international bodies were supporting the member countries from every point of view to industrialise. Same was the case with the developed economies. It was possible not only to industrialise faster on these supports but a hope for emerging as an industrial exporter was also there. Such kind of supports were not being offered by them to an economy going to opt for agriculture as its PMF. Basically, going for the sector agriculture was considered a symbol of 'backwardness' at that time also. The political leadership wanted to carry India ahead, and not in the backward direction. It was only in the 1990s that the world and the WB/IMF changed its opinion regarding agriculture sector—and emphasis on this sector by an economy was no more considered a sign of backwardness.

(iii) The Second World War has proved the supremacy of defence power. For defence a country needs not only support of science and technology but an industrial base also. India also required a powerful defence base for herself as a deterrent force. By opting for industry as her PMF the economy tried to solve many challenges simultaneously—first, industry will give faster growth, second, agriculture will be modernised in time and third the economy will be able to develop its own defence force. Since the economy had opted for scientific and technological preparedness also, its achievements were to sustain the pace of modernising world out there (this seems taking place in India to a great extent.).

(iv) Even before independence, there was a socio-economic consensus among social scientists along with the nationalist leaders, that India needed a boost towards social change as the country lagged behind in the areas of modernisation. A break from the traditional and outmoded way of life and cultivation of a scientific outlook was a must for the country. Such feelings also made the political leadership of the time go in favour of wholehearted industrialisation.

(v) By the time India got her independence the might of industrialisation was already proven and there were no doubts regarding its efficacy.

Given above are some of the important reasons that worked to make Indian political leadership go in favour of opting industry as the economy's prime
