(i) Almost no presence of infrastructure sector i.e. power, transportation and communication.

(ii) Negligible presence of the infrastructure industries i.e. iron and steel, cement, coal, crude oil, oil refining and electricity.

(iii) Lack of investible capital—be the case of either the government or the private sector.

(iv) Absence of the required technology to support the process of industrialisation and no research and development.

(v) Lack of skilled manpower.

(vi) Absence of entrepreneurship among the people.

(vii) Absence of the market for industrial goods.

(viii) Many other sociopsychological factors which were negative forces for the proper industrialisation of the economy.

The obvious choice for India would have been the agriculture sector as the moving force of the economy because:

(i) The country was having the natural resource of fertile land which was fit for cultivation.

(ii) The human resource was not requiring any kind of higher training.

By only organising our land ownership, irrigation and other inputs to agriculture India could have gone for better prospects of development. Once there was no crises of food, shelter, basic healthcare, etc. to the masses, one goal of development could have been realised—a general welfare of the people. Once the masses were able to achieve a level of purchasing capacity, India could have gone for the expansion of industries. India was capable of generating as much surplus income for its masses as was required by the emerging industries for a market success. The People's Republic of China did the same in 1949—taking a realistic evaluation of its resources, it declared agriculture as its prime moving force for the economy. The surplus generated out of agriculture was suitably invested to develop the pre-requisites for industrialisation and the country went for it in 1970s.

The emergence of industrial China was so vibrant that its impact was felt in the so-called highly developed and industrialised economies of the world—the industrial homework of China catapulted it into a giant.
