thus, farmers, rural areas and agri-business will be able to feel the benefits of economic reforms and globalisation.

5. It will create ***gainful employment*** sources in the agriculture sector on which more than 58 per cent of the population depends for its livelihood. It will serve the purposes of poverty alleviation, bridging economic inequality, boosting rural development, solving the curse of unemployment, etc.
6. It will eliminate hunger and malnutrition from India.
7. India won't be an example of ***'market failure'***—its market will succeed by increasing the purchasing capacity of the population.
8. Living standard of the population will improve and development has to show up. Thus India's rank on the human development index (HDI) will improve for sure.

Other than the above-given points, there will be numerous related positive effects on the economy as a whole and on the agriculture sector in particular.

Second Green Revolution Strategy Adopted in Eleventh Plan[59]

The urgent need for taking agriculture to a higher trajectory of four per cent annual growth can be met only with improvement in the scale as well as quality of agricultural reforms undertaken by the various States and agencies at the various levels. These reforms must aim at efficient use of resources and conservation of soil, water and ecology on a sustainable basis, and in a holistic framework. Such a holistic framework must incorporate financing of rural infrastructure such as water, roads and power.

The approach paper to the Eleventh Five Year plan has highlighted such a holistic framework and suggested the following strategies to raise agricultural output:

(a) Doubling the rate of growth of irrigated area;
(b) Improving water management, rain water harvesting and watershed development;
(c) Reclaiming degraded land and focusing on soil quality;
(d) Bridging the knowledge gap through effective extension;
