A provision allowed by the SEBI to all Initial Public Offers (IPOs) in which individual investors are reserved and allotted shares by the company. But the issuer has to disclose the price (at which shares have been allotted the size of the issue and the number of shares offered to the public).

IPO

Initial Public Offer (IPO) is an event of share issuing when a company comes up with its share/securities issued for the first time.

Price Band

A process of public issue where the company gives a price range (known as price band) and it is left upon the share applicants to quote their prices on it —the highest bidders getting the shares. This is a variant of share issue at premium but considered a safer choice.

ECB Policy

A prospective borrower can access external commercial borrowings (ECBs) under two routes, namely the 'automatic route' and the 'approval route'. ECBs not covered under the automatic route are considered on case-by-case basis by the RBI under the approval route. The High Level Committee on ECB took a number of decisions in *September 2011* to expand the scope of ECBs which include:

(i) High networth individuals (HNIs) who fulfil the criteria prescribed by SEBI can invest in IDFs.

(ii) IFCs have been included as eligible issuers for FII investment in the corporate bonds long-term infra category.

(iii) ECB would be permitted for refinancing of rupee loans of infrastructure projects on the condition that at least 25 per cent of such ECBs shall be used for repayment of the said rupee loan and 75 per cent invested in new projects in the infrastructure sector (but only under the approval route).

(iv) Refinancing of buyer's/supplier's credit through ECBs for the purchase of capital goods by companies in the infrastructure sector
