(e) Diversifying into high value outputs, fruits, vegetables, flowers, herbs and spices, medicinal plants, bamboo, bio-diesel, but with adequate measures to ensure food security;
(f) Promoting animal husbandry and fishery;
(g) Providing easy access to credit at affordable rates;
(h) Improving the incentive structure and functioning of markets; and
(i) Refocusing on land reforms issues.

National Commission on Farmers has already laid the foundation for such a framework.[60] Programme formulation as well as their implementation in the States must be based on unique regional contexts incorporating agro-climatic conditions; and availability of appropriate research and development (R&D) backed by timely and adequate extension and finance.

Second Push to Agriculture

The post-Green Revolution programme launched by the Government of Punjab in 2004, includes introduction of new technology in agriculture (green farming techniques, use of biotechnology, etc. encompassing the idea of *sustainable development*) besides crop diversification, promotion dairy and bee-keeping, floriculture, horticulture, modernising agriculture markets and value addition.[61]

WTO AND THE INDIAN AGRICULTURE: *PROSPECTS AND CHALLENGES*

With the operationalisation of the provisions of the World Trade Organisation (WTO), the process of globalisation commenced in the major parts of the world—the non-member countries, in the coming few years, also started negotiating for entry into the club. There has always been an air of confusion among the members and the non-members of the WTO in assessing the pros and cons of globalisation on the health of their economies. The sector which has created the highest number of deliberations in the WTO as well as views and counterviews has been agriculture—an area of utmost concern for the developed and the
