examples from some sources:

1. As per the **World Bank's** *'Doing Business: Measuring Business Regulations', 2013'–*
   - India ranks 132 out of 185 countries in ease of doing business,
   - Starting a business where India ranks 173, takes about 12 procedures, 27 days, and a paid up capital of 140 per cent of per capita income.
   - By contrast, it takes only 7 procedures, 19 days, and 18 per cent of per capita income on average for our neighbours in South Asia.
   - After getting done with the ***initial procedures***, entrepreneurs have to obtain a number of clearances when applying for building/occupancy permits and utility connections. These require separate visits to various authorities whose employees often inspect the site.
   - It takes as long as 1.5 months to obtain an electricity connection in 7 out of the 17 benchmarked Indian cities. Many processes especially at state level remain complex, forcing companies to hire a consultant, thereby adding to the costs.
2. An easier ***process of exit*** is needed for the MSME, which can quicken and simplify the process of resolving the claims of workers and financiers so that the assets of the failed firm can be put to better use. According to *World Bank's 'Doing Business in India, 2009'–*
   - Across 17 Indian cities, the insolvency process takes on average 7.9 years, costs 8.6 per cent of the estate value (mostly due to attorney fees, newspaper publication costs, liquidator's fees, and preservation costs), and the recovery rate is only 13.7 per cent.
   - The process is slower even than in other South Asian countries where, in the same year, it took on average five years and creditors could expect to recover on average 19.9 per cent.
   - Low asset recovery in failed firms feeds into lower levels of financing for Indian MSMEs.
