incubators will need to be set up on a Public-Private Partnership basis. To attract more investment and talent, incubators need to be allowed to distribute profits back to investors. With some of these changes indutrial growth could become steadier.

INDIAN INFRASTRUCTURE

An Introduction

Infrastructure is the 'lifeline' of an economy as protein is the lifeline for the human body. Whichever sector be the prime moving force of an economy i.e. primary, secondary or tertiary, suitable level of infrastructure presence is a pre-requisite of growth and development. This is why the government in India has always given priority to the developmental aspects of the sector. But the level of preparedness and performance had been always less than required by the economy. Which sector are called the infrastructure? ***Basically, the goods and services usually requiring higher investment, considered essential for the proper functioning for an economy is called the infrastructure of an economy*** (**definition**)[58]. Such sector might be as many as required by a particular economy such as power, transportation, communication, water supply, sewerage, housing, urban amenities, etc.

There are three sectors which are considered as the infrastructure universally around the world namely power, transportation and communication. Since, the infrastructure benefits the whole economy, it has been often argued by the economists that the sector should be funded by the government by means of taxation, partly in not wholly.

Indian infrastructure sector is clearly overstrained and has suffered from underinvestment in the post-reforms period[59]. Infrastructure bottlenecks are always constraint in achieving a higher growth for the economy. India needs massive investment both from the public and private sectors to overcome here infrastructure bottlenecks. Investments by the public and private sectors are not alternatives but complimentary to each other as the required investment is very high. Public investment in the sector depends upon the ability to raise resources (capital) in the public sector and this in
