INSTITUTIONS

The support of institutions and the governments of the world did play a very vital role in the success of the Green Revolution all over the world.

The International Maize and Wheat Improvement Centre (CIMMYT), Mexico and the International Rice Research Institute (IRRI), Manila were the two institutions in strong partnership with national programmes which developed the miracle varieties of rice and wheat that fuelled the Green Revolution around the world.

The Consultative Group on International Agricultural Research (CGIAR), set up in 1971 (in Washington DC under the aegis of the World Bank) played a central role in Green Revolution, supporting the works of the CIMMYT and IRRI. Today, the 16 CGIAR support centres around the world generate new knowledge and farming technology for the agriculture sector. Its research products are "global public goods", freely available to all.

GREENSHOE OPTION

A term associated with the security/share market. This is a clause in the underwriting agreement of an initial public offer (IPO) by a company which allows to sell additional shares (usually 15 per cent) to the public if the demand for shares exceeds the expectation and the share trades above its offering price. It gets its name from the *Green Shoe* company which was the first company to be allowed such an option (in the USA, early 20th century). This is also known as *'over-allotment provision'*.

The company availing this option uses the proceeds (i.e. from the greenshoe option) to prevent any decline in market price of shares below the issue price in the post-listing period (in such cases the aforesaid company uses the money to purchase its own shares from the market–as demand increases, the market price of its shares picks up).
