entertainment and 20 per cent for conveyance, tour and travel. On this a rate of 30 per cent (i.e., 30 per cent of 50 per cent in case of entertainment) is applied as a tax.

GALLUP POLL

A method of survey in which a representative sampling of public opinion or public awareness concerning a certain subject/issue is done and on this basis a conclusion is drawn.

The credit of developing this research methodology goes to *George H. Gallup* (1901–84), a US journalist and statistian who in 1935 did set up the *American Institute of Public Opinion.* Through his efforts the method developed between the period 1935–40. In the coming times, the poll technique was immensely used by business houses for their market research and the psephologists for election forecasting, around the world.

GAME THEORY

The analysis of situations involving two or more interacting decision makers (that may be individuals, competing firms, countries, etc.) who have conflicting objectives. It is a technique which uses logical deduction to explore the consequences of various strategies that might be adopted by game players having competing interests.

Game theory is a branch of *Applied Mathematics* that studies strategic interactions between agents–where the agents try maximising their pay off. It gives *formal modeling approach* to social situations in which decision makers interact with other agents. The theory generalises maximisation approaches developed to analyse markets such as supply and demand model.

The field dates back from the 1944 classic *Theory of Games and Economic Behaviour* by John von Neumann and Oskar Morgentern (Princeton University Press, N. Jersy, 1944 & 2004; 60th Anniversary Ed.). Neumann was a mathematician and Morgenstern an economist and this book was
