A term used in forex market to denote the domestic currency which is under enough pressure (heat) of depreciation due to a hard currency's high tendency of exiting the economy (since it has become hot). It is also known as *currency under heat* or *under hammering.*

CHEAP CURRENCY

A term first used by the economist J. M. Keynes (1930s). If a government starts re-purchasing its bonds before their maturities (at full-maturity prices) the money which flows into the economy is known as the cheap currency, also called cheap money.

In banking industry, it means a period of comparatively lower/softer interest rates regime.

DEAR CURRENCY

This term was popularised by the other economists in early 1930s to show the opposite of the cheap currency. When a goverment issues bonds, the money which flows from the public to the government or the money in the economy in general is called dear currency, also called as *dear money.*

In the banking industry, it means a period of comparatively higher/costlier interest rates regime.
