phones and tablets only exacerbate our glut of choices. Constant connectivity and overconsumption of real-time data and social media can leave little room for self-reflection and rest, making decisions more difficult. Life is about choices. Many people are overwhelmed with attractive life choices, yet find themselves unhappy and anxious.

61. Which one of the following statements best reflects the most logical message implied by the above passage?

(a) Modern technology enfeebles societal structure and makes life difficult.
(b) Modern life is full of uncertainties and endless difficult choices.
(c) We are influenced by the opinion of others and have no courage to follow our own convictions.
(d) In our lives, having too few choices may not be a good thing, but having too many can be equally as difficult.

Ans. (d) : Statement that best reflects the most logical message implied by the above passage is - "In our lives, having too few choices may not be a good thing, but having too many can be equally as difficult."

Passage–2

Household finance in India is unique. We have a tendency of invest heavily in physical assets such as gold and property. Steps to encourage the financialization of savings are critical. A populace accustomed to traditional processes will not simply jump into financialization. Hurdles to change include onerous bureaucracy, a scepticism of organized financial institutions, a lack of basic information about which of the myriad services and providers is best for each family, and how (and even if) one can make the transition between them if necessary.

62. Regarding the financialization of household savings, which of the following statements best reflect the solutions that are implied by the passage?

1. **A flexible environment is needed to develop solutions.**
2. **Households need customised solutions.**
3. **Innovations in financial technology are required.**

Select the correct answer using the code given below :

(a) 1 and 2 only (b) 2 and 3 only
(c) 1 and 3 only (d) 1, 2 and 3

Ans. (a) : Regarding the financialization of household savings, statement 1 and 2, best reflects the solutions that are implied by the passage.

Passage–3

Pharmaceutical patents grant protection to the patentee for the duration of the patent term. The patentees enjoy the liberty to determine the prices of medicines, which is time-limited to the period of monopoly, but could be unaffordable to the public. Such patent protection offered to the patentees is believed to benefit the public over the longer term through innovations and research and development (R & D), although if comes at a cost, in the nature of higher prices for the patented medicine. The patent regime and price protection – through a legally validated high price for the medicine during the currency of the patent – provide the patentee with a legitimate mechanism to get returns on the costs incurred in innovation and research.

63. Based on the above passage, the following assumptions have been made :

1. **Patent protection given to patentees puts a huge burden on public's purchasing power in accessing patented medicines.**
2. **Dependence on other countries for pharmaceutical products is a huge burden for developing and poor countries.**
3. **Providing medicines to the public at affordable prices is a key goal during the public health policy design in many countries.**
4. **Governments need to find an appropriate balance between the rights of patentees and the requirements of the patients.**

Which of the above assumptions are valid?

(a) 1 and 2 (b) 1 and 4 (c) 3 and 4 (d) 2 and 3

Ans. (b) : According to the given passage, assumption-1 and assumption 4 are valid.

Passage–4

India should ensure the growth of the digital economy while keeping personal data of citizens secure and protected. No one will **innovate in a surveillance-oriented environment** or in a place where an individual's personal information is compromised. The ultimate control of data must reside with the individuals who generate it; they should be enabled to use, restrict or monetise it as they wish. Therefore, data protection laws should enable the right kind of innovation – one that is user-centric and privacy protecting.

64. Based on the above passage, the following assumptions have been made :

1. **Protection of privacy is not just a right, but it has value o the economy.**
2. **There is a fundamental link between privacy and innovation.**

Which of the above assumptions is/are valid?

(a) 1 only (b) 2 only
(c) Both 1 and 2 (d) Neither 1 nor 2

Ans. (c) : According to the Passage, both the assumptions are valid.

65. In an examination, the maximum marks for each of the four papers namely P, Q, R and S are 100. Marks scored by the students are in integers. A student can score 99% in n different ways. What is the value of n?

(a) 16 (b) 17 (c) 23 (d) 35

Ans. (d) : According to the given,

	P	Q	R	S
Max	100	100	100	100
Case (i)	96	100	100	$100 \Rightarrow \frac{\angle 4}{\angle 3} = 4$
Case (ii)	97	99	100	$100 \Rightarrow \frac{\angle 4}{\angle 2} = 12$
Case (iii)	98	98	100	$100 \Rightarrow \frac{\angle 4}{\angle 2 \angle 2} = 6$
Case (iv)	98	99	99	$100 \Rightarrow \frac{\angle 4}{\angle 2} = 12$
Case (v)	99	99	99	$99 \Rightarrow \frac{\angle 4}{\angle 4} = 1$

Therefore, total number of different ways
= n = 4 + 12 + 6 + 12 + 1 = 35

66. A flag has to be designed with 4 horizontal stripes using some or all of the colours red, green and yellow. What is the number of different ways in which this can be done so that no two adjacent stripes have the same colour?

