(iii) Select Microsoft Power point – Click.

(iv) New Power Point file will open, and then type the title and subtitle if wanted.

(v) A new slide can be inserted by 'click' on icon 'new slide' or using short key 'Ctrl + M'

(vi) We can type the content, insert the table, pictures, movies, sounds, etc., with the content.

(vii) Tab 'Design' helps to design the slides (can select common design for all slides or separate slide for each slide)

(viii) Click icon slide show, one can run slide show either starting from the first slide or starting from the current slide.

The power point presentation (PPT) facilitates the key points to be kept in memory and understand the particular topic. Recently, the smart class room teaching uses the PPT to deliver the information in an effective way to enhance the quality of teaching.

Think and Do

- Make a Document with MS word on "Incredible India".
- Prepare an Excel Sheet for your daily pocket expenses for each category/item in last month
- Prepare and present a "Power Point" for "Day out with your parents"

CONCLUSION

This chapter provide the knowledge of necessity of mathematics in economics by explaining the application of linear algebra, calculus and Information Communication and Technology. Specifically the knowledge of functions, matrices , differential calculus, Integral calculus ,MS word, MS Excel and Power Point Presentation are depicted with suitable applications. The activities are also added for students to learn it reality about the use of mathematical methods in economics.

FORMULAE

1. $m= y_2-y_1/x_2-x_1$ for Slope
2. $(y-y_1) = m\ (x-x_1)$ for straight Line
3. $|A| = \mathbf{a_1(b_2c_3 - b_3c_2) - a_2(b_1c_3-b_3c_1)+a_3(b_1c_2-b_2c_1)}$ for 3x3 matrices
4. Differentiation of constant is zero
5. Differentiation of x^n is $nx^{(n-1)}$
6. e_d = Marginal function / Average function
7. $e_d = \dfrac{-P}{x}\dfrac{dx}{dp}$
8. Integration of x^n is $\dfrac{x^{n+1}}{n+1}+C$
9. $CS=\left[\int_0^{x_0} f(x)dx\right]-x_o p_o$
10. PS = x_0p_0 – integration of supply function within limit $= x_o p_o - \int_0^{x_0} g(x)dx$
