The higher revenue deficits (driven by high interest payments, subsidies, salaries and pensions, basically) and fiscal deficits make the government supply more money which push the inflation in the upward direction. Once the Fiscal and Budget Management Act came into force in 2003, the scenario improved in the coming times. Though the period from 1999 to 2003 did show high growth with low inflation and the lowest interest rates in India.

PROTEIN INFLATION

Some recent articles suggest that a change in dietary habits towards protein-rich foods has been a key driver of high food price inflation in India *(Subbarao 2011, Gokarn, 2011);* they also suggest that this is a result of:

(a) rising nominal rural wages helped by the expansion of the Mahatma Gandhi National Rural Employment Guarantee (MGNREGA) scheme;

(b) inadequate producer supply responses relative to demand; and