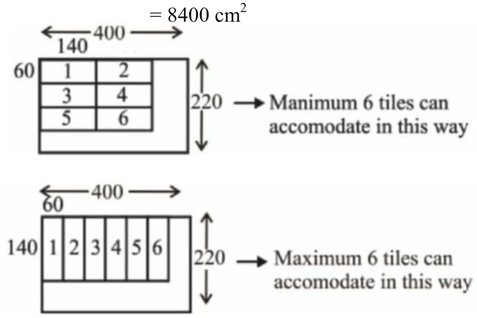

(a) 12 (b) 18 (c) 24 (d) 36

Ans. (c) : According to the given,
1st strip can be coloured in = 3 ways
2nd strip can be colured in = 2 ways
3rd strip can be coloured in = 2 ways
4th strip can be coloured in = 2 ways
Then, total ways = 3 × 2 × 2 × 2 = 24 ways

67. A rectangular floor measures 4 m in length and 2.2 m in breath. Tiles of size 140 cm by 60 cm have to be laid such that the tiles do not overlap. A tile can be placed in any orientation so long as its edges are parallel to the edges of the floor. What is the maximum number of tiles that can be accommodated on the floor?

(a) 6 (b) 7 (c) 8 (d) 9

Ans. (a) : According to the given,
Length of floor = 4m = 400cm
Breadth of floor = 2.2m = 220cm
Area of the floor = 88000 cm^2
Area of each tile = 140 × 60
= 8400 cm^2

Hence, answer in 6.

68. There are five persons P, Q, R, S and T each one of whom has to be assigned one task. Neither P nor Q can be assigned Task-1. Task-2 must be assigned to either R or S. In how many ways can the assignment be done?

(a) 6 (b) 12
(c) 18 (d) 24

Ans. (a) : According to the question,
There are two tasks, task 1 and task 2 and five persons P, Q, R, S and T.
→ Number of ways of assigning tasks to P and Q is just 1 i.e. P and Q can be given task 2 only.
→ Number of ways of assigning task to T is 2 i.e. T can be given any of the two tasks.
→ Number of ways of assigning task to R and S is 3 i.e.

R	S
Task 1	Task 2
Task 2	Task 1
Task 2	Task 2

So, total number of ways of assigning tasks to five Persons is 1 × 2 × 3 = 6

69. These are large number of silver coins weighing 2 gm, 5 gm, 10 gm, 25 gm, 50 gm each. Consider the following statements:

1. **To buy 78 gm of coins one must buy at least 7 coins.**
2. **To weigh 78 cm using these coins one can use less than 7 coins.**

Which of the statements given above is/are correct?

(a) 1 only (b) 2 only
(c) Both 1 and 2 (d) Neither 1 nor 2

Ans. (a) : According to the given,
Maximum number of coins required to buy 78 gm =
2gm → 4 coin
50 gm → 1 coin
10 gm → 2 coin
78 gm → 7 coin
Hence, statement 1 is correct.
Statement 2 in incorrect.

70. Consider the following:

I. A+B means A is neither smaller nor equal to B.
II. A–B means A is not greater than B.
III. A × B means A is not smaller than B.
IV. A÷ B means A is neither greater nor equal to B.
V. A ± B means A is neither smaller not greater than B.

Statements : P × Q, P – T, T ÷ R, R ± S
Conclusion-1 : Q ± T
Conclusion-2 : S + Q
Which one of the following is correct in respect of the above Statement and the Conclusions?

(a) Only Conclusion-1 follows from the Statement.
(b) Only Conclusion-2 follows from the Statement.
(c) Both Conclusion-1 and Conclusion-2 follow from the Statement.
(d) Neither Conclusion-1 nor Conclusion-2 follows from the Statement.

Ans. (b) : According to information given in the question,

$A + B \rightarrow A > B$
$A - B \rightarrow A \le B$
$A \times B \rightarrow A \ge B$
$A \div B \rightarrow A < B$
$A \pm B \rightarrow A = B$

Therefore,

$$\left.\begin{array}{l} P \times Q \rightarrow P \ge Q \\ P - T \rightarrow P \le Q \\ T \div R \rightarrow T < R \\ R \pm S \rightarrow R = S \end{array}\right\} S = R > T \ge P \ge Q$$

Conclusions:-
(1) $Q \pm T \rightarrow Q = T \rightarrow$ incorrect
(2) $S + Q \rightarrow S > Q \rightarrow$ Correct

Directions for the followings 3 (three) items :
Read the following three passages and answer the items that follow the passages. Your answers to these items should be based on the passages only.
