etc. Though a major section of the products under the APM were produced by the private sector, they were not sold on the market principles which hindered the profitability of the manufacturers as well as the sellers and ultimately the expansion of the concerned industries leading to a demand-supply gap. Under market reforms these products were to be brought into the market fold.

In the petroleum segment now only kerosene oil and the LPG remained under the APM while petrol, diesel, lubricants have been phased out. Similarly, the income tax paying families don't get sugar from the TPS on subsidies; only urea, among the fertilizers, remain under APM while many drugs have also been phased out of the mechanism. Opening the petroleum sector for private investment, cutting down the burden of levy on sugar, etc. are now giving dividends to the economy. But we cannot say that the Factor Market Reforms (FMRs) are complete in India. It is still going on. Cutting down subsidies on the essential goods is a socio-political question in India. Till market-based purchasing power is not delivered to all the consumers, it would not be possible to complete the FMRs.

(ii) Public Sector Reforms:

The second generation of reforms in the public sector especially emphasises on the areas like greater functional autonomy, freer leverage to the capital market, international tie-ups and greenfield ventures, disinvestment[34] (*strategic*), etc.

(iii) Reforms in the Government and Public Institutions:

This involves all those moves which really go to convert the role of the Government from the 'controller' to the 'facilitator' or the administrative reform, as it may be called.

(iv) Legal Sector Reforms:

Though reforms in the legal sector were started in the first generation itself, now it was to be deepened and newer areas were to be included—abolishing outdated and contradictory laws, reforms in the Indian Penal
