The government document has provided the following inputs and advice in the area of India's infrastructure sector –

- The *12thPlan* lays special emphasis on development of the infrastructure sector including:
  - Energy, as the availability of quality infrastructure is important not only for sustaining high growth but also ensuring that the growth is inclusive.
  - The total investment in the infrastructure sector during the Plan, estimated at Rs. 56.3 lakh crore (approx. US$1trillion), will be nearly double that made during the 11th Plan.
  - This step up in investment will be feasible primarily because of enlarged private-sector participation that is envisaged.
- Unbundling of infrastructure projects, *public private partnerships* (PPP), and more transparent regulatory mechanisms have induced private investors to increase their participation in infrastructure sectors:
  - Their share in infrastructure investment increased from 22 per cent in the 10th Plan to 38 per cent in the 11th Plan and is expected to be about 48 per cent during the 12th Plan.
  - Yet, more than half of the resources required for infrastructure would need to come from the public sector, from the government, and the parastatals.
  - This would require not only the creation of the fiscal space but also use of a *rational pricing policy*.
  - Scaling up private-sector participation on a sustainable basis will require *redefining the contours of their participation* for the development of infrastructure sector in a transparent and objective manner with a comprehensive regulatory mechanism in place.
  - From a *macroeconomic perspective*, a high level of investment in the infrastructure sector is essential for the overall revival of investment climate which may finally lead to sustainable growth in an economy.
