ICT CORNER

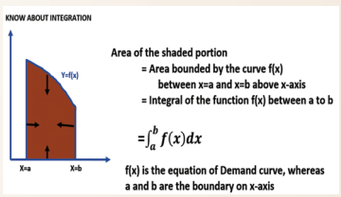

Consumer's and Producer's Surplus

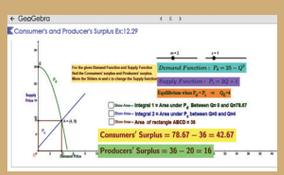

Lets use Integration to find Consumer's and Producer's Surplus

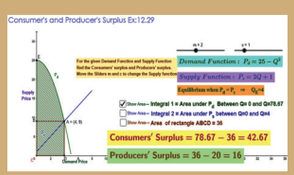

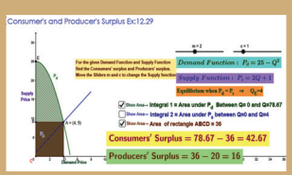

Steps:

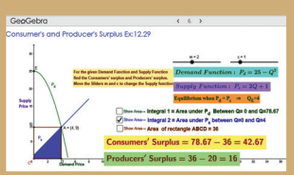

- Open the Browser type the URL given (or) Scan the QR Code.
- GeoGebra Work book called "XI STD ECONOMICS" will appear, Open the worksheet named "Consumer's and Producer's Surplus Ex:12.29"
- Without integration we cannot find the Area under the curve. For Higher studies atleast you should know what is Integration and why it is needed.
- In the worksheet Green colour is the Demand Curve and Blue colour is the Supply curve. They intersect at Point A (4,9). In which x axis value 4 is the demand price. If you integrate the Demand curve between 0 and 4 we get the area as shown. Click "Show Area Integral1" integrating the demand price between 0 and 4.
- If you click on "Show Area of Rectangle" you can see the area of the rectangle which is obtained by Multiplying the length 4 and Breadth 9 (Point A(4,9))
- If you subtract: the area under the curve PD -Area of the rectangle you get the Consumer's Surplus.
- Click on "Show Area Integral 2" you see Blue colour area which is obtained by Integrating Supply Price line between 0 and 4. Subtract: Area of the rectangle – Area under the line PS you get The Producer's Surplus. You can change PS line by moving the sliders 'm' and 'c'. you can see the changes in Consumer's Surplus and Producer's Surplus.
