62. We may refer to almost all the Credit and Monetary Policies announced by the RBI during this period.

63. As the RBI put it in its Credit and Monetary Policy Review of July 31, 2007.

64. It should be noted here that the level of inflation was below 5 per cent till the new Government came to power and the outgoing Government was blamed to freeze the inflation data to a more politically digestable level (i.e., below 5 per cent). The new Government in the process of preparing a producer price index (PPI) has also committed to make the inflation data automated like the shave indices.

70. 'The number of National Statistical Agencies collecting service producer prices data, though growing, is still small', points out the ***OECO-Eurosat, 2005 Inquiry on National Collection of Services Producer Prices Preliminary Report,*** giving information on 45 such countries. The report further adds that while some such agencies have focused exclusively on the price of services provided to enterprises, others have approached the subject more broadly through the development of services producer price indices with varying approaches and coverage. As per the report, at present, 30 countries collect services producer prices while prelimilary works have started in the other countries, particularly the European countries under the auspices of the Eurosat. Other than the developed Euro-American economies some other countries which worked as inspiration for India which have such an index are China, Hong Kong, Czech Republic, Slovak Republic, Poland, Lithuania, Israel and Vietnam.
