today more concerned about the development constraints of the states and is trying to adequately support the State Plans to the extent it is possible. In return, the centre wants greater and transparent fiscal compliance from the states. This approach continued during the 11th Plan and so has been committed for the 12th Plan, too. After some time we may hope that this criticism of Indian planning will lose it's ground.

It is high time now that the planning process of the nation tries including the mass participation. The ***Economic Survey 2011-12*** rightly devotes a section to dwell into contracts and how the **civil society** and citizens play a key role in fostering economic growth. "*Honesty, punctuality, the propensity to keep promises, the attitude towards corruption are matters shaped in great part by norms and social beliefs and the behaviour patterns can become habitual. Moreover, in a democracy like India, what can be done by government depends in great measure on how ordinary people think and what people believe in,"* it says. The Survey further adds that the **civil society** has been campaigning to put in place new institutions, such as the Lokpal Act, to ensure the quality of service and bring about transparency through steps such as auction of natural resources while the government has either been slow or resisted several changes[101] .

4. Lop-sided Employment Strategy

Planning in India has been tilted heavily in favour of 'capital intensive' industries, especially from the second Plan onwards. Such industries in the public sector could not generate enough employment. In place of it India should have gone in for the 'labour-intensive' industries. In the era of economic reforms, the attitude changed and the planning process is promoting the agriculture sector with an emphasis on agri-industries and agro-exports to create more gainful and quality employment opportunities. The earlier emphasis on 'wage-employment' has shifted towards 'self-employment' to do away with the lop-sided employment strategy of the past.

5. Excessive Emphasis on the PSUs
