(vi) For the GDP to grow at 9 per cent, commercial energy supplies will have to grow at a rate between 6.5 and 7 per cent per year. Since India's domestic energy supplies are limited, dependence upon imports will increase. Import dependence in the case of petroleum has always been high and is projected to be **80** per cent in the Twelfth Plan.

(vii) Even in the case of **coal**, import dependence is projected to increase as the growth of thermal generation will require coal supplies which cannot be fully met from domestic mines.

(viii) It suggests the need to take steps to reduce energy intensity of production processes, increase domestic energy supply as quickly as possible and ensure rational energy pricing that will help achieve both objectives viz. reduced energy intensity of production process and enhance domestic energy supply, even though it may seem difficult to attempt.

(ix) It draws attention to evolving a holistic **water** management policy aiming at more efficient conservation of water and also in water use efficiency particularly in the field of agriculture.

(x) It argues that a new legislation for **land acquisition** is necessary, which strikes an appropriate balance between the need for fair compensation to those whose land is acquired and whose livelihood is disrupted, and the need to ensure that land acquisition does not become an impossible impediment to meeting our needs for infrastructure development, industrial expansion and urbanisation.

(xi) It maintains that **health, education** and **skill development** will continue to be focus areas in the Twelfth Plan and that there is a need to ensure adequate resources to these sectors – ***'universal healthcare'*** proposed by it, emphatically. Simultaneously, it also points to the need to ensure maximum efficiency in terms of outcomes for the resources allocated to these sectors. The need to harness ***private investment*** in these sectors has also been emphasised by the approach.

(xii) It takes cognizance of the fact that achieving 9 percent growth will require large **investments** in infrastructure sector development – notes greater momentum to public investment and Public Private
