exists a non-material part of life too which needs to be realised to make our development result into happiness.

5. Todaro and Smith, op. cit., p. 58.
6. Diverse opinions were there about the real meaning of 'development'—by mid 1940s upto almost the whole 1950s it meant 5–7 per cent growth rate in an economy—even by the IMF and WB. By the late 1960s ***new views*** of development started emerging. **Arthur Lewis** had seen development in the sense of *human freedom* in 1963 itself when he concluded that "the advantage of economic growth is not that wealth increases happiness, but that it increases the range of human choice." For him development means a freedom from 'servitude'—mankind could be free to have choices to lead a life full of material goods or in spiritual contemplation (W. Arthur Lewis, ***The Theory of Economic Growth,*** Allen & Unwin, London, 1963, p. 420).

   For **Dudley Seers** development meant more employment and equality besides a falling poverty (***The Meaning of Development,*** a paper presented at the 11th World Conference of the Society for International Development, N. Delhi, 1969, p. 3). Dudley Seers was later supported by many other economists such as **Denis Goulet** (***The Cruel Choice: A New Concept in the Theory of Development,*** Atheneum, New York, 1971, p. 23), Richard Brinkman (1995), P. Jegadish Gandhi (1996) and many others.

   The **International Labour Organisation** (ILO) had also articulated by the mid-1970s that economic development must be able to deliver the economic ability that people can meet their basic needs (the concept of 'sustenance') besides the elimination of absolute poverty, creating more employment and lessening income inequalities (***Employment, Growth and Basic Needs,*** ILO, Geneva, 1976). **Amartya Sen** articulated a similar view via his ideas of 'capabilities' and 'entitlements' ("Development: which way Now?", ***Economic Journal 93,*** December 1983, pp. 754–757.).

   By 1994, the United Nations looked to including the element of 'capabilities' in its idea of development when it concludes that ***human beings are born with certain potential capabilities and the purpose of development is to create an environment in which all people can expand their capabilities in present times and in future. Wealth is important for human life. But to concentrate exclusively on it is wrong for two reasons. First, accumulating wealth is not necessary for the fulfillment of some important human choices .... Second, human choices extend far beyond economic well-being (Human Development Report 1994, UNDP,*** Oxford University Press, New York, 1994, pp. 13–15).
