the Question

(c) Both Statement-1 and Statement-2 are sufficient to answer the Question

(d) Both Statement-1 and Statement-2 are not sufficient to answered the Question

Ans. (d) According to statement 1st, the possible sequence of lecture period-

1. (A) (F) (C) ◯ ◯ ◯
2. ◯ (A) (F) (C) ◯ ◯
3. ◯ ◯ (A) (F) (C) ◯
4. ◯ ◯ ◯ (A) (F) (C)

It is clear from statement I[st], anyone of the C, F and A can be lectured in the third period.

According to statement 2[nd], the possible sequence of lecture -

◯ ◯ ◯ ◯ ◯ (B)

It is clear from statement 2- anyone of the A, C, D, E and F can be lectured in the III[rd] period.

According to statement 1[st] and 2[nd], the possible sequence of lecture period-

1. (A) (F) (C) ◯ ◯ (B)
2. ◯ (A) (F) (C) ◯ (B)
3. ◯ ◯ (A) (F) (C) (B)

Statement I[st] and 2[nd] both together not able to decide who will be lectured in the third period because any of C, F and A can be lectured.

So, both statement-1 and Statement-2 are not sufficient to answer the question.

Directions for the following 3 (three) items:

Read the following two passages and answer the items that follow the passages. Your answers to these items should be based on the passages only.

Passage-1

In an economic organization, allowing mankind to benefit by the productivity of machines should lead to a very good life of leisure, and much leisure is apt to be tedious except to those who have intelligent activates and interests. If a leisured population is to be happy, it must be an educated population, and must be educated with a view to enjoyment as well as to the direct usefulness of technical knowledge.

51. Which of the following statements best reflects the underlying tone of the passage?

(a) Only an educated population can best make use of the benefits of economic progress.

(b) All economic development should be aimed at the creation of leisure.

(c) An increase in the educated population of a country leads to an increase in the happiness of its people.

(d) Use of machines should be encouraged in order to create a large leisured population.

Ans. (a) : The statement, "Only an educated population can best make use of the benefits of economic progress" best reflects the underlying tone of the passage.

Passage-2

If presents bring less thrill now that we are grown up, perhaps it is because we have too much already; or perhaps it is because we have lost the fullness of the joy of receiving. Children's fears are poignant, their miseries are acute, but they do not look too forward nor too far backward. Their joys are clear and complete, because they have not yet learnt always to add 'but' to every proposition. Perhaps we are too cautious, too anxious, too skeptical, perhaps less about them and entered with more single minded enjoyment into the happiness that come our way.

52. With reference to the passage, which one of the following statements is correct?

(a) It is not possible for adults to feel thrilled by presents.

(b) There can be more than one reason why adults feel less thrilled by presents.

(c) The author does not know why adults feel less thrilled by presents.

(d) Adults have less capacity to feel the joy of loving or being loved.

Ans. (b) : According to the passage, the statement 'there can be more than one reason why adults feel less thrilled by presents', best reflects the underlying tone of this passage.

53. The author of the passage is against

(a) worrying too much about the past and future

(b) being in the habit of thinking about presents

(c) not being thrilled by new things

(d) giving and receiving joy only partially

Ans. (a) : The author of the passage is against worrying too much about the past and the future.

54. Let A, B and C represent distinct non zero digits. Suppose x is the sum of all possible 3-digit numbers formed by A, B and C without repetition.

Consider the following statements:

(1) The 4-digit least value of x is 1332

(2) The 3-digit greatest value of x is 888.

Which of the above statements is/are correct?

(a) 1 only (b) 2 only

(c) Both 1 and 2 (d) Neither 1 nor 2

Ans. (a) : We know that, A, B and C are non-zero number which can be of 1, 2, 3, 4, 5, 6, 7, 8, 9

From statement-1–

The total number formed by taking the numbers 1, 2 and 3 will be 6

∵ 123 +132 + 213 + 231 + 312 + 321 = 1332

From statement-2–

The total number formed by taking the number 7, 8 and 9 will be 6

= 789 + 798 + 879+ 897 + 978 + 987 = 5328

Hence, only statement 1 will be correct.

55. There is a numeric lock which has a 3-digit PIN. The PIN contains digits 1 to 7. There is no repetition of digits The digits in the PIN from left to right are in decreasing order. Any two digits in the PIN differ by at least 2. How many maximum attempts does one need to find out the PIN with certainty?

(a) 6 (b) 8

(c) 10 (d) 13

Ans. (c) : According to the question,

Possible pin code number

= n{753, 752, 751, 742, 741, 731, 642, 641, 631,531}

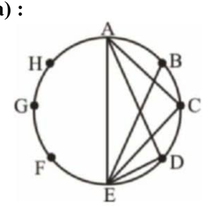

= 10

56. There are eight equidistant points on a circle. How many right-angled triangles can be drawn using these points as vertices and taking the diameter as one side of the triangle?

(a) 24 (b) 16

(c) 12 (d) 8

Ans. (a) :

Total 6 right angle triangle can be formed on one diameter.

So total right angle triangle = 4 × 6 = 24

57. 24 men and 12 women can do a piece of work in 30 days. In how many days can 12 men and 24 women do the same piece of work?

(a) 30 days

(b) More than 30 days

(c) Less than 30 days or more than 30 days

(d) Data is inadequate to draw any conclusion

Ans. (d) : Data is inadequate to draw any conclusion.

58. What is the remainder when 91×92×93×94×95×96×97×98×99 is divided by 1261?

(a) 3 (b) 2

(c) 1 (d) 0
