According to a study by the Organization for Economic Cooperation and Development (OECD), Thailand, India, Singapore, Malaysia, Hungary, Poland, and Malta are promoting their comparative advantage as medical tourist destinations. Singapore Medicine has been established under government-industry partnership to promote Singapore as a destination for advanced medical care. Malaysia has established the Malaysia Healthcare Travel Council to develop and promote the health-care and travel industry. Philippines has launched the Philippines Medical Tourism Programme and included medical tourism in the Investment Policies Plan. Thailand has been leveraging elements such as spas and alternative therapies in its promotional strategies for several decades, coupled more recently with state-of-the-art hospitals and skilled professionals.

Several features like cost-effective health-care solutions, availability of skilled health-care professionals, reputation for treatment in advanced health-care segments, increasing popularity of India's traditional wellness systems, and strengths in IT have positioned India as an ideal health-care destination. India, while strengthening its capabilities in modern health-care systems is also leveraging its inherent strengths in traditional health-care systems such as Ayurveda, Siddha, Yoga, Naturopathy, and Faith healing/Spiritualism. It also holds an edge over competitor countries with its mastery over techniques of 'concentration and 'mind control'.

Q. 44 During India's Struggle for Independence, 'Indian capitalist class was anti-socialist and bourgeois but it was not pro-imperialist'. Elucidate.

Ans. There has been a general misconception about the 'loyality' and 'stand' of the Indian capitalist class (industrialists, traders) throughout the freedom struggle – for which there were valid reasons:

- They never wanted their business to suffer so opposed the Civil Disobedience and Non-coperation Movements – seen going against Gandhi in particular and INC is general.
- They opposed 'socialism' and favoured 'capitalism' that is why they looked in opposition to the socialistic leanings of the INC.
