- “The SGR will give agriculture & rural development the due it deserves.”
- “The SGR will make Indian agriculture face the challenges of the WTO and emerge as a net gainer in the process of globalisation.”
- “The SGR is the best route to make economic reforms reach the masses and benefit those who consider it anti-poor, anti-agriculture and anti-rural areas.”
- “The SGR is the best way to let people feel that economic reform has a *human face* and very much essential for rich and poor, alike.”
- “The SGR is, undoubtedly the best and the ultimate as well as a complete agriculture policy of India.”

In recent times, the governmental approach has gone for a complete change in favour of agriculture sector and the SGR. It is clearly visible from the streamlining of the New Agricultural Policy (2000), the Union Budget, Foreign Trade Policy, the Credit and Monetary Policy what would be the future requirements of the SGR.

Impact of Second Green Revolution

The Second Green Revolution has every prospect of revolutionising the agriculture sector of India with multi-dimensional positive impact on agriculture in particular and the economy, in general:

1. As agricultural production will increase, India will be safe from ***food security*** concern. This will provide India ***physical access*** to food.
2. Every Indian will have ***economic access*** to food because of increase in production and cost cut due to genetically modified foods (GMFs) will make food cheaper.
3. As this is a sustainable kind of agriculture revolution, India will also be able to make its agriculture sector ecologically safe—the achievement of ***ecological access*** will become possible.
4. The surplus agricultural produce will enter the world market and agriculture sector will be able to tap the ***benefits of globalisation***
